attachment**I. General information on the annual financial statements****II. Information on accounting and valuation methods****1. Accounting and valuation principles**

Acquired intangible assets were stated at acquisition cost and, if they were subject to wear and tear, reduced by scheduled depreciation.

Property, plant and equipment were stated at acquisition or production cost and, where depreciable, reduced by scheduled depreciation.

In addition to the directly allocable costs, the production costs also include necessary overheads and depreciation caused by production.

Scheduled depreciation was carried out on a straight-line and degressive basis according to the expected useful life of the assets.

The transition from declining balance to linear depreciation occurs in cases where this leads to a higher annual depreciation.

Financial assets were recognized and valued as follows:

- Investments at acquisition cost

- Shares in affiliated companies at acquisition cost
- Loans at nominal value
- Interest-free and low-interest loans at present value
- Other securities at acquisition cost

Where necessary, the lower value available on the balance sheet date was recognized.

Inventories were recognized at acquisition or production cost. If the daily values on the balance sheet date were lower, they were used.

Receivables and securities were valued taking into account all identifiable risks.

The tax provisions contain the taxes relating to the financial year that have not yet been assessed.

The other provisions were formed for all other contingent liabilities. All recognizable risks were taken into account.

Liabilities were recognized at the settlement amount.

III. Information on the balance sheet
