

Rosenberger

Company Portrait

ROSENBERGER GROUP

Foreword

More than 60 years ago our father founded his company “Hans Rosenberger-Maschinenbau” in our hometown Tittmoning.

Ten years later, production of high-frequency coaxial connectors started and the company moved to a new site where it is still located today. From these modest beginnings a diversified multinational company has developed with numerous manufacturing locations and more than 11,000 employees.

The company is still owned by Hans, Bernhard and Peter Rosenberger and their families.

From the start the company has focused on innovation, technical competence and customer relationship as its guiding principles. These have helped us to be recognized as a global leader in our markets.

In future, as organizational structures, processes and tasks continue to develop – we are committed to maintaining and cultivating the traditional culture of our family-owned company.

Hans Rosenberger

About Us

Rosenberger's corporate culture is strongly characterized by tradition, sustainability and mutual respect. Our work is distinguished by a high level of technological competence, responsibility for quality and costs, and customer-oriented thinking and action.

“Because we see ourselves as an integral part of our customers' value chains, we can develop products and systems that help them to improve day after day. Thanks to our clear focus on innovation, we can offer interesting and varied tasks in all areas – also at our locations worldwide. The training and development of our employees is particularly important to us.”

Job and Career

Flexibility, creativity and trusting cooperation characterize the working atmosphere. The skills of the individual and the responsibility of the colleagues among each other determine the quality of the work. All employees have career opportunities in addition to their professional qualifications.

Our Apprenticeship and Education

The training of apprentices has a long tradition at Rosenberger. We are one of the leading companies in the region for apprenticeships and further education. Many of our leaders have completed their professional training at Rosenberger and then developed further together with the company.

Facts & Figures

- Employees worldwide: 11,000
- Employees Fridolfing: 2,200
- Apprentices Fridolfing: 135

Global Player with Family Values

We have the pragmatic power of innovation that is needed to keep tackling new challenges and developing solutions that help our customers move forward.

- Family-owned company with short decision-making processes
- Worldwide present company from Bavaria
- Leadership in technology and innovation
- Cooperation and development partner
- High vertical range of manufacture – everything from a single source

Sales of Rosenberger Group

- Worldwide: 1,274 Mio € (2018)
- By regions:
Europe 33% | Americas 23% | Asia 42% | others 2%

1970s

Begins production of subminiature connectors

Quality and Environment

Best possible quality of products and services and environmentally conscious action are declared components of Rosenberger's corporate philosophy.

Responsible treatment of our environment, economical use of necessary raw materials and protection of natural resources, recycling and high energy efficiency are at the forefront.

Certificates

IATF 16949 | DIN EN 9100 | ISO 9001 | ISO 14001

Worldwide Network

The Rosenberger Group's global network offers to customers high flexibility, speed, optimized cost structures and the best possible local customer service.

Europe

- Germany: Fridolfing, Augsburg, Laufen, Neuenbürg, Radeberg
- Austria: Timelkam
- France: Eckbolsheim
- Italy: Vimercate
- Hungary: Jászárokszállás, Jászberény, Nyírbátor, Taksony
- Denmark: Birkerød
- Sweden: Kista, Solna
- Spain: Madrid
- Great Britain: Bradford

America

- USA: Plano (TX), Akron (PA), Lake Charles (LA), Pennsauken (NJ)
- Brazil: Caçapava - São Paulo
- Chile: Santiago

Asia

- China: Beijing, Dianshan Hu, Dongguan, Shanghai
- India: Manesar, Goa
- Korea: Suwon-City
- Japan: Tokyo

Competencies and Technologies

Rosenberger works continuously on the development of innovative products. By ongoing optimization of processes and costs, we meet the high demands placed on product quality, reliable delivery and apply great emphasis on in-house value creation.

Research and Development

Our research and development engineers support all phases of the product realization process, from brainstorming and design to the start of production.

Production

With the most modern manufacturing technologies in single-part production – lathe- and punching and bending-technology, plastic injection moulding – as well as in cable assembly, we use the advantages of continuous production and are thus able to produce innovative products quickly in large quantities.

At a Glance

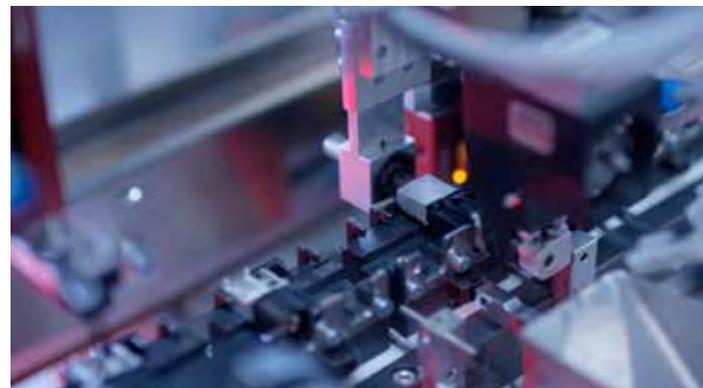

- Number of patents: approx. 2,000
- Calibration laboratory in accordance with DIN EN ISO/IEC 17025

Electroplating

In our in-house electroplating facility, the components are coated with suitable surfaces according to the technical and physical requirements. We place the highest value on conserving resources, recycling and energy efficiency in all processing procedures.

Assembly

Rosenberger operates production lines at many locations worldwide for the automated assembly of connectors, cable assemblies and -packaging.

Markets

Rosenberger is one of the world's leading suppliers of connectivity solutions in high-frequency, high-voltage and fiber optic technology – from prototype to series production. In custom machining, individual parts for technically sophisticated devices and systems are manufactured.

Renowned technology companies from various industries rely on precision and quality from Rosenberger:

- Communication
- Mobile communication / Site Solutions
- Test and measurement technology
- Automotive and vehicle industry
- Medical and industrial technology
- Aerospace
- Data centers
- Telematics
- Custom machining

Products

Rosenberger is a real Hidden Champion. Our products are usually installed and therefore not visible to the end customer.

And yet: shaping technology for the future is deeply rooted at Rosenberger. We are already working on products and solutions that will only be introduced into our lives in a few years' time.

1985
Entry to the
fiber optic market

Products for Communication and Mobile Communications

In addition to classic connectivity technology with HF connectors and cable assemblies for communications engineering and miniaturized contacts for printed circuit boards, we offer innovative hybrid solutions and measuring instruments for determining passive intermodulation performance for mobile and landline communications as well as for industrial and data technology.

Rosenberger Site Solutions develops, manufactures and supplies state-of-the-art FTTH / coaxial transmission solutions and test and measurement systems for the telecommunications industry. Customers receive end-to-end solutions and services as a one-stop shop.

Aerospace Products

Aerospace products must meet special and demanding requirements. We provide support at every project stage and supply connectors and cable assemblies according to DIN EN 9100. Renowned customers in the aviation and spaceflight industry rely on our complete traceability and our product quality “Made in Germany”.

Products for Test and Measurement Applications

As a reliable and careful development partner in industrial metrology, we develop and manufacture an extensive range of measuring and testing equipment.

High-quality precision products enable a wide range of measurement technology applications for active and passive components and devices. Rosenberger offers a “factory” standard calibration as well as a calibration laboratory accredited by the DAkkS according to DIN EN ISO 17025.

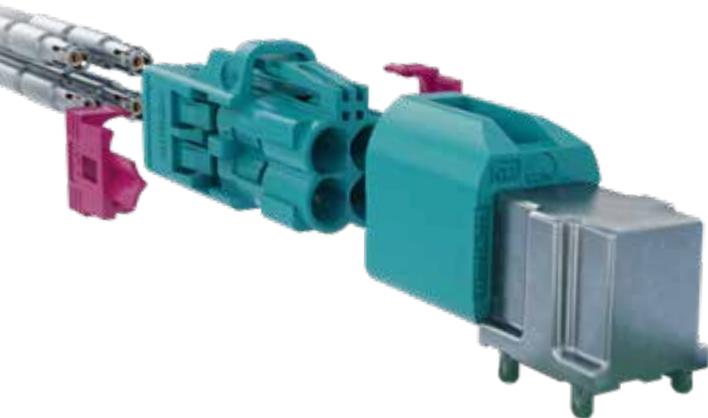

Products for Automotive Applications

Rosenberger can look back on many years of experience in the automotive sector. Rosenberger develops standards for high-speed data transmission for various telematics applications in automobiles, e.g. for autonomous driving and for driver assistance systems.

High-Speed Data Transmission

2000
Entry into automotive
electronics market

Rosenberger develops innovative, shielded high-voltage connections and distribution systems for environmentally friendly hybrid and electric drives, setting new industry standards.

High-Voltage in the Vehicle

Charging plug for LEVs (Light Electric Vehicles)

Products for Medical and Industry

In the future, people will not only be interconnected by means of mobile communications, but also with many devices used in everyday life: from intelligent kitchen machines to the completely connected “Smart Home”.

In industry, too, production and service processes, machines and devices are intelligently connected – this requires innovative concepts for communication between man and machine.

Products for Telematics Solutions

Digitalization is changing the world. We offer solutions in development and production and are therefore a strong partner for OEMs on their way to digitalization. We develop solutions for e.g. GPS positioning, electronic logbooks, theft protection, performance records and fleet management.

2008
Rosenberger celebrates
its 50th anniversary

Fiber Optic Products for Data Centers

Our fiber optic cabling solutions for data centers, local networks, telecommunications and industry can be found wherever large amounts of data have to be transmitted quickly and securely. In addition to developing and manufacturing the broad portfolio of fiber optic and copper cabling systems, we offer a variety of services such as planning, installation and maintenance of cabling infrastructures.

Precision Manufacturing for Custom Machining

Here we have specialized in the further refinement of customer-specific components. By implementing the highest technical requirements, our custom machining has developed into a qualified partner for the drive- and commercial vehicle-industry as well as for machine and plant construction, who – on behalf of the customer – takes over all production steps.
