	PAT. NO.	Title
1	11,176,573	Authenticating users for accurate online audience measurement
2	11,176,200	Fast component enumeration in graphs with implicit edges
3	10,679,216	Online machine data collection and archiving process
4	10,642,899	Fast component enumeration in graphs with implicit edges
5	10,425,379	Establishing unique sessions for DNS subscribers
6	10,402,854	Authenticating users for accurate online audience measurement
7	10,305,880	System for secure enrollment and secure verification of network users by a centralized identification service
8	10,037,529	Online machine data collection and archiving process
9	9,916,393	Fast component enumeration in graphs with implicit edges
10	9,722,968	Establishing unique sessions for DNS subscribers
11	9,712,497	Method and system for creation and verification of anonymous digital credentials
12	9,699,164	System for secure enrollment and secure verification of network users by a centralized identification service
13	9,477,968	Collecting information regarding consumer click-through traffic
14	9,430,778	Authenticating users for accurate online audience measurement
15	9,191,370	Method and system for creation and verification of anonymous digital credentials
16	9,183,567	Collecting information regarding consumer click-through traffic
17	9,172,691	System for secure enrollment and secure verification of network users by a centralized identification service
18	9,075,896	Fast component enumeration in graphs with implicit edges
19	9,038,153	System for secure enrollment and secure verification of network users by a centralized identification service
20	8,874,735	Collecting information regarding consumer click-through traffic
21	8,799,458	Identifying and marketing to a user device involved in an online transaction
22	8,762,574	Establishing unique sessions for DNS subscribers
23	8,701,170	System for secure enrollment and secure verification of network users by a centralized identification service
24	8,539,070	Detecting online fraud by proxy piercing to identify address of a user device involved in an online transaction

25 8,462,161 T System and method for fast component enumeration in graphs with implicit edges
26 8,452,715 T Secure transfer of value via electronic stamp
27 8,423,458 T Secure, closed-loop electronic transfer of money
28 8,380,831 T Establishing unique sessions for DNS subscribers
29 8,332,522 T Establishing unique sessions for DNS subscribers
30 8,296,245 T Method and system for creation and validation of anonymous digital credentials
31 8,150,968 T Proxy piercing for identifying address of and marketing to a user device involved in an online transaction
32 8,145,762 T Collecting information regarding consumer click-through traffic
33 8,140,689 T Establishing unique sessions for DNS subscribers
34 8,024,266 T Method for secure, closed-loop money transfer via electronic mail
35 7,958,246 T Establishing unique sessions for DNS subscribers
36 7,937,467 T Online machine data collection and archiving process
