## Independent Auditor's Report

(English Translation of a Report Originally Issued in Korean)

To the Board of Directors and Shareholders of  
LG Electronics Inc.

We have audited the accompanying consolidated financial statements of LG Electronics Inc. and its subsidiaries (collectively referred to as the "Group"), which comprise the consolidated statements of financial position as of December 31, 2017 and 2016, and the consolidated statements of profit or loss, consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies and other explanatory information.

### ***Management's responsibilities for the financial statements***

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with International Financial Reporting Standards as adopted by the Republic of Korea (Korean IFRS), and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

### ***Auditor's responsibilities***

Our responsibility is to express an opinion on the consolidated financial statements based on our audits. We conducted our audits in accordance with Korean Standards on Auditing. Those standards require that we comply with ethical requirements, and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

**Opinion**

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of LG Electronics Inc. and its subsidiaries as of December 31, 2017 and 2016, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with Korean IFRS.

**Other Matter**

Auditing standards and their application in practice vary among countries. The procedures and practices used in the Republic of Korea to audit such financial statements may differ from those generally accepted and applied in other countries.

Seoul, Korea  
March 8, 2018

This report is effective as of March 8, 2018, the audit report date. Certain subsequent events or circumstances, which may occur between the audit report date and the time of reading this report, could have a material impact on the accompanying consolidated financial statements and notes thereto. Accordingly, the readers of the audit report should understand that there is a possibility that the above audit report may have to be revised to reflect the impact of such subsequent events or circumstances, if any.

<sup>1</sup> Although the Group owns less than half of the voting rights of LG Innotek Co., Ltd. which is an intermediate parent company of its subsidiaries, the Group is deemed to have control over LG Innotek Co., Ltd. due to the size and dispersion of holdings of the other shareholders and their voting patterns at previous shareholders' meetings (Note 3).

<sup>2</sup> Although the Group owns less than 50% of the effective percentage of ownership of the entity, the Group has concluded that the Group controls the entity. This is because the Group has a right to appoint or dismiss the majority of its Board of Directors by virtue of an agreement with the other investors.

<sup>3</sup> Although the Group owns less than 50% of the effective percentage of ownership of the entity, the Group has concluded that the Group controls the entity. This is because the Group has the substantial power to direct the relevant activities and is exposed to variable returns.

## Notes to the Consolidated Financial Statements

### December 31, 2017 and 2016

---

#### **Basis of Preparation**

The Group maintains its accounting records in Korean won and prepares statutory financial statements in the Korean language (Hangul) in accordance with International Financial Reporting Standards as adopted by the Republic of Korea (Korean IFRS). The accompanying consolidated financial statements have been condensed, restructured and translated into English from the Korean language financial statements.

Certain information attached to the Korean language financial statements, but not required for a fair presentation of the Group's financial position, financial performance or cash flows, is not presented in the accompanying consolidated financial statements.

The consolidated financial statements of the Group have been prepared in accordance with Korean IFRS. These are the standards, subsequent amendments and related interpretations issued by the International Accounting Standards Board (IASB) that have been adopted by the Republic of Korea.

The preparation of financial statements requires the use of critical accounting estimates. Management also needs to exercise judgment in applying the Group's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 3.

#### **Changes in Accounting Policies and Disclosures**

(a) New and amended standards effective for the financial year beginning January 1, 2017.

- Amendments to Korean IFRS 1007 *Statement of Cash Flows*

Amendments to Korean IFRS 1007 *Statement of Cash flows* require to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes. The disclosures required by this amendment are provided in Note 33(b) changes in liabilities from financing activities.

- Amendments to Korean IFRS 1012 *Income Tax*

When assessing whether there is sufficient future taxable profit to assess the probability of realizing a deferred tax asset, amendments clarify that the future taxable profit should exclude tax deductions resulting from the reversal of those deductible temporary differences. In addition, the Group is required to assess a deductible temporary difference separated by and in combination with other deductible temporary differences of the appropriate type depending on whether tax law restricts the source of taxable profit. The application of this amendment does not have a significant impact on the accompanying consolidated financial statements.

- Amendments to Korean IFRS 1112 *Disclosures of Interests in Other Entities*

Amendments to Korean IFRS 1112 clarify when an entity's interest in a subsidiary, a joint venture or an associate is classified as held for sales or discontinued operations in

accordance with Korean IFRS 1105, the entity is required to disclose other information except for summarized financial information in accordance with Korean IFRS 1112. The application of this amendment does not have a significant impact on the accompanying consolidated financial statements.

- (b) New and amended standards and interpretations issued, but not effective for December 31, 2017, and not early adopted by the Group

- Korean IFRS 1109 *Financial Instruments*

The new standard for financial instruments issued in September, 2015 is effective for annual periods beginning on or after January 1, 2018 with early application permitted. This standard will replace Korean IFRS 1039 *Financial Instruments: Recognition and Measurement*. The Group will apply the standards for annual periods beginning on or after January 1, 2018.

The standard requires retrospective application with some exceptions. For example, an entity is not required to restate prior period in relation to classification and measurement (including impairment) of financial instruments. The standard requires prospective application of its hedge accounting requirements for all hedging relationships except the accounting for time value of options and other exceptions.

Korean IFRS 1109 requires all financial assets to be classified and measured on the basis of the entity's business model for managing financial assets and the contractual cash flow characteristics of the financial assets. A new impairment model, an expected credit loss model, is introduced and any subsequent changes in expected credit losses will be recognized in profit or loss. Also, hedge accounting rules are amended to extend the hedging relationship, which consists only of eligible hedging instruments and hedged items, qualifies for hedge accounting.

An effective implementation of Korean IFRS 1109 requires preparation processes including financial impact assessment, accounting policy establishment, accounting system development and the system stabilization. The impact on the Group's consolidated financial statements due to the application of the standard is dependent on judgments made in applying the standard, financial instruments held by the Group and macroeconomic variables.

For application of Korean IFRS 1109, the Group organized internal management process and completed accounting system adjustments, related to reporting of financial instruments. The Group performed an impact assessment to identify potential financial effects of applying Korean IFRS 1109. The assessment was performed based on current circumstances and available information as of December 31, 2017, and the results of the assessment are explained as below.

#### *Classification and Measurement of Financial Assets*

When implementing Korean IFRS 1109, the classification of financial assets will be driven by the Group's business model for managing the financial assets and contractual terms of cash flow. The following table shows the classification of financial assets measured subsequently at amortized cost, at fair value through other comprehensive income, and at fair value through profit or loss. If a hybrid contract contains a host that is a financial asset, an embedded

**LG Electronics**  
**Notes to the Consolidated Financial Statements**  
**December 31, 2017 and 2016**

derivative is not separated from the host, and the Group classifies the financial assets based on the entire hybrid contract.

<b>Business model for the contractual cash flows characteristics</b>	<b>Solely represent payments of principal and interest</b>	<b>All other</b>
<i>Hold the financial asset for the collection of the contractual cash flows</i>	Measured at amortized cost <sup>1</sup>	
<i>Hold the financial asset for the collection of the contractual cash flows and sale</i>	Measured at fair value through other comprehensive income <sup>1</sup>	Measured at fair value through profit or loss <sup>2</sup>
<i>Hold for sale and others</i>	Measured at fair value through profit or loss	

<sup>1</sup> A designation at fair value through profit or loss is allowed only if such designation mitigates an accounting mismatch (irrevocable).

<sup>2</sup> An equity investment that is not held for trading can be recorded in other comprehensive income (irrevocable).

As of December 31, 2017, the Group owns loans and receivables of ₩12,599,743 million, available-for-sale financial assets of ₩50,998 million, and held-to-maturity financial assets of ₩121 million.

The effect of implementation of Korean IFRS 1109 on classification and measurement of financial assets (excluding derivatives) held by the Group as of December 31, 2017, is as follows:

<i>(in millions of Korean won)</i>	<b>Classification in accordance with</b>		<b>Amount in accordance with</b>

## **LG Electronics**

### **Notes to the Consolidated Financial Statements**

#### **December 31, 2017 and 2016**

---

With implementation of Korean IFRS 1109, ₩16,078 million of available-for-sale financial assets as of December 31, 2017, are classified as financial assets at fair value through profit or loss. However, the change in fair value of those financial assets will not have any significant impact on the consolidated financial statements.

#### *Classification and Measurement of Financial Liabilities*

Korean IFRS 1109 requires the amount of the change in the liability's fair value attributable to changes in the credit risk to be recognized in other comprehensive income, unless this treatment of the credit risk component creates or enlarges a measurement mismatch. Amounts presented in other comprehensive income are not subsequently transferred to profit or loss.

As of December 31, 2017, the Group owns financial liabilities at fair value through profit or loss of ₩2,166 million. However, there is no financial liabilities designated at fair value through profit or loss in accordance to Korean IFRS 1109.

#### *Impairment of Financial Assets and Contract Assets*

The new impairment model requires the recognition of impairment provisions based on expected credit losses (ECL) rather than recognizing incurred credit losses only when there is an objective evidence of loss as is the case under Korean IFRS 1039. It applies to debt instruments measured at amortized cost or at fair value through other comprehensive income, lease receivables, contract assets, loan commitments and financial guarantee contracts.

Under Korean IFRS 1109 'expected credit loss' model, the Group can recognize expected credit loss earlier than the incurred loss model under Korean IFRS 1039 because the Group shall measure a loss allowance for a financial instrument at the amount equal to the 12-month or lifetime expected credit loss. Korean IFRS 1109 clarifies an exception that a loss allowance for lifetime expected credit losses is required for a financial instrument if contract assets or trade receivables are not considered to contain a significant financing component.

For trade receivables, contract assets, and lease receivables that contain a significant financing component, the Group measures the loss allowance at an amount equal to lifetime expected credit losses at initial recognition. The Group plans to use the simplified approach assuming that the credit risk on a financial instrument has not increased significantly since initial recognition if the financial instrument is determined to have a low credit risk at the reporting date. Based on the estimation using the simplified approach, the Group expects the application of Korean IFRS 1109 will not have significant impact on the loss allowance as of December 31, 2017.

#### *Hedge Accounting*

Hedge accounting mechanics required by Korean IFRS 1039 remains unchanged in Korean IFRS 1109, however, it changes from the complex and rule-based requirement in Korean IFRS 1039 for hedge accounting to principles-based approach that focuses on the Group's risk management practices. Korean IFRS 1109 allows more hedging instruments and hedged items to qualify for hedge accounting, and relaxes the hedge accounting requirement by removing

---

hedge effectiveness tests that are a quantitative (within range of 80-125%) prospective test and retrospective test to ensure that the hedging relationship has been highly effective throughout the reporting period and is expected to be highly effective.

When the Group first applies Korean IFRS 1109, the Group plans to choose as its accounting policy choice to continue to apply all of the hedge accounting requirements of Korean IFRS 1039. The Group expects the application of Korean IFRS 1109 will not have a significant impact on the accompanying consolidated financial statements.

#### - Korean IFRS 1115 *Revenue from Contracts with Customers*

Korean IFRS 1115 *Revenue from Contracts with Customers* issued in November, 2015 is effective for annual reporting periods beginning on or after January 1, 2018, and earlier application is permitted. This standard replaces Korean IFRS 1018 *Revenue*, Korean IFRS 1011 *Construction Contracts*, Interpretation 2031 *Revenue-Barter Transactions Involving Advertising Services*, Interpretation 2113 *Customer Loyalty Programs*, Interpretation 2115 *Agreements for the Construction of Real Estate*, and Interpretation 2118 *Transfers of assets from customers*. The Group must apply Korean IFRS 1115 *Revenue from Contracts with Customers* within annual reporting periods beginning on or after January 1, 2018, and will apply cumulative effect of the standard implementation by recognizing adjustments on the beginning balance of retained earnings (or other appropriate equity components) in the annual reporting period of implementation. In accordance with the standard, the Group will apply the standard retrospectively to prior reporting period for uncompleted contracts upon implementation date and apply the practical expedient with no restatement for completed contracts and other.

According to the current Korean IFRS 1018 revenue is recognized in the form of the sales of goods, the rendering of services, interest, royalties, dividends, construction contracts and others. However, according to Korean IFRS 1115, five-step model must be applied for revenue recognition:

- Identify the contracts with customers
- Identify the performance obligations in the contract
- Determine the transaction price
- Allocate the transaction price to the performance obligations, and
- Recognize revenue when the entity satisfies a performance obligation

As of December 31, 2017, for the preparation of implementing Korean IFRS 1115, the Group formed a task force team consisting of members from Accounting Division, with support from Information Strategy Division and other practical departments if necessary. The team analyzed the Group's profit system, organized relevant internal management processes, and established accounting system. The team periodically reports plan and progress of the implementation to the management.

In order to assess the impact of applying Korean IFRS 1115, the Group estimated the financial effects on the accompanying consolidated financial statements based on current circumstances and available information as of December 31, 2017. Expected financial effects on the

## **LG Electronics**

### **Notes to the Consolidated Financial Statements**

#### **December 31, 2017 and 2016**

---

accompanying consolidated financial statements by the major areas of Korean IFRS 1115 are as follows.

#### *Identification of performance obligation*

The Group primarily operates in selling home appliances, mobile communication, TV, monitors, vehicle components and others.

Based on the analysis of the financial effects of applying Korean IFRS 1115 for the fiscal year 2017, the Group expects that identifying performance obligation will not have a significant impact on the accompanying consolidated financial statements because the Group separates contracts to recognize revenue from service rendered, apart from sales of goods or products.

#### *Variable consideration*

The Group may provide promotional incentive to enhance customer's revenue or allow sales returns, which may cause variable consideration.

With implementation of Korean IFRS 1115, the Group estimates an amount of variable consideration by using the expected value which the Group expects to better predict the amount of consideration. The Group recognize revenue with transaction price including variable consideration only to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognized will not occur. The refund liability is measured at the amount of consideration received for which the Group does not expect to be entitled.

According to current Korean IFRS, the Group estimates an amount of promotional incentive and reverses sales and trade receivables. Instead, with implementation of Korean IFRS 1115, the Group will reverse sales but recognize a refund liability. The Group recognizes an amount of gross profit for products the Group expects to be returned as a return liability according to current Korean IFRS. While, with the implementation of Korean IFRS 1115, the Group will recognize expected amount of return as the refund liability and cost of sales as assets.

Based on the analysis of the financial effects of applying Korean IFRS 1115 for the fiscal year 2017, the Group's revenue is not expected to change when Korean IFRS 1115 is applied. Meanwhile, the Group's trade receivables, contract assets and contract liabilities are expected to increase by ₩501,419 million, ₩77,563 million and ₩578,982 million, respectively.

#### *Costs to fulfil a contract*

The Group's Vehicle Components segment is contracted with car makers for a supply of auto parts and supplies the auto parts to the customers through research and development. If the costs incurred in fulfilling a contract are directly related to the contracts, generate or enhance resources of the entity that will be used in satisfying performance obligations in the future, are expected to be recovered, and are not within the scope of other standards, it is recognized as an asset. Recognized assets are amortized on a systematic basis consistent with the way in which the related goods or services are provided.

**LG Electronics**  
**Notes to the Consolidated Financial Statements**  
**December 31, 2017 and 2016**

Based on the analysis of the financial effects of applying Korean IFRS 1115 for the fiscal year 2017, the Group's contract assets and retained earnings are expected to increase by ₩3,541 million and ₩3,541 million, respectively, when Korean IFRS 1115 is applied, as the costs to fulfil a contract will be capitalized.

*Warranties*

The Group determines standard warranty coverage periods per product and country considering warranty periods required by law and others when entering into contracts with customers for the sales of products. If the Group provides an extended warranty beyond the standard warranty coverage period or a customer has the option to purchase an additional warranty separately, the warranty is considered as distinct service according to Korean IFRS 1115.

Based on the analysis of the financial effects of applying Korean IFRS 1115 for the fiscal year 2017, the Group will have no significant impact because extended warranties beyond standard terms have been recognized as separate revenue.

*Others*

The Group has decided to classify and disclose contract assets and contract liabilities separately and analyzed those accounts that qualify contract assets and contract liabilities as defined in Korean IFRS 1115. Based on the analysis of the financial effects of applying Korean IFRS 1115 for the fiscal year 2017, trade receivables of ₩356,554 million and other receivables of ₩920 million are expected to be reclassified to contract assets by applying Korean IFRS 1115. Provisions of ₩36,510 million and other liabilities of ₩354,796 million are expected to be reclassified to contract liabilities by applying Korean IFRS 1115.

The effect of applying Korean IFRS 1109 and 1115 on the accompanying financial statements as of December 31, 2017, is as shown in the table below.

- Amendments to Korean IFRS 1102 *Share-based Payment*

Amendments to Korean IFRS 1102 clarifies accounting for a modification to the terms and conditions of a share-based payment that changes the classification of the transaction from cash-settled to equity-settled. And also, clarifies that the measurement approach should treat the terms and conditions of a cash-settled award in the same way as for an equity-settled award. The Group will apply the amendments for annual periods beginning on or after January 1, 2018 with early application permitted. The Group does not expect the amendments to have a significant impact on the accompanying consolidated financial statements.

### Notes to the Consolidated Financial Statements

#### December 31, 2017 and 2016

---

#### - Enactment of Interpretation 2122 *Foreign Currency Transaction and Advance Consideration*

According to the enactment, the date of the transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income (or part of it) is the date on which an entity initially recognizes the non-monetary asset or non-monetary liability arising from the payment or receipt of advance consideration. If there are multiple payments or receipts in advance, the entity shall determine a date of the transaction for each payment or receipt of advance consideration. The enactment will be effective for annual periods beginning on or after January 1, 2018, with early adoption permitted. The Group does not expect the enactment to have a significant impact on the accompanying consolidated financial statements.

#### - Enactment of Korean IFRS 1116 *Leases*

Korean IFRS 1116, *Leases* issued on May 22, 2017 is effective for annual periods beginning on or after January 1, 2019, with early adoption permitted. This standard will replace Korean IFRS 1017 *Leases*, Interpretation 2104 *Determining whether an Arrangement contains a Lease*, Interpretation 2015 *Operating Leases-Incentive*, and Interpretation 2027 *Evaluating the Substance of Transactions Involving the Legal Form of a Lease*.

At inception of a contract, the entity shall assess whether the contract is, or contains, a lease. Also, at the date of initial application, the entity shall assess whether the contract is, or contains, a lease in accordance with the standard. However, the entity will not need to reassess all contracts with applying the practical expedient because the entity elected to apply the practical expedient only to contracts entered before the date of initial application.

For a contract that is, or contains, a lease, the entity shall account for each lease component within the contract as a lease separately from non-lease components of the contract.

A lessee is required to recognize a right-of-use asset representing its right to use the underlying leased asset and a lease liability representing its obligation to make lease payments. The lessee may elect not to apply the requirements to short-term lease (a lease term of 12 months or less at the commencement date) and low value assets (e.g. underlying assets below \$5,000). In addition, as a practical expedient, the lessee may elect, by class of underlying asset, not to separate non-lease components from lease components, and instead account for each lease component and any associated non-lease components as a single lease component.

Lessor accounting treatment does not change significantly from Korean IFRS 1017 *Leases*.

#### *Lessee accounting*

A lessee shall apply this standard to its leases either:

- retrospectively to each prior reporting period presented applying Korean IFRS 1008 *Accounting Policies, Changes in Accounting Estimates and Errors* (Full retrospective application); or

- retrospectively with the cumulative effect of initially applying the standard recognized at the date of initial application.

The Group plans to apply Korean IFRS 1116 retrospectively with the cumulative effect of initially applying the standard as of January 1, 2019. The Group will not restate any comparative information. Instead, the cumulative effect of applying the standard will be recognized as an adjustment to the opening balance of retained earnings (or another component of equity, as appropriate) at the date of initial application.

The Group performed an impact assessment to identify potential financial effects of applying Korean IFRS 1116. The assessment was performed based on available information as of December 31, 2017 to identify effects on 2017 financial statements. The Group is analyzing the effects on the financial statements; however, it is difficult to provide reasonable estimates of financial effects until the analyses is complete.

The total minimum lease payment expected to be paid by the Group in relation to operating leases before discounted to their present value is ₩733,337 million. And, for a contract that is, or contains, a lease, the Group plans to account for each lease component within the contract as a lease separately from non-lease components of the contract.

#### *Lessor accounting*

The Group expects the impacts on the financial statements applying the new standard will not be significant as accounting for the Group, as a lessor, will not significantly change.

#### *Intermediate lessor accounting*

If the Group, as an intermediate lessor, classified the sublease as an operating lease before the date of initial application, the Group shall reclassify the sublease as a finance lease or an operating lease in accordance with Korean IFRS 1116. When the Group determines the sublease as a finance lease, the Group shall account the lease as a new lease entered on the date of initial application.

As of December 31, 2017, the sub-lease contract amounts to ₩14,710 million and the Group is analyzing the effects on the financial statements including classification of the sublease as an operating lease or a finance lease. However, it is difficult to provide reasonable estimates of financial effects until the analyses is complete.

#### *- Amendments to Korean IFRS 1040 Investment Property*

Korean IFRS 1040 clarifies that transfer to, or from, investment property, including property under construction, can only be made if there has been a change in use that is supported by evidence, and provides a list of circumstances as examples. These amendments will be effective for annual periods beginning on or after January 1, 2018, with early adoption permitted. The Group does not expect the amendment to have a significant impact on the accompanying consolidated financial statements.

#### Consolidation

The Group has prepared the consolidated financial statements in accordance with Korean IFRS 1110 *Consolidated Financial Statements*.

##### (a) Subsidiaries

Subsidiaries are all entities over which the Parent Company has control. The Parent Company controls the corresponding investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Consolidation of a subsidiary begins from the date the Parent Company obtains control of a subsidiary and ceases when the Parent Company loses control of the subsidiary.

The Group applies the acquisition method to account for business combinations. The consideration transferred is measured at the fair values of the assets transferred, and identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are initially measured at their fair values at the acquisition date. The Group recognizes any non-controlling interest in the acquiree on an acquisition-by-acquisition basis in the event of liquidation, either at fair value or at the non-controlling interest's proportionate share of the recognized amounts of acquiree's identifiable net assets. All other non-controlling interests are measured at their acquisition-date fair values, unless another measurement basis is required by IFRSs. Acquisition-related costs are expensed as incurred.

Goodwill is recognized as the excess of the aggregate of the consideration transferred, the amount of any non-controlling interest in the acquiree, and the acquisition-date fair value of the acquirer's previously held equity interest in the acquiree over the identifiable net assets acquired. If this consideration is lower than the fair value of the net assets of the subsidiary acquired, the difference is recognized in profit or loss.

Balances of receivables and payables, income and expenses and unrealized gains on transactions between the Group subsidiaries are eliminated. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

In transactions with non-controlling interests, which do not result in loss of control, the Group recognizes directly in equity any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received, and attribute it to the owners of the parent.

If the Group loses control of a subsidiary, any investment continuously retained in the subsidiary is re-measured at its fair value at the date when control is lost and any resulting differences are recognized in profit or loss.

##### (b) Associates

Associates are all entities over which the Group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting and are initially recognized at

### **Notes to the Consolidated Financial Statements**

#### **December 31, 2017 and 2016**

---

cost. The Group's investment in associates includes goodwill identified at acquisition, net of any accumulated impairment loss (Note 13).

The Group's share of its associates' post-acquisition profits or losses is recognized in the consolidated statements of profit or loss, and its share of post-acquisition movements in reserves is recognized in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any unsecured receivables, the Group does not recognize further losses, unless it has incurred obligations or made payments on behalf of the associate.

Unrealized gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the Group. Dilution gains and losses arising in investments in associates are recognized in the consolidated statements of profit or loss.

#### (c) Joint Arrangements

A joint arrangement of which two or more parties have joint control is classified as either a joint operation or a joint venture. A joint operator has rights to the assets, and obligations for the liabilities, relating to the joint operation and recognizes the assets, liabilities, revenues and expenses relating to its interest in a joint operation. A joint venture has rights to the net assets relating to the joint venture and accounts for that investment using the equity method.

#### (d) Transactions with non-controlling interests

The Group applies a policy of treating transactions with non-controlling interests as transactions with owners of the Group. The difference between any consideration paid and the relevant share of the carrying value of net assets of the subsidiary is recorded in equity. Gains and losses on disposal of non-controlling interests are also recognized in other components of equity.

#### (e) Business Combinations

The acquisition method of accounting is used to account for the acquisition of subsidiaries by the Group. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange. The consideration transferred in a business combination includes fair values of the assets and liabilities from arrangements for contingent payments. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. The Group measures non-controlling interests in the acquiree that entitle their holders to a proportionate share of the entity's net assets in the event of liquidation, on a case by case basis, at the proportionate share of the acquiree's identifiable net assets or fair value. All other components of non-controlling interests are measured at fair values, unless another measurement basis is required by IFRSs. Acquisition-related costs are recognized as expenses in the periods in

which the costs are incurred.

In case of business combination achieved in stages, previously held equity interest in the acquiree is re-measured to fair value and a gain or loss is recognized in the consolidated statements of profit or loss.

The excess of the aggregate of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of the Group's previously held equity interest in the acquiree over the net identifiable assets at the date of acquisition is recorded as goodwill (Note 2). If the cost of the acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognized directly in the consolidated statements of profit or loss.

#### **Segment Reporting**

Operating segments are established on the basis of business divisions whose internal reporting is provided to the chief operating decision-maker who is the chief executive officer. Segmental disclosures are disclosed in Note 4 in accordance with Korean IFRS 1108 *Operating Segment*.

#### **Foreign Currency Translation**

##### (a) Functional and presentation currency

Items included in the financial statements of each of the Group's companies are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The consolidated financial statements are presented in 'Korean won', which is the Parent Company's functional and presentation currency.

##### (b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation in case of items subject to re-measurement. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies, are recognized in the consolidated statements of profit or loss, except cash flow hedges qualifying to be recognized in other comprehensive income.

Changes in the fair value of monetary securities denominated in foreign currency classified as available-for-sale are analysed between translation differences resulting from changes in the amortized cost of the security and other changes in the carrying amount of the security. Translation differences related to changes in amortized cost are recognized in profit or loss, and other changes in carrying amount are recognized in other comprehensive income.

Translation differences on non-monetary financial assets and liabilities, such as equities held at fair value through profit or loss, are recognized in the consolidated statements of profit or loss as part of the fair value gain or loss. Translation differences on non-monetary financial assets, such as equities classified as available-for-sale, are recognized in other comprehensive income.

## **LG Electronics**

### **Notes to the Consolidated Financial Statements**

#### **December 31, 2017 and 2016**

---

(c) Translation into presentation currency

The results and financial position of all Group companies whose functional currency is different from the presentation currency are translated into the presentation currency as follows:

- i) Assets and liabilities are translated at the closing rate at the end of the reporting period;
- ii) Income and expenses are translated at monthly average exchange rates; and
- iii) All resulting exchange differences from above i) and ii) are recognized in other comprehensive income.

When the Parent Company ceases to control a subsidiary, exchange differences that were recorded in equity are recognized in the consolidated statements of profit or loss as part of the gain or loss on sale.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate at the end of the reporting period.

#### **Cash and Cash Equivalents**

Cash and cash equivalents include cash on hand, deposits at banks, and other short-term highly liquid investments with original maturities of three months or less.

#### **Financial Instruments**

##### *Classification*

The Group classifies its financial instruments in the following categories: financial assets and liabilities at fair value through profit or loss, loans and receivables, available-for-sale financial assets, held-to-maturity investments, and other financial liabilities at amortized cost, derivatives for hedging purpose, and financial guarantee liabilities. The classification depends on the purpose for which the financial instruments were acquired and the nature of the instruments. The Group determines the classification of financial instruments at initial recognition.

(a) Financial assets and liabilities at fair value through profit or loss

Financial assets and liabilities at fair value through profit or loss are financial instruments held for trading. Financial assets and liabilities are classified in this category if acquired or incurred principally for the purpose of selling or repurchasing it in the near term. Derivatives that are not designated as hedges and financial instruments having embedded derivatives are also included in this category. Financial assets and liabilities at fair value through profit or loss of the Group are categorized in other financial assets and other financial liabilities on the consolidated statements of financial position, respectively.

(b) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for those with

## **LG Electronics**

### **Notes to the Consolidated Financial Statements**

---

maturities greater than 12 months after the end of the reporting period. These are classified as non-current assets. The Group's loans and receivables comprise cash and cash equivalents, deposits held by financial institutions, trade receivables and other receivables.

(c) Available-for-sale financial assets

Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. They are included in other financial assets as non-current assets unless their maturities are less than 12 months or management intends to dispose of them within 12 months of the end of the reporting period.

(d) Held-to-maturity financial assets

Held-to-maturity financial assets are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Group's management has the positive intention and ability to hold to maturity and are classified as other financial assets in the consolidated statements of financial position. Held-to-maturity financial assets are included in non-current assets, except for those with maturities less than 12 months after the end of the reporting period, which are classified as current assets.

(e) Financial liabilities measured at amortized cost

Non-derivative financial liabilities are included in financial liabilities at amortized cost, except for financial liabilities at fair value through profit or loss. When a transfer of financial assets does not qualify for derecognition, associated financial liabilities are classified as the same category of the financial assets, and the transferred assets are continuously recognized and a financial liability is measured as the consideration received. Financial liabilities measured at amortized cost are included in non-current liabilities, except for maturities less than 12 months after the end of the reporting period, which are classified as current liabilities

(f) Other

Derivatives for hedging purpose and financial guarantee liabilities are grouped in other financial assets or other financial liabilities, and are accounted in accordance with Derivative Financial Instruments and Financial Guarantee Contracts in Note 2.

#### *Recognition and Measurement*

Regular purchases and sales of financial assets are recognized on the trade date. Investments are initially recognized at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. Financial assets carried at fair value through profit or loss is initially recognized at fair value, and transaction costs are expensed in the consolidated statements of profit or loss. Financial assets are derecognized when the rights to receive cash flows from the investments have expired or have been transferred and the Group has transferred substantially all risks and rewards of ownership. Available-for-sale financial assets and financial assets at fair value through profit or loss are subsequently carried at fair value. Loans and receivables and held-to-maturity financial assets are subsequently carried at amortized cost using the effective interest rate method.

## **LG Electronics**

### **Notes to the Consolidated Financial Statements**

#### **December 31, 2017 and 2016**

---

Gains or losses arising from changes in the fair value of the financial assets carried at fair value through profit or loss are presented in the consolidated statements of profit or loss within other non-operating income and expenses in the period in which they arise. However, gains or losses on settlement of derivatives relative to borrowings are presented in financial income and expenses. The Group recognizes a dividend from financial assets at fair value through profit or loss in the consolidated statements of profit or loss within non-operating income when its right to receive the dividend is established.

Changes in fair value of monetary and non-monetary securities classified as available-for-sale financial assets are recognized in other comprehensive income. When securities classified as available-for-sale are sold or impaired, the accumulated fair value adjustments recognized in equity are reported in the consolidated statements of profit or loss as other non-operating income and expenses.

Interest on available-for-sale securities and held-to-maturity financial assets are calculated using the effective interest method and is recognized in the consolidated statements of profit or loss as part of financial income. Dividends on available-for-sale equity instruments are recognized in the consolidated statements of profit or loss as part of other non-operating income when the Group's right to receive payments is established.

#### *Offsetting*

Financial assets and liabilities are offset and the net amount reported in the consolidated statements of financial position when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

#### *Derecognition*

Financial assets are derecognized when the contractual rights to receive cash from the investments have expired or have been transferred and the Group has substantially transferred all risks and rewards of ownership or when the risk and rewards of ownership of transferred assets have not been substantially retained or transferred and the Group has not retained control over these assets.

Trade receivable discounted and collaterals on factoring transactions such as trade receivable and others that do not qualify for the requirement above are not derecognized because the Group retains substantially all the risks and rewards due to recourse conditions in case of debtors' default on obligations and others. Financial liabilities associated with such transactions are categorized in borrowings in the consolidated statements of financial position.

#### **Impairment of Financial Assets**

The Group assesses at the end of each reporting period whether there is objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or a group of financial assets that can be reliably estimated.

## **LG Electronics**

### **Notes to the Consolidated Financial Statements**

#### **December 31, 2017 and 2016**

---

The criteria that the Group uses to determine that there is objective evidence of an impairment loss include:

- Significant financial difficulty of the issuer or obligor;
- A breach of contract, such as a default or delinquency in interest or principal payments;
- For economic or legal reasons relating to the borrower's financial difficulty, granting to the borrower a concession that the lender would not otherwise consider;
- It becomes probable that the borrower will enter bankruptcy or other financial reorganization;
- The disappearance of an active market for that financial asset because of financial difficulties; or
- Observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of financial assets since the initial recognition of those assets, even though the decrease cannot be identified with the individual financial assets in the portfolio, including:
  - (i) adverse changes in the payment status of borrowers in the portfolio;
  - (ii) national or local economic conditions that correlate with defaults on the assets in the portfolio.

(a) Loans and receivables and held-to-maturity financial assets (measured at amortized cost)

The amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced and the amount of the loss is recognized in the consolidated statements of profit or loss. Impairment of assets measured at amortized cost is presented as a deduction in an allowance account. Impairment of other financial assets is directly deducted from their carrying amount. The Group writes off financial assets when the assets are determined to be no longer recoverable. In case of financial assets with variable interest rates, impairment losses are recognized with current effective interest rates in accordance with the contract.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized (such as an improvement in the debtor's credit rating), the reversal of the previously recognized impairment loss is recognized directly in the consolidated statements of profit or loss.

(b) Available-for-sale financial assets

The Group assesses at the end of each reporting period whether there is objective evidence that a financial asset or a group of financial assets is impaired. For debt securities classified as available-for-sale, the Group uses the criteria referred to in (a) above. In the case of equity investments classified as available-for-sale, a significant or prolonged decline in the fair value of the security below its cost is also evidence that the asset is impaired. If any such evidence exists for available-for-sale financial assets, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in profit or loss – is removed from equity and recognized in the consolidated statements of profit or loss. Impairment losses recognized in the consolidated statements of profit or loss on equity

---

instruments are not reversed through the consolidated statements of profit or loss. If, in a subsequent period, the fair value of a debt instrument classified as available-for-sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in profit or loss, the impairment loss is reversed through the consolidated statements of profit or loss.

#### **Derivative Financial Instruments**

Derivatives are initially recognized at fair value on the date a derivative contract is entered into and are subsequently re-measured at their fair value. The resulting gain or loss that does not meet the conditions for hedge accounting is recognized in other non-operating income and expenses or financial income and expenses according to the nature of transactions.

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognized in other comprehensive income. The gain or loss relating to the ineffective portion is recognized immediately in the consolidated statements of profit or loss within other non-operating income and expenses or financial income and expenses.

Amounts accumulated in equity are reclassified to profit or loss in the periods when the hedged item affects profit or loss. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in equity is immediately transferred to the consolidated statements of profit or loss within other non-operating income and expenses or financial income and expenses.

#### **Trade Receivables**

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. If collection is expected in one year or less, they are classified as current assets. If not, they are presented as non-current assets. Trade receivables are recognized initially at fair value, less allowance for doubtful debts.

#### **Inventories**

Inventories are stated at the lower of cost and net realizable value. Cost is determined using the weighted-average method, except for inventories in-transit which is determined using the specific identification method. The cost of finished goods and work-in-process comprises raw materials, direct labour, other direct costs and related production overheads (based on normal operating capacity). The Group periodically reviews a possibility of the significant changes in net realizable value of inventories from not in use, decrease in market value and obsolescence, and recognizes as Allowances for Valuation of Inventories. Net realizable value is the estimated selling price in the ordinary course of business, less applicable selling expenses.

#### **Assets Held for Sale and Discontinued Operations**

Non-current assets (or disposal groups) are classified as assets held for sale when their carrying amount is to be recovered principally through a sale transaction and a sale is considered highly probable. They are stated at the lower of carrying amount or fair value less costs to sell.

# LG Electronics

## Notes to the Consolidated Financial Statements

### December 31, 2017 and 2016

---

When a component of discontinued operations or a component of the Group representing a separate major line of business or geographical area of operation has been disposed of, or is subject to a sale plan involving loss of control of a subsidiary, the Group discloses in the consolidated statements of profit or loss the post-tax profit or loss of discontinued operations and the post-tax gain or loss recognized on the measurement to fair value less costs to sell or on the disposal of the assets or disposal groups constituting the discontinued operation. The net cash flows attributable to the operating, investing and financing activities of discontinued operations are presented in the notes to the consolidated financial statements.

#### **Property, Plant and Equipment**

All property, plant and equipment are stated at historical cost less depreciation and impairment. Historical cost includes expenditures directly attribute to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. All other repairs and maintenance are charged to the consolidated statements of profit or loss during the financial period in which they are incurred.

Land is not depreciated. Depreciation on other assets is calculated using the straight-line method to allocate the difference between their acquisition cost and their residual values over their major estimated useful lives, as follows:

Buildings and Structures	20, 40 years
Machinery	5, 10 years
Tools	5 years
Equipment	5 years
Other	5 years

The assets' depreciation method, residual values, and useful lives are reviewed, and adjusted if appropriate, at each financial year-end. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognized within other non-operating income and expenses in the consolidated statements of profit or loss.

#### **Borrowing Costs**

Borrowing costs incurred in the acquisition or construction of a qualifying asset are capitalized in the period when it is prepared for its intended use, and investment income earned on the temporary investment of borrowings made specifically for the purpose of obtaining a qualifying asset is deducted from the borrowing costs eligible for capitalization during the period. Other borrowing costs are recognized as expenses for the period in which they are incurred.

# **LG Electronics**

## **Notes to the Consolidated Financial Statements**

### **December 31, 2017 and 2016**

---

#### **Government Grants**

Grants from a government are recognized at their fair value where there is a reasonable assurance that the grant will be received and the Group will comply with all attached conditions.

Government grants relating to income are deferred and recognized in the consolidated statements of profit or loss over the period necessary to match them with the costs that they are intended to compensate.

Government grants relating to property, plant and equipment are presented as a deduction of related assets and are credited to depreciation over the expected lives of the related assets.

#### **Intangible Assets**

##### **(a) Goodwill**

Goodwill represents the excess of the aggregate of the consideration transferred, and the acquisition-date fair value of the Group's previously held equity interest in the acquiree over the net identifiable assets at the date of acquisition. Goodwill is tested at least annually for impairment and carried at cost less accumulated impairment losses. Impairment losses on goodwill are not reversed.

##### **(b) Industrial property rights**

Industrial property rights are shown at historical cost. Industrial property rights have a finite useful life and are carried at cost less accumulated amortization. Amortization is calculated using the straight-line method to allocate the cost of industrial property rights over their estimated useful lives of ten years.

##### **(c) Development costs**

New product development project is processed through product planning, design planning, product design, mass production verification, production readiness approval, and shipment approval. The Group generally recognizes expenditures incurred during and after the product design phase as development costs, and expenditures incurred before the phase are recognized as expenses within research and development expenses. Costs recognized as development costs are controlled by the Group and directly attributable to identifiable development projects, and meet all the following criteria.

- It is technically feasible to complete the intangible asset so that it will be available for use;
- Management intends to complete the intangible asset and use or sell it;
- There is the ability to use or sell the intangible asset;
- It can be demonstrated how the intangible asset will generate probable future economic benefits;
- Adequate technical, financial and other resources to complete the development for using and selling the intangible asset are available; and
- The expenditure attributable to the intangible asset during its development can be reliably measured.

## **LG Electronics**

### **Notes to the Consolidated Financial Statements**

#### **December 31, 2017 and 2016**

---

Amortization of development costs based on the straight-line method over their estimated useful lives of one to three years begins at the commencement of the commercial production of the related products or use of the related technology.

#### **(d) Membership**

Membership rights are regarded as intangible assets with an indefinite useful life and are not amortized because there is no foreseeable limit to the period over which the assets are expected to be utilized. All membership rights are tested annually for impairment and stated at acquisition cost less accumulated impairment.

#### **(e) Other intangible assets**

Other intangible assets such as customer relationships, values of technics and software which meet the definition of an intangible asset are amortized using the straight-line method over their estimated useful lives of five to ten years.

### **Investment Property**

Investment property is held to earn rentals or for capital appreciation or both. Investment property is measured initially at its cost including transaction costs incurred in acquiring the asset. After recognition as an asset, investment property is carried at its cost less any accumulated depreciation and impairment losses.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. All other repairs and maintenance are charged to the consolidated statements of profit or loss during the financial period in which they are incurred.

Land held for investment is not depreciated. Investment property, except for land, is depreciated using the straight-line method over their estimated useful lives (representative useful lives: 20 years, 40 years).

The depreciation method, the residual value and the useful life of an asset are reviewed at each financial year end and, if management judges that previous estimates should be adjusted, the change is accounted for as a change in an accounting estimate.

### **Impairment of Non-Financial Assets**

Goodwill and intangible assets that have an indefinite useful life are not subject to amortization and are tested at least annually for impairment. At the end of each reporting period, assets that are subject to amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized as profit or loss for the year for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and its value in use. The value in use is measured by determining the estimated pre-tax cash flows based

on past performance and its expectations of market development, and applying the pre-tax discount rates that reflect specific risks relating to the relevant operating segments. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets other than goodwill that suffered impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

#### Trade Payables

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Trade payables are classified as current liabilities if payment is due within one year or less. If not, they are presented as non-current liabilities. Trade payables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method. Current trade payables measured initially at fair value are not significantly different from amortized cost using the effective interest method.

#### Borrowings

Borrowings are recognized initially at fair value, net of transaction costs incurred. Borrowings are subsequently carried at amortized cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognized in the consolidated statements of profit or loss over the period of the borrowings using the effective interest method. The Group classifies the liability as current as long as it does not have an unconditional right to defer its settlement over 12 months after the end of the reporting period.

#### Financial Guarantee Contracts

Financial guarantee contracts are contracts that require the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due, in accordance with the original or modified terms of a debt instrument. Financial guarantees contracts provided by the Group are initially measured at fair value on the date the guarantee was given. Subsequent to initial recognition, the Group's liabilities under such guarantees are measured at the higher of the amounts below and recognized as other financial liabilities:

- The amount determined in accordance with Korean IFRS 1037 *Provisions, Contingent Liabilities and Contingent Assets*; or
- The initial amount, less accumulated amortization recognized in accordance with Korean IFRS 1018 *Revenue*.

#### Provisions

Provisions are recognized when the Group has a present legal or constructive obligation as a result of past events and an outflow of resources required to settle the obligation is probable and can be reliably estimated. The Group recognizes a warranty provision, a sales return provision, a provision for restoration, and a provision for litigation.

A warranty provision is accrued for the estimated costs of future warranty claims based on historical experience. Sales return provision is for the estimated sales returns based on historical results.

### **Notes to the Consolidated Financial Statements**

#### **December 31, 2017 and 2016**

---

Where the Group, as a tenant, is required to restore its leased assets to their original state at the end of the lease-term, the Group recognizes the present value of the estimated cost of restoration as a provision for restoration. When there is a probability that an outflow of economic benefits will occur from litigation or disputes, and whose amount is reasonably estimable, a corresponding amount of provision is recognized as a provision for litigation in the consolidated financial statements.

A contingent liability is disclosed (Note 34) when;

- a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity; or
- a present obligation that arises from past events but is not recognized because: it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or the amount of the obligation cannot be measured with sufficient reliability.

#### **Current and Deferred Income Tax**

The tax expense for the year comprises current and deferred tax. Tax is recognized in the consolidated statements of profit or loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case the tax is also recognized in other comprehensive income or directly in equity, respectively.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the countries where the Group operates and generates taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is recognized on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. It represents future tax consequences that will arise when recovering or settling the carrying amount of its assets and liabilities. However, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor tax profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences can be utilized.

Deferred income tax liabilities are provided on taxable temporary differences arising on investments in subsidiaries, associates and joint ventures, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax assets are recognized only to the extent that it is probable that the deductible temporary difference will reverse in the foreseeable future and taxable profit will be available against which the temporary difference can be utilized.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the taxable entity or different taxable entities where there is an intention either to settle the balances on a net basis.

#### **Employee Benefits**

##### **(a) Post-employment benefits**

The Group operates various pension schemes. The schemes are generally funded through payments to insurance companies or trustee-administered funds, determined by periodic actuarial calculations. The Group operates both defined contribution and defined benefit plans.

A defined contribution plan is a pension plan under which the Group pays fixed contributions into a separate fund. The Group has no legal or constructive obligations to pay further contributions even if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods. For the defined contribution plan, the Group pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. The contributions are recognized as employee benefit expenses when an employee has rendered service. Prepaid contributions are recognized as an asset to the extent that a cash refund or a reduction in the future payments is available.

A defined benefit plan is a pension plan that is not a defined contribution plan. Typically defined benefit plans define an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and salary levels. The liability recognized in the statement of financial position in respect of defined benefit pension plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by independent qualified actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds and that have terms to maturity approximating to the terms of the related pension obligation. The remeasurements of the net defined benefit liabilities are recognized in other comprehensive income.

If any plan amendments, curtailments, or settlements occur, past service costs or any gains or losses on settlement are recognized as profit or loss for the year.

##### **(b) Other long-term employee benefits**

The Group provides other long-term employee benefits to their employees. The entitlement to these benefits is usually conditional on the employee working more than ten years. The expected costs of these benefits are accrued over the period of employment using the same accounting methodology as used for defined benefit pension plans. The Group recognizes past service cost, net interest on other long-term employee benefits and remeasurements as profit or loss for the year. These benefits are calculated annually by independent qualified actuaries.

#### (c) Termination benefits

Termination benefits are payable when employment is terminated by the Group before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Group recognizes termination benefits at the earlier of the following dates: when the entity can no longer withdraw the offer of those benefits or when the entity recognizes costs for a restructuring.

#### **Share Capital**

Ordinary shares and preferred shares without mandatory dividends or the obligation to be repaid are classified as equity.

Where the Parent Company purchases its own ordinary shares, the consideration paid, including any directly attributable incremental costs, is deducted from equity attributable to owners of the Parent Company until the shares are cancelled or reissued. Where such treasury shares are subsequently reissued, any consideration received is included in equity attributable to owners of the Parent Company.

#### **Revenue Recognition**

Revenue comprises the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of the Group's activities. Revenue is shown net of value-added tax, returns, rebates and discounts.

The Group recognizes revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the entity and when specific criteria have been met for each of the Group's activities as described below. The revenue can be reliably measured only when any contingency related to sales is resolved. The Group bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.

#### (a) Sales of goods

The Group manufactures and sells home appliances, mobile communication, TV, monitors, vehicle components and others. Sales of goods are recognized when the Group has delivered products to the customer. Delivery does not occur until the products have been shipped to the specified location, the risks of obsolescence and loss have been transferred to the customer, and either the customer has accepted the products in accordance with the sales contract, the acceptance provisions have lapsed, or the Group has objective evidence that all criteria for acceptance have been satisfied.

The products are often sold with volume discounts and customers have a right to return faulty products. Accumulated experience is used to estimate and provide for the discounts and returns. The volume discounts are assessed based on anticipated annual purchases. The Group recognizes provisions for product warranties and sales returns based on reasonable expectation reflecting warranty obligation and sales return rates incurred historically.

(b) Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with such a transaction is recognized by reference to the percentage of completion of the services. Any changes in expected revenue, cost or the amount of services rendered are accounted for as changes in estimates. These changes in estimates may bring adjustments to the expected revenue or cost which is recognized in the statement of profit or loss in the period in which the management recognizes the changes in circumstances.

(c) Royalty income

Royalty income is recognized on an accrual basis in accordance with the substance of the relevant agreements.

(d) Other income

Income from rental, lease and others is recognized in income on a straight-line basis over the period of the contract.

(e) Interest income

Interest income is recognized using the effective interest method. When receivables are impaired, the Group reduces the carrying amount to its recoverable amount and continues unwinding the discount as interest income. Interest income on impaired receivables is recognized using the original effective interest rate.

(f) Dividend income

Dividend income is recognized when the right to receive payment is established.

#### **Leases**

A lease is an agreement whereby the lessor conveys to the lessee in return for a payment or series of payments the right to use an asset for an agreed period of time.

(a) Lessees

The Group classifies leases that do not transfer substantially all the risks and rewards of ownership incidental to ownership of assets as operating leases. Payments made under operating leases are charged to the consolidated statements of profit or loss on a straight-line basis over the period of the lease.

The Group classifies leases that transfer substantially all the risks and rewards of ownership incidental to ownership of assets as finance leases. Finance leases are capitalized as financial lease assets and liabilities at the lease's commencement at the lower of the fair value of the leased property and the present value of the minimum lease payments.

#### **(b) Lessors**

The Group classifies a lease that transfers substantially all the risks and rewards incidental to ownership of an asset at inception of the lease as a finance lease. A lease other than a finance lease is classified as an operating lease.

Lease income from operating lease is recognized on a straight-line basis over the lease term. Initial direct costs incurred by lessors in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized as an expense over the lease term on the same basis as the lease income.

#### **Dividend Distribution**

A dividend liability is recognized in the consolidated financial statements when the dividends are approved by the shareholders at their general meeting.

#### **Earnings per Share**

Basic earnings per share is calculated by dividing the profit attributable to shareholders of the Parent Company by the weighted average number of shares issued excluding shares purchased by the Parent Company that are held as treasury shares. Preferred shares have a right to participate in the profits of the Parent Company. These participation rights have been considered in presenting the EPS for ordinary shares and preferred shares.

#### **Greenhouse Gas Emissions Rights (Allowances) and Obligations**

Emission rights are defined as allowed amount of emissions that can be released, allocated by the Korean government as 'Act on the Allocation and Trading of Greenhouse-Gas Emission Permits' takes effect. Emission rights that are received free of charge from the government are measured at zero, while the rights purchased additionally from trading market such as the Korea Exchange are measured at acquisition cost. Emission rights are subsequently stated as acquisition cost less accumulated impairment loss. Emission liabilities are measured as the sum of the carrying amount of emission rights to be delivered to the government to settle the obligation for emissions occurred and expected expenditure required at the end of reporting period for any excess emissions. The emission rights and liabilities are classified as intangible assets and provisions, respectively, in the consolidated statement of financial position.

### **3. Critical Accounting Estimates and Judgments**

The estimates and judgments are continuously evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable.

#### **Critical Accounting Estimates and Assumptions**

The Group makes estimates and assumptions concerning the future. Estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The

resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing adjustments to the carrying amounts of assets and liabilities after the end of the reporting period are addressed below.

#### (a) Revenue Recognition

The Group recognizes revenue using the percentage of completion method for the rendering of service such as installation. When using the percentage of completion method, revenue shall be recognized in accordance with the progress of the transaction. It is calculated based on potential economic benefits and the estimated cost for the completion of the transaction. The factors for the estimation of revenue may vary.

#### (b) Impairment of Goodwill

The Group tests goodwill regularly for impairment. The recoverable amounts of cash-generating units have been determined based on fair value less costs of disposal or value in use calculations. These calculations require the use of estimates.

#### (c) Income Taxes

The Group recognizes assets and liabilities for anticipated tax audit issues based on the best estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred income tax assets and liabilities in the period in which such determination is made.

#### (d) Fair Value of Financial Instruments

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The Group uses its judgment to select a variety of methods and makes assumptions that are mainly based on market conditions existing at the end of each reporting period.

#### (e) Provisions

The Group recognizes provisions for product warranties and sales returns based on their historical data.

#### (f) Net Defined Benefit Liabilities

The present value of the defined benefit liability depends on various factors that are determined on an actuarial basis. The assumptions used in determining the net cost (income) for pensions include the discount rate, which is the interest rate that is used to determine the present value of estimated future cash outflows expected to be required to settle the defined benefit liability. In determining the appropriate discount rate, the Group considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability. Other key assumptions for defined benefit liability are based on current market conditions.

**Notes to the Consolidated Financial Statements**  
**December 31, 2017 and 2016**

**Significant Judgment on Accounting Policies Adopted by the Group**

In order to determine the Group's de-facto control, the Group considers the size of the Group's holding of voting rights relative to the size and dispersion of holdings of the other vote holders and additional facts and circumstances including voting patterns at previous shareholders' meetings.

**4. Segment Information**

The segments of the Group are strategic business divisions providing different products and services. They are reported separately because each business division requires different technologies and marketing strategies. The main products of each business division are as follows and the comparative information is presented in conformity with the same classification in the current period.

Operating segment	Type of products
Home Appliance & Air Solution (H&A)	Refrigerators, Washing machines, Residential and commercial air conditioners, Microwaves, Vacuum cleaners and others
Home Entertainment (HE)	TVs, Monitors, PCs, Audio, Video and others

- (d) The allowance for doubtful accounts is recognized based on aging analysis and historical experience.
- (e) The Group classifies individually impaired receivables as defaulted receivables if the receivables are impaired due to reasons including bankruptcy and insolvency of the debtors. Defaulted receivables are classified into two categories of rehabilitation related receivables and other defaulted receivables. The Group performs impairment test on rehabilitation related receivables based on expected repayment amount and recognizes impairment loss on other defaulted receivables based on types and values of collaterals.
- (f) Movements in allowance for doubtful accounts for the years ended December 31, 2017 and 2016, are as follows:

- ii) The listed equity securities among the above equity securities are measured using quoted prices in active markets. However, the unlisted equity securities are measured at cost as they are mostly in the beginning stages of their business and their fair values cannot be reliably measured.
- iii) During the year ended December 31, 2017, the unlisted equity securities amounting to ₩2,469 million (2016: ₩2,095 million), whose fair value could not be measured reliably and therefore measured at cost, have been derecognized as a result of disposal or return of capital investments. Accordingly, a gain on disposal amounting to ₩9,157 million (2016: ₩318 million) was recognized as other non-operating income for the year ended December 31, 2017.
- iv) For the years ended December 31, 2017 and 2016, there is no accumulated other comprehensive income recognized for listed equity securities that was reclassified to impairment loss.
- v) During the year ended December 31, 2017, the Group disposed the unlisted debt securities that carrying amount is not significant, and gain on disposal amounting to ₩52 million (2016: ₩50 million) was recognized as other non-operating income.
- vi) There is no available-for-sale financial assets held for sale as of December 31, 2017.

<sup>2</sup> Divisions in Innotek and other segments, managed as separate cash-generating units (hereafter 'CGU'), have been tested for impairment as accumulation of operating losses has been experienced and a future downturn in sales is expected. And impairment losses of ₩5,054 million on Innotek (2016: ₩42,733 million) and ₩42,554 million on other segment (2016: ₩2,937 million) were recognized as other non-operating expenses. This impairment loss was allocated to machinery, tools, and others. The recoverable amount was measured at the higher of fair value less costs of disposal or value in use, and the fair value amount is categorized within 'level 3' of fair value hierarchy.

<sup>1</sup> Divisions in Innotek and other segments, managed as separate cash-generating units (hereafter 'CGU'), have been tested for impairment as accumulation of operating losses has been experienced and a future downturn in sales is expected. And impairment loss of ₩10,855 million (Innotek: ₩4,267 million, other segments: ₩418 million) was recognized as other non-operating expenses. This impairment loss was allocated to industrial property rights, development costs, and others since there was no goodwill allocated to the CGU. The recoverable amount was measured at the higher of fair value less costs of disposal or value in use, and the fair value amount is categorized within 'level 3' of fair value hierarchy.

<sup>2</sup> As a result of impairment test for all projects related to development costs, an impairment loss of development costs relating to certain projects determined to have low business value, was recognized as other non-operating expenses.

<i>(in millions of Korean won)</i>	<b>2017</b>	<b>2016</b>
Capitalized borrowing costs	282	85
Capitalization rate (%)	3.13	3.51

- (e) There are no intangible assets pledged as collateral for borrowings as of December 31, 2017.

- (f) Impairment tests for goodwill

- i) Goodwill is allocated among the Group's cash generating units (CGUs) based on operating segments. As of December 31, 2017, an operating segment-level summary of goodwill allocation is presented below:

<i>(in millions of Korean won)</i>	<b>H&amp;A</b>	<b>MC</b>	<b>Other</b>	<b>Total</b>
Goodwill	64,531	29,894	50,891	145,316

- ii) The recoverable amount of CGUs has been determined based on value in use calculations. These calculations use pre-tax cash flow projections based on financial budgets approved by the management covering a five-year period. Cash flows beyond the five-year period are extrapolated using the estimated growth rate which does not exceed the long-term average growth rate for the electronic industry in which the Group operated.
- iii) Management determined the estimated pre-tax cash flow based on past performance and its expectations of market development. Value in use is measured by applying the pre-tax discount rates reflecting specific risks relating to the relevant operating segments. Discount rates and nominal long-term growth rates used for calculating the value in use of major operating segments are as follows:

	<b>H&amp;A</b>	<b>MC</b>	<b>Other</b>
Discount rates	11.9%	13.7%	11.0%
Nominal long-term growth rates	2.5%	0.0%	1.0%

- (g) The sensitivity analysis of the defined benefit obligation to changes in principal assumptions as of December 31, 2017, is as follows:

<i>(in millions of Korean won)</i>	<b>1%p increase</b>	<b>1%p decrease</b>
Discount rate	(234,846)	270,480
Expected salary growth rate	258,755	(237,126)

The above sensitivity analysis are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. The sensitivity of the defined benefit obligation to changes in principal actuarial assumptions is calculated using the projected unit credit method, the same method applied when calculating the defined benefit obligations.

- (h) Plan assets consist of:

<i>(in millions of Korean won)</i>	<b>December 31, 2017</b>		<b>December 31, 2016</b>

### 37. Risk Management

#### Financial Risk Management

The Group's financial risk management ("FRM") policy supports each business division to achieve excellent performance solidly and continuously against market risk, credit risk and liquidity risk. In addition, FRM helps the Group to enhance cost competitiveness through cost-efficient financing cost by improving financial structure and effective cash management.

While cooperating with other divisions, Finance Division in the Parent Company mainly implements

**LG Electronics**  
**Notes to the Consolidated Financial Statements**  
**December 31, 2017 and 2016**

---

FRM. This involves setting-up risk management policies and recognizing, evaluating and hedging risks from a global point of view.

The Group anticipatively and systematically manages the financial risks over global business activities through its four overseas treasury centers in New Jersey (United States), Amsterdam (Netherlands), Beijing (China), and Singapore in coordination with Finance Division in the Parent Company. And it also helps to improve overseas subsidiaries' business competitiveness by performing integration of their finance functions.

The Group mitigates the adverse effects from financial risk by monitoring the risk periodically and updating FRM policy each year.

The carrying amount and profit or loss of each category of financial instruments and the details of borrowings related to the financial risk management are presented in Note 5 and Note 15, respectively.

(a) Market risk

i) Foreign exchange risk

Due to its multinational business operations, the Group is mainly exposed to foreign exchange risk on the US Dollar and Euro.

The purpose of foreign exchange risk management is to provide the foundation of a stable business operation by minimizing the uncertainty and volatility of foreign exchange gains and losses from foreign exchange rate fluctuations.

The Group's foreign exchange risk management is implemented under its own foreign exchange policy through which the Group can minimize the exposure to foreign exchange risk by preferentially making equal amount of foreign exchange assets and liabilities from general operating activities. And the Group continuously considers efficient foreign exchange risk hedges against its remaining exposure with derivative financial instruments and scrutinizes changes in foreign exchange exposure and the results of hedging activities on a monthly basis. Speculative foreign exchange trading is prohibited in principle.

As of December 31, 2017 and 2016, if the foreign exchange rate of the Korean won fluctuated for monetary assets and liabilities denominated in major foreign currency other than functional currency by 10% while other variables were fixed, the effects on income (loss) before tax would be as follows:

<i>(in millions of Korean won)</i>	<b>December 31, 2017</b>		<b>December 31, 2016</b>	
	<b>10% increase</b>	<b>10% decrease</b>	<b>10% increase</b>	<b>10% decrease</b>
USD/KRW	38,886	(38,886)	(12,382)	12,382
EUR/KRW	19,998	(19,998)	31,934	(31,934)

**LG Electronics**  
**Notes to the Consolidated Financial Statements**  
**December 31, 2017 and 2016**

ii) Interest rate risk

The Group is exposed to interest rate risk through changes in interest-bearing liabilities or assets. The risk mainly arises from borrowings and deposits held by financial institutions with variable interest rates linked to market interest rate changes in the future. The objective of interest rate risk management lies in improving corporate value by minimizing uncertainty caused by fluctuations in interest rates and minimizing net interest expense.

The Group minimizes its borrowings from others and optimizes its deposits by constructing global internal finance sharing system. The Group manages the risk of floating interest rate by regularly monitoring trends of internal and external interest rates.

If interest rates fluctuate by 1%p without other variables changing, the effects on income and expenses related to borrowings and deposits held by financial institutions with variable interest rates for the years ended December 31, 2017 and 2016, are as follows:

<i>(in millions of Korean won)</i>	2017		2016	
	1%p increase	1%p decrease	1%p increase	1%p decrease
Interest income	32,249	(32,249)	29,060	(29,060)
Interest expense	3,721	(3,721)	3,877	(3,877)

iii) Details of derivatives contracts are as follows:

**Hedging purposes**

The Group entered into the cross-currency swap contracts and the interest rate swap contracts to hedge cash flow risks related to the floating interest rates and foreign exchange rates of debentures.

December 31, 2017	Contractor	Contracted amount <i>(in millions)</i>	Contracted currency rate	Interest rate <i>(paid)</i>	Starting date	Expiration date
USD/KRW cross-currency swap	Shinhan Bank and others	USD 530	1,097.3 ~ 1,155.2	2.17% ~ 3.22%	2013.07.31 ~ 2017.11.22	2019.01.31 ~ 2025.04.23
Interest rate swap	Woori Bank and others	KRW 1,270,000 / EUR 100	-	1.00% ~ 4.53%	2014.01.03 ~ 2017.08.24	2023.02.24 ~ 2030.07.07

Interest rate received for the above swap contracts equals to annual interest rate of borrowings (Note 15).

At the end of the reporting period, the swap contracts are evaluated at fair value and the loss on valuation of the effective portion amounting to ₩45,703 million in 2017 (2016: loss on valuation amounting to ₩55,973 million) after applying the tax effect, is recognized in other comprehensive income. The Group has reclassified ₩75,165 million to loss from equity in 2017 (2016: ₩53,027 million to loss from equity). Therefore, other comprehensive income from cash flow hedges amounts to ₩29,462 million in 2017 (2016: other comprehensive loss of ₩2,946 million) after applying the tax effect.

***Trading purposes***

The Group entered into the currency forward contracts to manage the risk against possible future changes in foreign exchange rates. The subsidiaries' currency forward contracts as of December 31, 2017, and related profit or loss for the year ended December 31, 2017, are as follows:

<i>(in millions of Korean won)</i>	<b>Purchase</b>	<b>Sale</b>	<b>Gain on valuation</b>	<b>Loss on transaction</b>
Currency forward	494,471	494,307	6,209	23,046

iv) Price risk

The Group is exposed to price risk through equity securities owned by the Group classified as available-for-sale financial assets in the consolidated financial statements.

The listed securities owned by the Group are traded in the open market, and related to KOSDAQ Index.

The effect of price index's fluctuation related to the listed securities on the equity (before applying the tax effect) is set out in the below table. The analysis is performed in respect of 30% increase/decrease in the price index under the assumption that other variations are consistent and the listed securities owned by the Group have correlation with the relevant past index.

<i>(in millions of Korean won)</i>	<b>December 31, 2017</b>		<b>December 31, 2016</b>	
	<b>30% increase</b>	<b>30% decrease</b>	<b>30% increase</b>	<b>30% decrease</b>
KOSDAQ	3,095	(3,095)	3,575	(3,575)

The valuation and the reclassified amounts of the available-for-sale financial assets related to the market risk above are presented in Note 8.

(b) Credit risk

The Group operates a consistent Global Credit / TR (trade receivables) policy to manage credit risk exposures.

In regard to receivables, the Group operates an integrated receivable insurance program with the world top three receivable insurers (Euler Hermes, Atradius and Coface) and Korea Trade Insurance Corporation (K-SURE). In an effort to minimize receivable credit risk, the Group applies the credit rating of the counterparty when determining the insurance coverage. In addition, the Group performs stringent credit risk management based on credit valuation criteria for receivables without insurance coverage or collateral.

Good	29~40	4~5	7	C
Fair	41~72	6~7	3~6	D~E
Poor	73~	8~10	0~2	F~R

Criteria of categorizing trade receivables without insurance or collateral are as follows:

Tier 1 – National or local government, domestic and global credit rating agency AA- ~ AAA+

Tier 2 – Debtors with domestic and global credit rating other than Tier 1

Tier 3 – Small debtors without credit history

The credit rating of cash equivalents and deposits held by financial institutions estimated by the Group using external credit rating criteria as of December 31, 2017 and 2016, is as follows:

<b>Category</b>	<b>December 31, 2017</b>	<b>December 31, 2016</b>
Excellent	2,776,107	2,886,947
Good	676,609	174,612

Excellent: Equal to or more than A-(Global credit rating agency such as S&P), AAA(Domestic credit rating agency such as Korea investors service)

Good: Equal to or more than BBB-(Global credit rating agency such as S&P), AA(Domestic credit rating agency)

Others: Financial deposit without credit rating

(c) Liquidity risk

The Group forecasts its cash flow and liquidity status, and sets action plans on a regular basis to manage liquidity risk proactively. The Group systematically works with experts in four RTCs to carry

**December 31, 2017 and 2016**

out fund and liquidity management that can react proactively to the changing global financial environment.

The Group maintains adequate amount of cash and committed credit facilities in Kookmin Bank and Shinhan Bank to cope with potential financial distress.

In addition, the Group is able to source funds any time in the domestic and international financial markets as of the end of reporting period because it has good investment credit grades of AA Stable from Korea Investors Service, Korea Ratings and NICE Information Service, BBB from Standard & Poors, and Baa3 from Moody's as of December 31, 2017.

- i) Cash flow information on maturity of financial liabilities as of December 31, 2017, are as follows:

<i>(in millions of Korean won)</i>	<b>Total</b>	<b>Within 1 year</b>	<b>1 to 2 years</b>	<b>2 to 5 years</b>	<b>Over 5 years</b>
Trade payables	8,137,526	8,137,526	-	-	-
Borrowings	10,793,759	1,643,798	1,373,632	3,989,329	3,787,000
Other payables	3,529,415	3,522,874	825	5,546	170
Derivative liabilities	2,166	2,166	-	-	-
<b>Total</b>	<b>22,462,866</b>	<b>13,306,364</b>	<b>1,374,457</b>	<b>3,994,875</b>	<b>3,787,170</b>

The above cash flows are calculated at nominal value based on the earliest maturity dates and include cash flows of principal and interests. The Group's trading portfolio derivative liabilities that are not qualified for hedge accounting have been included at their fair value of ₩2,166 million within the less than 1-year time bucket. This is because the contractual maturities are not essential for an understanding of the timing of the cash flows. These contracts are managed on a net-fair value basis rather than by maturity date. Derivatives for cash flow hedges from changes in interest rate and exchange rate are reflected in the cash flows of related borrowings.

- ii) The maturity analysis of financial guarantee contracts provided by the Group to third party companies as of December 31, 2017, are as follows:

<i>(in millions of Korean won)</i>	<b>Total</b>	<b>Within 1 year</b>	<b>1 to 2 years</b>	<b>2 to 5 years</b>	<b>Over 5 years</b>
Financial guarantee contracts	56,714	47,339	2,678	6,697	-

The above cash flow is the maximum amount of guarantees allocated to earliest period in which the Group can be required to make payments.

**Capital Risk Management**

The Group's capital risk management purpose is to maximize shareholders' value through maintaining a sound capital structure. The Group monitors financial ratios, such as liability to equity ratio and net borrowing ratio each month and implements required action plan to improve the capital structure.

Debt-to-equity ratio and net borrowing ratio as of December 31, 2017 and 2016, are as follows:

<sup>1</sup> Excluded from disclosure as the carrying amount is the reasonable approximate of fair value.

<sup>2</sup> Unlisted equity securities are calculated at cost because the variability in the range of the estimated future cash flows is significant and the probabilities of the various estimates within the range cannot be reasonably assessed. As of December 31, 2017, there is no asset to be disposed of in near future.

<sup>3</sup> Measured at the higher of the amount determined in accordance with Korean IFRS 1037 *Provisions, Contingent Liabilities and Contingent Assets*, and the amount initially recognized less cumulative amortization recognized in accordance with Korean IFRS 1018 *Revenue*.

(b) Fair value measurements of assets and liabilities

i) Fair value hierarchy and measurement method

The fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. The fair value measurement is to estimate the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date under current market conditions. When measuring fair value using valuation techniques, the Group maximizes the use of market information and minimizes the use of unobservable inputs.

Financial instruments measured at fair value are categorized within the fair value hierarchy, and the defined levels are as follows:

- Level 1: Financial instruments measured at the quoted prices in an active market for identical assets or liabilities are included in 'level 1'. Assets or liabilities categorized within 'level 1' include financial instruments such as marketable equity securities traded.

- Level 2: When financial instruments are measured by using a discounted cash flow, if all significant inputs required to measure the fair value of an instrument are observable, the instrument is included in 'level 2'. Assets or liabilities categorized within 'level 2' include financial instruments such as derivative financial instruments.

- Level 3: When financial instruments are measured by using a discounted cash flow, if one or

**LG Electronics**  
**Notes to the Consolidated Financial Statements**  
**December 31, 2017 and 2016**

more of the significant inputs are unobservable market data, the instrument is included in 'level 3'. Assets or liabilities categorized within 'level 3' include financial instruments such as debt securities.

The fair value of financial instruments traded in active markets is based on quoted market prices at the end of the reporting period. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, an entity within the same industry, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price for financial assets held by the Group is the closing price at the end of the reporting period. These instruments are included in 'level 1'. Instruments included in 'level 1' comprise primarily equity investments classified as available for sale.

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The Group uses various valuation techniques and makes judgments based on current market conditions. These valuation techniques maximize the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to measure the fair value of an instrument are observable, the instrument is included in 'level 2'.

If one or more of the significant inputs are not based on observable market data, the instrument is included in 'level 3'. Financial instrument included 'level 3' uses other method including discounting cash flow method.

ii) Financial instruments measured at fair value

Fair value hierarchy classifications of the financial assets and financial liabilities that are measured at fair value as of December 31, 2017 and 2016, are as follows:

<i>(in millions of Korean won)</i>	December 31, 2017			Total
