Independent auditors' report

(English Translation of Report Originally Issued in Korean)

To the Shareholders and Board of Directors of Doosan Corporation

We have audited the accompanying consolidated financial statements of Doosan Corporation (the "Company") and its subsidiaries (collectively referred to as the "Group"), which comprise the consolidated statement of financial position as at December 31, 2017, and the consolidated statement of profit or loss, consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's responsibility for the consolidated financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with Korean International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of the consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the Republic of Korea. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Group as at December 31, 2017, and its financial performance and cash flows for the year then ended in accordance with Korean International Financial Reporting Standards.

Emphasis of matter

Without modifying our audit opinion, we draw attention to the following matters:

(1) Emphasis of matter in regard to key audit matters in engineer-to-order manufacturing sectors (ETO)

In accordance with Accounting Audit Practice Guidelines 2016-1, key audit matters in ETO are selected on the basis of auditors' professional judgment and communication with those charged with governance. Such procedures are based on the consolidated financial statements as a whole, and we do not express an opinion in regard to such matter.

We have performed below auditing procedures on the key audit matters in forming the audit opinion.

a. General matter

Details of key audit matters in ETO described in this audit report are as below.

As described in Note 2 to the consolidated financial statements, when the outcome of a construction contract is reliably measurable, construction revenue and construction costs are recognized based on the percentage-of-completion method of contract activities as at December 31, 2017.

The percentage-of-completion is calculated by dividing cumulative construction costs to date by the total estimated costs of the construction but excluding contract costs to which the percentage-of-completion does not apply.

When the amounts with addition recognized in cumulative contract costs (less loss recognized) exceed the amounts charged by the percentage-of-completion, the Group recognizes the excess as due from customers for contract work and when the amounts charged by the percentage-of-completion exceed the amounts with addition recognized in cumulative contract costs (less loss recognized), the Group recognizes the excess as due to customers for contract work.

b. The Group's accounting policies on revenue recognition based on input method

When the Group applies percentage-of-completion to recognize contract revenue and costs for contracts that are not reliably estimated, there exists risk of misstatement in contract revenue and costs. Furthermore, there exists risk of misstatement in contract revenue and costs when the Group cannot apply percentage-of-completion for contracts that are reliably estimated. Accordingly, we identified significant risks in revenue recognition based on the input method.

As at December 31, 2017, we performed the following audit procedures for the key audit matters associated with the Group's accounting policies on revenue recognition based on the input method.

- Review of the Group's internal control in relation to the decision on accounting policies of revenue recognition
- Analytical review and inquiry of the significant changes in and the progress of the major projects

- Inspection and inquiry of terms and conditions to check whether the criteria for reliable measurement of construction contract are met or not

c. Uncertainty in estimating the total costs of the construction contract

As described in Note 26 to the accompanying consolidated financial statements, the impact of changes in the total estimated contract amounts and total estimated contract costs on profit or loss for the current and future periods are ₩12,907 million and ₩132,357 million, respectively, and the impact on due from customers for contract work (due to customers for contract work) is ₩12,907 million. Accordingly, when the Group's total estimated contract costs change, the percentage-of-completion changes and profit or loss for the current and future periods and due from customers for contract work or due to customers for contract work change thereafter. As a matter of fact, we identified the uncertainty in estimating the total contract costs as significant risk.

We performed the following audit procedures for the key audit matters, in relation to uncertainties in estimating the total contract costs.

- Review of internal control related to the Group's decision on the total estimated contract costs
- Analytical review and inquiry about changes in major items of total estimated contract costs by reporting period
- Retrospective review of project with significant changes in the total estimated contract costs
- Analysis of the discrepancies for project with significant changes in the total estimated contract costs and check supporting documents if necessary
- Validation of approval from appropriate personnel for the total estimated contract costs
- Validation of aggregated amounts and distribution of indirect costs by project conducted by system audit team

d. Appropriateness of percentage-of-completion of construction

Revenue recognition based on the percentage-of-completion has significant risk of incurring material adjustment to the carrying amounts of assets and liabilities after December 31, 2017. If percentage-of-completion is calculated by the ratio of cumulative construction costs to date and total estimated contract costs, and cumulative construction costs to date include contract costs that do not reflect construction performed, there exists a risk of not recognizing contract revenue and cost in an appropriate manner due to misstatement in percentage-of-completion. Accordingly, we identified the appropriateness of the calculation of percentage-of-completion of construction contract as significant risk.

We performed the audit procedures for the key audit matters associated with the impact of cumulative contract cost on the percentage-of-completion as at December 31, 2017 as follows.

- Analytical review and inquiry about reasons for increase/decrease in percentage-of-completion by reporting period
- Analytical review and inquiry about items of cumulative contract cost by reporting period
- Review and reconciliation of percentage-of-completion by process (monthly progress report) and percentage-of-completion of costs for major projects
- Validation of samples of material costs and other expenses to confirm actuality
- Test for the appropriateness of aggregated amounts and distribution of indirect costs by project conducted by system audit team
- Due diligence of work site and materials being processed
- Analytical review and inquiry of significant increase/decrease in cumulative costs of major projects
- Recalculation of percentage-of-completion by project

e. Assessment of recoverability of due from customers for contract work

There exists risk of over-calculation of due from customers for contract work if allowance of doubtful account of due from customers for contract work is not appropriately accounted caused by improper assessment of recoverability of due from customers for contract work. Accordingly, we identified significant risks in the assessment of recoverability of due from customers for contract work.

We performed the audit procedures for the key audit matters associated with the assessment of recoverability of due from customers for contract work as at December 31, 2017 as follows.

- Confirmation of contract and inquiry of terms and conditions of payment, compensation for delay, timing of transfer and other duties with regards to projects of which due from customers for contract work amounts have significantly increased
- Analytical procedure and inquiry on long-term due from customers for contract work and check supporting documents if necessary
- Inquiry and analytical procedure for recoverability of due from customers for contract work in case there are due from customers for contract work related to contracts with allowance for doubtful account on trade receivables
- External inquiry of major ordering organization

f. Appropriateness of accounting for changes in construction

The Group should include changes in construction to the contract revenue if it is highly likely that the ordering organization will approve the changes in total contract revenue as a result of changes in construction and revenue can be reliably measured. Total contract revenue may increase based on the costs not included in the contract amounts that the construction company may receive from the ordering organization or other parties as compensation. The Group includes the compensation costs to the contract revenue if the ordering organization is highly likely to permit charging for compensation costs after the negotiation and the amounts can be reliably measured. If total contract revenue decreases due to the payment of penalty of delay in construction for which the Group is responsible, the Group subtracts penalty from contract revenue if penalty is highly likely to occur and can be reliably measured.

Accordingly, we identified accounting for changes in construction as significant risk as there exists risks in misstating contract revenue when construction changes, compensation and penalty are not appropriately reflected in total contract revenue.

We performed the audit procedures for the key audit matters associated with the accounting and disclosures for changes in construction as at December 31, 2017 as follows.

- Test for operating effectiveness of the Group's internal control with regards to changes in terms and conditions
- Inquiry and analytical procedure of projects with significant changes in contract amounts
- Validation of supporting documents to confirm the appropriateness of changes in contract amounts
- Inquiry and analytical procedure for the contracts of which the contractual transfer date has passed but actual transfer has not occurred and check supporting documents if necessary
- Review of the appropriateness of estimation for compensation costs in delay

Other matter

The consolidated financial statements of the Group as at December 31, 2016 and for the year then ended were audited by Samil PricewaterhouseCoopers who expressed an unqualified opinion on those statements on March 23, 2017.

Ernst & Young Han Young

March 19, 2018

This audit report is effective as at March 19, 2018, the independent auditors' report date. Accordingly, certain material subsequent events or circumstances may have occurred during the period from the independent auditors' report date to the time this report is used. Such events and circumstances could significantly affect the accompanying consolidated financial statements and may result in modification to this report.

The accompanying notes are an integral part of the consolidated financial statements.

1. General

1.1 The parent company information

Doosan Corporation (the "Company") was incorporated on December 18, 1933, under the name of Sohwa-Kirin Beer, Ltd. to manufacture and sell beer. The Company has changed its name to Dongyang Beer, Ltd. in February 1948 and again to OB Beer, Ltd. in February 1996 and finally to Doosan Corporation on September 1, 1998. The consolidated financial statements of the Company and its subsidiaries (collectively, the "Group") have been prepared based on Korean International Financial Reporting Standards (KIFRS) 1110 *Consolidated Financial Statements*.

Since June 1973, the Company's shares have been listed on the KOSPI market of the Korea Exchange. After several capital issues, the Company's share capital as at December 31, 2017, is ₩134,846 million, including ₩26,984 million of preferred shares.

The Group's ordinary shares as at December 31, 2017, are owned as follows:

	Number of ordinary shares owned	Ownership percentage (%)
Related parties	9,369,395	48.80
Treasury shares	4,266,070	22.22
Others	5,562,538	28.98
	19,198,003	100.00

Meanwhile, 48.3% of preferred shares are owned by the related parties including the largest shareholder and 51.7% of preferred shares are owned by others entities and individual shareholders.

1.2 Consolidated subsidiaries information

1.2.1 Details of consolidated subsidiaries as at December 31, 2017 and 2016 are as follows:

(*1) The ownership interests held by the Company and its consolidated subsidiaries represent the aggregated total of ownership interests directly held by each entity within the Group. The ownership interests held by non-controlling interests represent the proportion of ownership interests that are not attributable, directly or indirectly, to the entities within the Group and it may differ from the aggregated total, less the effective ownership interest held by the Group. In other words, 'ownership interest held by non-controlling interests' is the percentage of ownership less the effective ownership interest of the entity in the Group at 100%.

(*2) Although the Group does not own the interest in the special-purpose company, in consideration of terms in the agreement of establishment, the Group concluded that it has control over the entity to substantially obtain all profits from the entity and to control business activities of the entity.

(*3) Although the Group owns less than 50% of voting right in obtaining control, but the Group concluded that the Group has de facto control over the subsidiaries.

(*4) For the year ended December 31, 2017, the name was changed from 'Doosan International South East Asia Pte. Ltd.' to 'Doosan Bobcat Singapore Pte. Ltd.' and from 'Doosan Infracore India Private Ltd.' to 'Doosan Bobcat India Private Ltd.' and from 'Doosan Infracore Bobcat Korea Co., Ltd.' to 'Doosan Bobcat Korea Co., Ltd.' and from 'Doosan International Mexico S.A. de C.V.' to 'Doosan Bobcat Mexico S.A. de C.V.' and from 'DRA Co., Ltd.' to 'Doosan Robotics Co., Ltd.' and from 'Doosan Infracore Suzhou Co., Ltd.' to 'Doosan Bobcat China Co., Ltd.'

(*5) For the year ended December 31, 2016, 'Doosan International Portable Power of Netherlands BV' changed its name to 'Doosan Infracore Customization Center Europe B.V.' and for the year ended December 31, 2017,

1.2.2 Changes in the scope of consolidation

Changes in the scope of consolidation for the year ended December 31, 2017, are as follows:

Subsidiary	Change	Description
Neo Holdings Co., Ltd.	Included/Excluded	Newly acquired/Merger
Neo Plux Co., Ltd.	Included	Newly acquired
Seung Li 3rd Co., Ltd.	Included	Newly established

Doosan Turbomachinery Services Inc.	Included	Newly acquired
Dscentum 1st Co., Ltd.	Included/Excluded	Newly established/Redemption
The DS Way 1st Co., Ltd.	Excluded	Redemption
Doosan Construction Site Solutions Vietnam Company Limited	Excluded	Merger
Doosan Engineering & Services LLC	Excluded	Liquidation
Doosan Bobcat Engineering s.r.o.	Excluded	Merger
Doosan Trading Ltd.	Excluded	Merger
GMS 1st Co., Ltd.	Included	Newly established
GMS 2nd Co., Ltd.	Included	Newly established
Doosan E&C 3rd Co., Ltd.	Included	Newly established

1.2.2 Changes in the scope of consolidation (cont'd)

Doosan Heavy Industries & Construction Co., Ltd., a subsidiary of the parent company, decided to spin off the investment business from Doosan Engine Co., Ltd. into a new company, a subsidiary, and merge with Doosan Heavy Industries & Construction, and sell the business to the external, excluding the investment business of Doosan Engine Co., Ltd. by the resolution of the Board of Directors on March 13, 2018.

Doosan Corporation, a parent company, merged with DIP Holdings Co., Ltd. on March 1, 2018.

As at June 1, 2018, Doosan Corporation, a parent company, will merge with Dootamall Co., Ltd.

1.2.3 Condensed financial information of the Group's significant consolidated subsidiaries (or intermediate parent) as of and for the year ended December 31, 2017, is as follows (Korean won in millions):

1.2.4 Summarized cash flows information of main subsidiaries for the year ended December 31, 2017, is as follows (Korean won in millions):

	DHC and subsidiaries	DI and subsidiaries	DEC and subsidiaries	DE and subsidiaries
Cash flows from operating activities	₩ (159,049)	₩ 665,691	₩ 55,254	₩ (69,385)
Cash flows from investing activities	(478,154)	(256,289)	(42,297)	12,651
Cash flows from financing activities	838,496	32,267	18,348	56,612
Effect of exchange rate changes on cash and cash equivalents	(38,946)	(36,766)	(368)	(463)
Net increase(decrease) in cash and cash equivalent	162,347	404,903	30,937	(585)
Cash and cash equivalents as at January 1	681,257	538,578	79,889	72,821
Cash and cash equivalents as at December 31	843,604	943,481	110,826	72,236

Above financial information of intermediate controlling company is based on consolidated financial information. However, financial information of DHC and its subsidiaries exclude financial information of DI, DEC, DE and their subsidiaries, respectively.

1.2.5 The ownership interests held by non-controlling interests and details of financial position, financial performance and dividends attributable to non-controlling interests by each of the major subsidiaries material to the Group, are as follows (Korean won in millions):

	DHC and subsidiaries	DI and subsidiaries	DEC and subsidiaries	DE and subsidiaries
Ownership interest held by non-controlling interests	62.2%	86.3%	69.9%	83.9%
Cumulative non-controlling interests	1,513,524	2,619,839	555,644	410,587
Net income (loss) vested in non-controlling interests	(120,271)	246,245	(92,414)	(29,289)
Dividends paid to non-controlling interests (*1)	(51,995)	(39,503)	-	-

(*1) Oricom Inc., in addition to the above subsidiaries, paid dividends of ₩844 million vested in non-controlling interests.

Above financial information of intermediate controlling company is based on consolidated financial information. However, financial information of DHC and its subsidiaries exclude financial information of DI, DEC, DE and their subsidiaries, respectively.

2. Summary of significant accounting policies

The Group maintains its official accounting records in Korean won and prepares the consolidated financial statements in conformity with KIFRS, in the Korean language (Hangul).

2.1 Basis of preparation

The consolidated financial statements have been prepared in accordance with Korean International Financial Reporting Standards ("KIFRS"), as prescribed in the *Act on External Audit of Stock Companies* in the Republic of Korea.

The significant accounting policies, under KIFRS followed by the Group in the preparation of its consolidated financial statements are summarized below, and these accounting policies, except for the effects of the changes in accounting policies that are described below, have been applied consistently to the consolidated financial statements for the current period and the accompanying comparative period.

The accompanying consolidated financial statements have been prepared on the historical cost basis, except for certain non-current assets and financial instruments that are measured at revalued amount or fair values at the end of each reporting period. Historical cost is generally based on the fair value of the consideration given in exchange for assets.

2.1.1 Amendments to KIFRS and new interpretations that are mandatorily effective for the current year

The Group apply amendments to KIFRS effective as at January 1, 2017. The nature and the impact of each new standard amendment are described below:

Amendments to KIFRS 1007 *Statement of Cash Flows: Disclosure Initiative*

The amendments require entities to provide disclosure of changes in their liabilities arising from financing activities.

Amendments to KIFRS 1012 *Income Taxes: Recognition of Deferred Tax Assets for Unrealised Losses*

The amendments are: 1) temporary differences arise when the book amount of a fixed rate financial instrument measured at fair value decreases but the tax basis price remains at cost, regardless of the expected recovery method, such as sale or use; 2) future taxable income for the purpose of reviewing the realization of the temporary difference to be deducted can be estimated as an amount exceeding the book amount of the asset; and 3) when examining whether future taxable income is sufficient, we should compare future taxable income before deducting temporary differences and deductible effects of deductible temporary differences.

Annual Improvements Cycle - 2014-2016

Amendments to KIFRS 1112 *Disclosure of Interests in Other Entities*

The amendments clarify that the disclosure requirements in KIFRS 1112, other than those in paragraphs B10–B16, apply to an entity's interest in a subsidiary, a joint venture or an associate (or a portion of its interest in a joint venture or an associate) that is classified (or included in a disposal group that is classified) as held for sale.

2.1.2 New and revised K-IFRS in issue but not yet effective

The standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Group's financial statements are disclosed below.

KIFRS 1109 *Financial Instruments*

In September 2015, the KASB adopted the new standard, KIFRS 1109 *Financial Instruments*, which replaces KIFRS 1039 *Financial Instruments: Recognition and Measurement*. KIFRS 1109 brings together all three aspects of the accounting for financial instruments project: classification and measurement, impairment and hedge accounting. KIFRS 1109 is effective for annual periods beginning on or after January 1, 2018, with early application permitted. Except for hedge accounting, retrospective application is required but providing comparative information is not compulsory. For hedge accounting, the requirements are generally applied prospectively, with some limited exceptions.

The effective implementation of the standard will likely require analyses on financial effects, establishment of accounting policies, development of an accounting system, and stabilization of the system. The effect on the financial statements for the first-time adoption of the standard may differ depending on the selection and judgment of accounting policies in accordance with the standard, as well as the Group's financial instruments and economic conditions during the period.

Based on the available information as at December 31, 2017, the Group has analyzed the impact on the 2017 financial statements to assess financial impact of adopting KIFRS 1109. This assessment is based on currently available information and may be subject to changes arising from further reasonable and supportable information being made available to the Group in 2018 when the Group will adopt KIFRS 1109. The Group expects no significant impact on its statement of financial position and equity except for the effect of applying the classification requirements of KIFRS 1109.

2.1.2 New and revised KIFRS in issue but not yet effective (cont'd)

KIFRS 1109 *Financial Instruments* (cont'd)

(1) Classification and measurement of financial assets

KIFRS 1109 requires financial instruments to be classified as financial instruments subsequently measured at amortized cost, fair value through other comprehensive income (FVOCI), or fair value through profit or loss (FVTPL), on the basis of the holder's business model and instrument's contractual cash flow characteristics as shown below. Hybrid contracts with hosts that are assets, are classified in their entirety instead of bifurcating the embedded derivatives.

Objective of the business model	Characteristics of contractual cash flows	
	Composed solely of principal and interest	Others
Collecting contractual cash flows	Subsequently measured at amortized cost ^(*1)	FVTPL ^(*2)
Collecting contractual cash flows and selling	FVOCI ^(*1)	
Selling or other purposes	FVTPL	

(*1) An entity may irrevocably designate a financial asset as measured at FVTPL if doing so eliminates or reduces an accounting mismatch.

(*2) An entity may make an irrevocable election to present in other comprehensive income changes in the fair value of an investment in an equity instrument that is not held for trading.

The Group holds ₩6,915,749 million of loans and receivables and ₩281,380 million of financial assets available for sale as at December 31, 2017.

(2) Classification and measurement of financial liabilities

Under KIFRS 1109, changes in the fair value of a financial liability designated as measured at FVTPL that arise from changes in the liability's credit risk are presented in other comprehensive income, instead of profit or loss. The changes in the liability's credit risk are recognized in profit or loss if the changes create or enlarge an accounting mismatch had it been presented in other comprehensive income.

The Group owns debt investment carries at amortized cost of ₩17,412,301 million as at December 31, 2017.

(3) Impairment: financial assets and contract assets

Under KIFRS 1039, impairment losses are recognized when there is objective evidence of impairment based on the incurred loss model. However, under KIFRS 1109, impairment losses are recognized on debt instruments, lease receivables, contract assets, loan commitment, and financial guarantee contracts that were accounted for at amortized cost, or FVOCI, based on the expected credit loss (ECL) impairment model.

2.1.2 New and revised KIFRS in issue but not yet effective (cont'd)

KIFRS 1109 *Financial Instruments* (cont'd)

KIFRS 1109 outlines a three-stage model for 12-month expected credit losses, or lifetime expected credit losses based on changes in credit risk since initial recognition of financial assets. As a result, credit losses can be recognized earlier than the current KIFRS 1039.

Classification (*1)		Loss allowance
Stage 1	Credit risk on a financial instrument has not increased significantly since initial recognition. (*2)	12-month ECL: Expected credit losses that result from default events on a financial instrument that are possible within 12 months after the reporting date
Stage 2	Credit risk on a financial instrument has increased significantly since initial recognition.	Lifetime ECL: Expected credit losses that result from all possible default events over the expected life of a financial instrument
Stage 3	Credit-impaired	

(*1) For trade receivables or contract assets that arise from transactions within the scope of KIFRS 1115 *Revenue from Contracts with Customers* and that do not contain a significant financing component, loss allowance is measured at an amount equal to lifetime expected credit losses. If the trade receivables or contract assets contain a significant financial component, a policy election may be made such that the loss allowance is measured at an amount equal to lifetime expected credit losses. Also, for lease receivables, a policy election may be made such that the loss allowance is measured at an amount equal to lifetime expected credit losses.

(*2) Low credit risk at the reporting date may be deemed as no significant increase in credit risk.

Under KIFRS 1109, the cumulative changes in lifetime expected credit losses since initial recognition are recognised as loss allowance for a financial asset that is considered credit-impaired at initial recognition.

The Group holds loans and receivables measured at amortized cost and loss allowance for these assets is ₩2,485,085 million as at December 31, 2017.

(4) Hedge accounting

KIFRS 1109 applies mechanics of hedge accounting (fair value hedge accounting, cash flow hedge, foreign entities net investment hedge) specified in the current KIFRS 1039; however, the Group changed from the complex and rule-based hedge accounting requirements of KIFRS 1039 to the principle-based approach which focuses on the risk management activities. Requirements for application of hedge accounting are relaxed by enlarging items designated as hedges and hedging instruments, evaluating the high risk avoidance effects, and eliminating the quantitative criteria (80 ~ 125%).

Based on the transitional provisions, the Group may elect to continue to apply the requirements of hedge accounting under KIFRS 1039 upon initial application of KIFRS 1109.

The Group has applied hedge accounting and recognized ₩37,353 million as other comprehensive loss related to cash flow hedges.

2.1.2 New and revised KIFRS in issue but not yet effective (cont'd)

KIFRS 1115 Revenue from Contracts with Customers

The amended standard KIFRS 1115 *Revenue from Contracts with Customers*, which was enacted on November 6, 2015, is effective for annual periods beginning on or after January 1, 2018, with early application permitted. The new standard will supersede the following KIFRS: KIFRS 1011 *Construction Contracts*, KIFRS 1018 *Revenue*, KIFRS 2113 *Customer Loyalty Programmes*, KIFRS 2115 *Agreements for the Construction of Real Estate*, KIFRS 2118 *Transfers of Assets from Customers*, and KIFRS 2031 *Revenue-Barter Transactions Involving Advertising Services*.

The Group will apply the standard for the annual period beginning on or after January 1, 2018 to the extent that the cumulative effect of the first application of this standard is reflected in the retained earnings (or, if appropriate, other capital element), and will only retrospectively apply the standard to contracts that are not completed on the initial application date in accordance with the applicable rules.

The current KIFRS 1018 provides the criteria for the recognition of revenue relating to: sale of goods, rendering of services, interest, royalties, dividends and construction contracts; however, under the new KIFRS 1115, revenue is recognized by applying a five-stage revenue recognition model (① Identify a contract with a customer → ② Identify the separate performance obligations in the contract → ③ Determine the transaction price → ④ Allocate the transaction price to the separate performance obligations in the contract → ⑤ Recognize revenue when the entity satisfies a performance obligation) to its all contracts with customers

For the purpose of adopting KIFRS 1115, the financial accounting department of the Group has selected the representative contracts for each type of sales until the end of 2017 through the collaboration with external accounting experts. The financial impact and preliminary analysis based on the adoption of KIFRS 1115 has been carried out and detailed analysis of all the contracts has been made to reveal the major differences due to the changes in the main standards. The results of the analysis were as follows.

(1) Identification of separate performance obligations

The Group is engaged in the construction of power generation facilities, industrial facilities, construction machinery, engines, main forging and general construction business.

In applying KIFRS 1115, the Group is required to identify performance obligations that are differentiated in its contract with customers, so that performance obligations as revenue recognition units can be further distinguished or combined. The timing of revenue recognition of the Group may vary depending on whether each identified performance obligation is fulfilled at one time or over a period of time.

In applying KIFRS 1115, different performance obligation is identified if customer benefits from goods or service or customer benefits from goods or service with other resources that are readily available and promise to customer to transfer goods or service is separately identified from another promise within a contract. Also, with regards to the performance obligation, individual selling price is estimated based on the purpose of allocation and transaction prices are allocated thereafter if transaction price is allocated based on the individual selling price or selling price cannot be individually observable.

The Group will identify (1) EPC contract and (2) O&M engagement as separate performance obligation in an integrated contract and estimate individual selling price for each performance obligation, allocate transaction price and recognize revenue. In addition, the Group will recognize the warranty of which the Group has the option to purchase, transportation included in the trade receivables and insurance provisions as separate performance obligations, and allocate transaction price and recognize the revenue.

As a result of the preliminary impact assessment, the adoption of KIFRS 1115 is not expected to have a material impact on the Group's financial statements.

2.1.2 New and revised KIFRS in issue but not yet effective (cont'd)

(2) Performance obligation satisfied over a period of time

The development and industrial sectors of the Group are engaged in the production and sales of power generation equipment ordered by the customer. The Group considers the contract to be a construction contract, estimates the progress according to the input method, and recognizes revenue according to the progress.

According to KIFRS 1115, control over goods or service is deemed to be transferred over a period of time and revenue can be recognized based on the percentage-of-completion to the extent that an entity holds right to charge the payment which may enforce the fulfillment of the performance obligation up to date and the entity does not generate assets to replace the performance obligation performed.

The Group has determined that it is necessary to recognize revenue by applying the progress as a result of reviewing the possibility of replacement and the right to charge payment for each contract. The adoption of KIFRS 1115 is not expected to have a material effect on the financial statements.

(3) Percentage-of-completion measurement using input method

The development sector of the Group will enter into a plant construction contract including purchasing, manufacturing and installation of power generation related equipment such as boilers and turbines, and will generally proceed for a long period of time.

According to KIFRS 1115, the method of recognizing the revenue as the cost of goods used to perform the obligation thoroughly presents the entity's progress of performance if goods are not distinguished at the commencement of contract, it is likely that the customer will significantly control the goods before the goods or service are provided, costs of goods to be transferred are significant compared to the total costs of performing the obligation, and the entity procures goods from the third party but does not significantly participate in the design and production of those goods.

As a result of the analysis of the projected cost for each contract, the adoption of KIFRS 1115 did not have a material impact on the financial statements.

(4) Variable consideration

Under KIFRS 1115, the Group uses the expected value method to estimate the variable consideration which better predicts the amount of variable consideration to which the Group will be entitled. When the refund period is over, the Group will recognize revenue by including the variable consideration in the transaction price to the extent it is highly likely that a significant portion of recognized cumulative revenue will not be reversed. The Group accounts for the consideration received or receivable to which it will not be entitled as refund liability.

(5) Allocation of transaction price

In applying KIFRS 1115, the Group allocates transaction prices based on the relative individual selling prices for the different performance obligations identified in one contract. The Group will use 'the adjusted market assessment approach' to estimate the individual selling price of each performance obligation and will use 'the expected cost plus a margin approach', which exceptionally predicts the anticipated costs and adds the appropriate profits for some transactions.

As a result of the transaction price allocation, the Group did not expect to have a material impact on its financial statements as a result of the adoption of KIFRS 1115.

2.1.2 New and revised KIFRS in issue but not yet effective (cont'd)

Amendments to KIFRS 1110 and KIFRS 1028: *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

The amendments address the conflict between KIFRS 1110 and KIFRS 1028 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that the gain or loss resulting from the sale or contribution of assets that constitute a business, as defined in KIFRS 1103, between an investor and its associate or joint venture, is recognized in full. Any gain or loss resulting from the sale or contribution of assets that do not constitute a business, however, is recognized only to the extent of unrelated investors' interests in the associate or joint venture. The KASB has deferred the effective date of these amendments indefinitely, but an entity that early adopts the amendments must apply them prospectively.

KIFRS 1102 *Classification and Measurement of Share-based Payment Transactions*

The KASB issued amendments to KIFRS 1102 *Share-based Payment* that address three main areas: the effects of vesting conditions on the measurement of a cash-settled share-based payment transaction; the classification of a share-based payment transaction with net settlement features for withholding tax obligations; and accounting where a modification to the terms and conditions of a share-based payment transaction changes its classification from cash settled to equity settled. On adoption, entities are required to apply the amendments without restating prior periods, but retrospective application is permitted if elected for all three amendments and other criteria are met. The amendments are effective for annual periods beginning on or after January 1, 2018, with early application permitted.

KIFRS 1116 *Leases*

KIFRS 1116 *Leases* replaces KIFRS 1017 *Leases*, KIFRS 2104 *Determining Whether an Arrangement Contains a Lease*, KIFRS 2015 *Operating Leases-Incentives* and KIFRS 2027 *Evaluating the Substance of Transactions Involving the Legal Form of a Lease*. KIFRS 1116 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under KIFRS 1017. The standard includes two recognition exemptions for lessees – leases of low-value assets (e.g., personal computers) and short-term leases (i.e., leases with a lease term of 12 months or less). At the commencement date of a lease, a lessee will recognise a liability to make lease payments (i.e., the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e., the right-of-use asset). Lessees will be required to separately recognise the interest expense on the lease liability and the depreciation expense on the right-of-use asset.

Lessees will be also required to remeasure the lease liability upon the occurrence of certain events (e.g., a change in the lease term, a change in future lease payments resulting from a change in an index or rate used to determine those payments). The lessee will generally recognise the amount of the remeasurement of the lease liability as an adjustment to the right-of-use asset. Lessor accounting under KIFRS 1116 is not significantly changed from today's accounting under KIFRS 1017. Lessors will continue to classify all leases using the same classification principle as in KIFRS 1017 and distinguish between two types of leases: operating and finance leases.

KIFRS 1116 also requires lessees and lessors to make more extensive disclosures than under KIFRS 1017.

KIFRS 1116 is effective for annual periods beginning on or after January 1, 2019. Early application is permitted, but not before an entity applies KIFRS 1115. A lessee can choose to apply the standard using either the full retrospective approach or the cumulative catch-up transition method. The standard's transition provisions permit certain reliefs.

2.1.2 New and revised KIFRS in issue but not yet effective (cont'd)

Amendments to KIFRS 1040 *Transfers of Investment Property*

The amendments clarify when an entity should transfer property, including property under construction or development into, or out of investment property. The amendments state that a change in use occurs when the property meets, or ceases to meet, the definition of investment property and there is evidence of the change in use. Entities should apply the amendments prospectively to changes in use that occur on or after the beginning of the annual reporting period in which the entity first applies the amendments. An entity should reassess the classification of property held at that date and, if applicable, reclassify property to reflect the conditions that exist at that date. Retrospective application in accordance with KIFRS 1008 is only permitted if it is possible without the use of hindsight. These amendments are effective for annual periods beginning on or after January 1, 2018, with early application permitted.

Annual Improvements 2014-2016 Cycle

KIFRS 1101 *First-time Adoption of International Financial Reporting Standards - Deletion of short-term exemption for first-time adopters*

Short-term exemptions in paragraphs E3–E7 of KIFRS 1101 were deleted. The amendment is effective from January 1, 2018.

KIFRS 1028 *Investments in Associates and Joint Ventures - Clarification that measuring investees at fair value through profit or loss is an investment-by-investment choice*

The amendments clarify that:

- An entity that is a venture capital organisation, or other qualifying entity, may elect, at initial recognition on an investment-by-investment basis, to measure its investments in associates and joint ventures at fair value through profit or loss.
- If an entity, that is not itself an investment entity, has an interest in an associate or joint venture that is an investment entity, the entity may, when applying the equity method, elect to retain the fair value measurement applied by that investment entity associate or joint venture to the investment entity associate's or joint venture's interests in subsidiaries. This election is made separately for each investment entity associate or joint venture, at the later of the date on which: (a) the investment entity associate or joint venture is initially recognised; (b) the associate or joint venture becomes an investment entity; and (c) the investment entity associate or joint venture first becomes a parent.

The amendments should be applied retrospectively and are effective from January 1, 2018, with earlier application permitted. If an entity applies those amendments for an earlier period, it must disclose that fact.

KIFRS 2122 *Foreign Currency Transactions and Advance Consideration*

The Interpretation clarifies that, in determining the spot exchange rate to use on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration, the date of the transaction is the date on which an entity initially recognises the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, then the entity must determine the transaction date for each payment or receipt of advance consideration. Entities may apply the amendments on a fully retrospective basis. Alternatively, an entity may apply the Interpretation prospectively to all assets, expenses and income in its scope that are initially recognised on or after:

2.1.2 New and revised KIFRS in issue but not yet effective (cont'd)

- (i) The beginning of the reporting period in which the entity first applies the interpretation, or
- (ii) The beginning of a prior reporting period presented as comparative information in the financial statements of the reporting period in which the entity first applies the interpretation.

The impact of the interpretation on the consolidated financial statements of the Group is not material.

2.2 Basis of consolidation

The consolidated financial statements comprise the financial statements of the Company and its subsidiaries as at December 31, 2017. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if, and only if, the Group has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee)
- Exposure, or rights, to variable returns from its involvement with the investee
- The ability to use its power over the investee to affect its returns

When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement between investors and other vote holders
- Rights arising from other contractual arrangements
- The Group's voting rights and potential voting rights

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of comprehensive income from the date the Group gains control until the date the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it derecognizes the related assets (including goodwill), liabilities, non-controlling interest and other components of equity while any resultant gain or loss is recognized in profit or loss. Any investment is recognized at fair value.

2.3 Business combinations

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the fair values of the assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. Acquisition-related costs are generally recognized in profit or loss as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognized at their fair value at the acquisition date, except that:

- Deferred tax assets or liabilities and liabilities or assets related to employee benefit arrangements are recognized and measured in accordance with KIFRS 1012, *Income Taxes*, and KIFRS 1019, *Employee Benefits*, respectively.
- Liabilities or equity instruments related to share-based payment arrangements of the acquiree or share-based payment arrangements of the acquiree are measured in accordance with KIFRS 1102 at the acquisition date.
- Assets (or disposal groups) that are classified as held for sale in accordance with KIFRS 1105, *Non-current Assets Held for Sale and Discontinued Operations*, are measured in accordance with that standard.

Goodwill is measured as the excess of the sum of a) the consideration transferred, b) the amount of any non-controlling interests in the acquiree and c) the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after reassessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of a) the consideration transferred, b) the amount of any non-controlling interests in the acquiree and c) the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognized immediately in profit or loss as a bargain purchase gain.

Non-controlling interests that are present ownership interests and entitle their holders to a proportionate share of the entity's net assets in the event of liquidation may be initially measured either at fair value or at the non-controlling interests' proportionate share of the recognized amounts of the acquiree's identifiable net assets. The choice of measurement basis is made on a transaction-by-transaction basis. Other types of non-controlling interests are measured at fair value or, when applicable, on the basis specified in another KIFRS.

When the consideration transferred by the Group in a business combination includes assets or liabilities resulting from a contingent consideration arrangement, the contingent consideration is measured at its acquisition-date fair value and included as part of the consideration transferred in a business combination. Changes in the fair value of the contingent consideration that qualify as measurement period adjustments are adjusted retrospectively, with corresponding adjustments against goodwill. Measurement period adjustments are adjustments that arise from additional information obtained during the 'measurement period' (which cannot exceed one year from the acquisition date) about facts and circumstances that existed at the acquisition date.

The subsequent accounting for changes in the fair value of the contingent consideration that do not qualify as measurement period adjustments depends on how the contingent consideration is classified. Contingent consideration that is classified as equity is not remeasured at subsequent reporting dates and its subsequent settlement is accounted for within equity. Contingent consideration that is classified as an asset or a liability is remeasured at subsequent reporting dates in accordance with KIFRS 1039 or KIFRS 1037, *Provisions, Contingent Liabilities and Contingent Assets*, as appropriate, with the corresponding gain or loss being recognized in profit or loss.

When a business combination is achieved in stages, the Group's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date and the resulting gain or loss, if any, is recognized in profit or loss. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognized in other comprehensive income are reclassified to profit or loss where such treatment would be appropriate if that interest were disposed of.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period (see above), or additional assets or liabilities are recognized, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognized at that date.

2.4 Investment in associates and joint ventures

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

The results and assets and liabilities of associates or joint ventures are incorporated in these consolidated financial statements using the equity method of accounting, except when the investment is classified as held for sale, in which case it is accounted for in accordance with KIFRS 1105. Under the equity method, an investment in an associate or a joint venture is initially recognized in the consolidated statements of financial position at cost and adjusted thereafter to recognize the Group's share of the profit or loss and other comprehensive income of the associate or joint venture. When the Group's share of losses of an associate or a joint venture exceeds the Group's interest in that associate or joint venture (which includes any long-term interests that, in substance, form part of the Group's net investment in the associate or joint venture), the Group discontinues recognizing its share of further losses. Additional losses are recognized only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate or joint venture.

Any excess of the cost of acquisition over the Group's share of the net fair value of the identifiable assets, liabilities and contingent liabilities of an associate or a joint venture recognized at the date of acquisition is recognized as goodwill, which is included within the book amount of the investment. Any excess of the Group's share of the net fair value of the identifiable assets, liabilities and contingent liabilities over the cost of acquisition, after reassessment, is recognized immediately in profit or loss.

Upon disposal of an associate or a joint venture that results in the Group losing significant influence over that associate or joint venture, any retained investment is measured at fair value at that date and the fair value is regarded as its fair value on initial recognition as a financial asset in accordance with KIFRS 1039. The difference between the previous book amount of the associate or joint venture attributable to the retained interest and its fair value is included in the determination of the gain or loss on disposal of the associate or joint venture. In addition, the Group accounts for all amounts previously recognized in other comprehensive income in relation to that associate or joint venture on the same basis the Group would be required if that associate or joint venture had directly disposed of the related assets or liabilities. Therefore, if a gain or loss previously recognized in other comprehensive income by that associate or joint venture would be reclassified to profit or loss on the disposal of the related assets or liabilities, the Group reclassifies the gain or loss from equity to profit or loss (as reclassification adjustment) when it loses significant influence over that associate or joint venture.

When the Group reduces its ownership interest in an associate or a joint venture but continues to use the equity method, the Group reclassifies the proportion of the gain or loss that had previously been recognized in other comprehensive income to profit or loss relating to that reduction in ownership interest if that gain or loss would be reclassified to profit or loss on the disposal of the related assets or liabilities. In addition, the Group applies KIFRS 1105 to a portion of investment in an associate or a joint venture that meets the criteria to be classified as held for sale.

The requirements of KIFRS 1039 are applied to determine whether it is necessary to recognize any impairment loss with respect to the Group's investment in an associate or a joint venture. When necessary, the entire book amount of the investment (including goodwill) is tested for impairment in accordance with KIFRS 1036 by comparing its recoverable amount (higher of value in use and fair value, less costs to sell) with its book amount, and any impairment loss recognized forms part of the book amount of the investment. Any reversal of that impairment loss is recognized in accordance with KIFRS 1036 to the extent that the recoverable amount of the investment subsequently increases.

The Group continues to use the equity method when an investment in an associate becomes an investment in a joint venture or an investment in a joint venture becomes an investment in an associate. There is no remeasurement to fair value upon such changes in ownership interests.

When a group entity transacts with an associate or a joint venture of the Group, profits and losses resulting from the transactions with the associate or joint venture are recognized in the Group's consolidated financial statements only to the extent of interests in the associate or joint venture that are not related to the Group.

2.5 Interests in joint operations

A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

When a group entity undertakes its activities under joint operations, the Group as a joint operator recognizes in relation to its interest in a joint operation:

- its assets, Including its share of any assets held jointly
- its liabilities, Including its shares of any liabilities incurred jointly
- its revenue from the sale of its share of the output arising from the joint operation
- its share of the revenue from the sale of the output by the joint operation
- its expenses, Including its share of any expenses incurred jointly

The Group accounts for the assets, liabilities, revenues and expenses relating to its interest in a joint operation in accordance with the KIFRS applicable to the particular assets, liabilities, revenues and expenses.

When a group entity transacts with a joint operation in which a group entity is a joint operator (such as a sale or contribution of assets), the Group is considered to be conducting the transaction with the other parties to the joint operation, and gains and losses resulting from the transactions are recognized in the Group's consolidated financial statements only to the extent of other parties' interests in the joint operation.

When a group entity transacts with a joint operation in which a group entity is a joint operator (such as a purchase of assets), the Group does not recognize its share of the gains and losses until it resells those assets to a third party.

2.6 Goodwill

Goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business less accumulated impairment losses, if any.

For the purpose of impairment testing, goodwill is allocated to each of the Group's CGUs (or groups of CGUs) that is expected to benefit from the synergies of the combination.

A CGU to which goodwill has been allocated is tested for impairment annually, or more frequently when there is indication that the unit may be impaired. If the recoverable amount of the CGU is less than its book amount, the impairment loss is allocated first to reduce the book amount of any goodwill allocated to the unit and then to the other assets of the unit on a pro rata basis based on the book amount of each asset in the unit. Any impairment loss for goodwill is recognized directly in profit or loss. An impairment loss recognized for goodwill is not reversed in subsequent periods.

On disposal of the relevant CGU, the attributable amount of goodwill is included in the determination of the profit or loss on disposal. The Group's policy for goodwill arising on the acquisition of an associate is described in Note 2.4.

2.7 Non-current assets held for sale

Non-current assets and disposal groups are classified as held for sale if their book amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the non-current asset (or disposal group) is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

When the Group is committed to a sale plan involving loss of control of a subsidiary, all of the assets and liabilities of that subsidiary are classified as held for sale when the criteria described above are met, regardless of whether the Group will retain a non-controlling interest in its former subsidiary after the sale.

When the Group is committed to a sale plan involving disposal of an investment, or a portion of an investment, in an associate or joint venture, the investment or the portion of the investment that will be disposed of is classified as held for sale when the criteria described above are met, and the Group discontinues the use of the equity method in relation to the portion that is classified as held for sale. Any retained portion of an investment in an associate or a joint venture that has not been classified as held for sale continues to be accounted for using the equity method. The Group discontinues the use of the equity method at the time of disposal when the disposal results in the Group losing significant influence over the associate or joint venture.

After the disposal takes place, the Group accounts for any retained interest in the associate or joint venture in accordance with KIFRS 1039, unless the retained interest continues to be an associate or a joint venture, in which case the Group uses the equity method.

Non-current assets (and disposal groups) classified as held for sale are measured at the lower of their previous book amount and fair value, less costs to sell.

2.8 Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable for the sale of goods and rendering of services arising in the course of the ordinary activities of the Group. Revenue is reduced for value-added tax, estimated customer returns, rebates and trade discounts and is presented after eliminating intercompany transactions. The Group recognizes revenue when the amount of revenue can be measured reliably and it is probable that the economic benefits associated with the transaction will flow to the Group and when transaction meets the revenue recognition criteria specified by activity.

2.8.1 Sale of goods

Revenue from the sale of goods is recognized when the Group has transferred the significant risks and rewards of ownership of the goods to the buyer.

2.8.2 Rendering of services

Revenue from a contract to provide services is recognized by reference to the stage of completion of the contract. Depending on the nature of the transaction, the Group determines the stage of completion by reference to surveys of work performed, services performed to date as a percentage of total services to be performed or the proportion that costs incurred to date bear to the estimated total costs of the transaction, as applicable.

2.8.3 Dividend income and interest income

Dividend income from investments is recognized when the shareholders' right to receive payment has been established.

Interest income is accrued on a timely basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net book amount on initial recognition.

2.8.4 Rental income

The Group's policy for recognition of revenue from operating leases is described in Note 2.10.

2.9 Construction contract

Where the outcome of a construction contract can be estimated reliably, revenue and costs are recognized by reference to the stage of completion of the contract activity at the end of the reporting period, measured based on the proportion of contract costs incurred for work performed to date relative to the estimated total contract costs, except where this would not be representative of the stage of completion. Variations in contract work, claims and incentive payments are included to the extent that the amount can be measured reliably and its receipt is considered probable.

Where the outcome of a construction contract cannot be estimated reliably, contract revenue is recognized to the extent of contract costs incurred that it is probable will be recoverable. Contract costs are recognized as expenses in the period in which they are incurred.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognized as an expense immediately.

When contract costs incurred to date plus recognized profits less recognized losses exceed progress billing, the surplus is shown as amounts due from customers for contract work. For contracts where progress billings exceed contract costs incurred to date plus recognized profits less recognized losses, the surplus is shown as the amounts due to customers for contract work. Amounts received before the related work is performed are included in the consolidated statements of financial position, as a liability, as advances received. Amounts billed for work performed but not yet paid by the customer are included in the consolidated statements of financial position under trade and other receivables.

2.10 Lease

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

2.10.1 The Group as lessor

Amounts due from lessees under finance leases are recognized as receivables at the amount of the Group's net investment in the leases. Finance lease income is allocated to accounting periods, so as to reflect a constant periodic rate of return on the Group's net investment outstanding in respect to the leases.

Rental income from operating leases is recognized on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the book amount of the leased asset and recognized on a straight-line basis over the lease term.

2.10.2 The Group as lessee

Assets held under finance leases are initially recognized as assets of the Group at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the consolidated statements of financial position as a finance lease obligation.

Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognized immediately in profit or loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with the Group's general policy on borrowing costs (see Note 2.12). Contingent rentals are recognized as expenses in the periods in which they are incurred.

Operating lease payments are recognized as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rentals arising under operating leases are recognized as an expense in the period in which they are incurred.

2.11 Foreign currencies

The individual financial statements of each group entity are presented in the currency of the primary economic environment in which the entity operates (its functional currency). For the purpose of the consolidated financial statements, the results and financial position of each group entity are expressed in Korean won, which is the functional currency of the entity and the presentation currency for the consolidated financial statements.

In preparing the financial statements of the individual entities, transactions in currencies other than the entity's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences are recognized in profit or loss in the period in which they arise, except for:

- Exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings
- Exchange differences on transactions entered into in order to hedge certain foreign currency risks (see Note 2.25 below for hedging accounting policies)
- Exchange differences on monetary items receivable from or payable to a foreign operation for which settlement is neither planned nor likely to occur (therefore, forming part of the net investment in the foreign operation), which are recognized initially in other comprehensive income and reclassified from equity to profit or loss on disposal or partial disposal of the net investment.

For the purpose of presenting consolidated financial statements, the assets and liabilities of the Group's foreign operations are expressed in Korean won using exchange rates prevailing at the end of the reporting period. Income and expense items are translated at the average exchange rates for the period, unless exchange rates fluctuated significantly during that period, in which case the exchange rates at the dates of the transactions are used. Exchange differences arising, if any, are recognized in other comprehensive income and accumulated in

2.11 Foreign currencies (cont'd)

equity (attributed to non-controlling interests as appropriate).

On the disposal of a foreign operation (i.e., a disposal of the Group's entire interest in a foreign operation or a disposal involving loss of control over a subsidiary that includes a foreign operation or partial disposal of an interest in a joint arrangement or an associate that includes a foreign operation of which the retained interest becomes a financial asset), all of the accumulated exchange differences in respect to that operation attributable to the owners of the Company are reclassified to profit or loss. Any exchange differences that have previously been attributed to non-controlling interests are derecognized, but they are not reclassified to profit or loss.

In the case of a partial disposal (i.e., no loss of control) of a subsidiary that includes a foreign operation, the proportionate share of accumulated exchange differences are reattributed to non-controlling interests in equity and are not recognized in profit or loss. For all other partial disposals (i.e., partial disposals of associates or joint arrangements that do not result in the Group losing significant influence or joint control), the proportionate share of the accumulated exchange differences is reclassified to profit or loss.

Goodwill and fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the closing rate. Exchange differences arising are recognized in other comprehensive income.

2.12 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

All other borrowing costs are recognized in profit or loss in the period in which they are incurred.

2.13 Post-employment benefit costs and termination benefits

The Group operates a defined benefit pension plan. For post-employment benefit obligation, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each reporting period. Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding interest), is reflected immediately in the consolidated statements of financial position with a charge or credit recognized in other comprehensive income for the period in which they occur. Remeasurement recognized in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to profit or loss. Past service cost is recognized in profit or loss for the period of a plan amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset. Defined benefit costs are composed of service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements), net interest expense (income) and remeasurement.

The Group presents the service cost and net interest expense (income) components in profit or loss, and the remeasurement component in other comprehensive income. Curtailment gains and losses are accounted for as past service costs.

The post-employment benefit obligation recognized in the consolidated statements of financial position represents the actual deficit or surplus in the Group's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

A liability for a termination benefit is recognized at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognizes any related restructuring costs.

Contributions to defined contribution plans are recognized as an expense when employees have rendered service that entitles them to the contributions.

2.14 Share-based payment arrangements

Equity-settled share-based payments to employees are measured at the fair value of the equity instruments at the grant date.

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Group's estimate of equity instruments that will eventually vest. At the end of each reporting period, the Group revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognized in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment in other component of equity.

2.15 Current and deferred tax

Income tax expense represents the sum of the tax currently payable and deferred tax.

2.15.1 Current tax

The tax currently payable is based on taxable profit for the period. Taxable profit differs from profit as reported in the consolidated statement of profit or loss and comprehensive income because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

2.15.2 Deferred tax

Deferred tax is recognized on temporary differences between the book amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries and associates, and interests in joint ventures, except where the Group is able to control the reversal of the temporary difference, and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The book amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the book amount of its assets and liabilities.

Deferred tax assets and liabilities are offset if, and only if, the Group has a legally enforceable right to set off current tax assets against current tax liabilities, and the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities, which intend either to settle current tax liabilities and assets on a net basis, or to realize the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

For the purpose of measuring deferred tax liabilities and deferred tax assets for investment properties that are measured using the fair value model, the book amounts of such properties are presumed to be recovered entirely through sale, unless the presumption is rebutted. The presumption is rebutted when the investment property is depreciable and is held within a business model, whose objective is to consume substantially all of the economic benefits embodied in the investment properties over time, rather than through sale.

2.15.3 Current and deferred taxes for the year

Current tax and deferred tax are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current tax and deferred tax are also recognized in other comprehensive income or directly in equity, respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

2.16 Government grants

Government grants are not recognized until there is reasonable assurance that the Group will comply with the conditions attaching to them and that the grants will be received.

The benefit of a government loan at a below-market rate of interest is treated as a government grant, measured as the difference between proceeds received and the fair value of the loan based on prevailing market interest rates.

Government grants related to assets are presented in the consolidated statements of financial position by deducting the grant from the book amount of the asset. The related grant is recognized in profit or loss over the life of a depreciable asset as a reduced depreciation expense.

Government grants related to income are recognized in profit or loss on a systematic basis over the periods in which the Group recognizes as expenses the related costs for which the grants are intended to compensate. Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Group with no future-related costs are recognized in profit or loss in the period in which they become receivable.

2.17 Property, plant and equipment

Property, plant and equipment are initially stated at cost and subsequently recorded at cost, less accumulated depreciation, and accumulated impairment losses, except for land, which is recorded using revaluation model. The cost of an item of property, plant and equipment is directly attributable to their purchase or construction, which includes any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. It also includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located.

Subsequent costs are recognized in book amount of an asset or as a separate asset, if it is probable that future economic benefits associated with the assets will flow into the Group and the cost of an asset can be measured reliably. Routine maintenance and repairs are expensed as incurred.

The Group does not depreciate land. Depreciation expense is computed using the straight-line method, based on the estimated useful lives of the assets as follows:

	<u>Estimated useful lives (in years)</u>
Buildings	4-50
Structures	2-40
Machinery	2-20
Others	2-20

If each part of an item of property, plant and equipment has a cost that is significant in relation to the total cost of the item, then it is depreciated separately.

The Group reviews the depreciation method, the estimated useful lives and residual values of property, plant and equipment at the end of each annual reporting period. If expectations differ from previous estimates, the changes are accounted for as a change in an accounting estimate.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the book amount of the asset) is included in profit or loss for the period in which the property is derecognized.

2.18 Investment properties

Investment properties are properties held to earn rentals and/or for capital appreciation (including property under construction for such purposes). Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at fair value, with any gains or losses arising on fair value fluctuation recognized in profit or loss.

Subsequent costs are recognized in book amount of an asset or as a separate asset, if it is probable that future economic benefits associated with the assets will flow into the Group and the cost of an asset can be measured reliably. Routine maintenance and repairs are expensed as incurred.

An investment property is derecognized upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the book amount of the asset) is included in profit or loss for the period in which the property is derecognized.

2.19 Intangible assets

2.19.1 Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at cost, less accumulated amortization and accumulated impairment losses. Amortization is recognized on a straight-line basis over their estimated useful lives. The estimated useful life and amortization method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost, less accumulated impairment losses.

2.19.2 Internally generated intangible assets - research and development expenditure

Expenditure on research activities is recognized as an expense in the period in which it is incurred.

Expenditure arising from development (or from the development phase of an internal project) is recognized as an intangible asset if, and only if, the development project is designed to produce new or substantially improved products, and the Group can demonstrate the technical and economic feasibility and measure reliably the resources attributable to the intangible asset during its development.

Subsequent to initial recognition, internally generated intangible assets are reported at cost, less accumulated amortization and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

2.19.3 Intangible assets acquired in a business combination

Intangible assets that are acquired in a business combination and recognized separately from goodwill and are initially recognized at their fair value at the acquisition date. Subsequent to initial recognition, intangible assets acquired in a business combination are reported at cost, less accumulated amortization and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

2.19.4 Derecognition of intangible assets

An intangible asset is derecognized on disposal, or when no future economic benefits are expected from its use. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the book amount of the asset, are recognized in profit or loss when the asset is derecognized.

2.19.5 Amortization of intangible assets

Intangible assets (membership) with indefinite useful lives are not amortized. Intangible assets other than not amortized intangible assets are using the straight-line method, based on the estimated useful lives of the assets as follows:

	<u>Estimated useful lives (in years)</u>
Development costs	4-12
Industrial rights	5-10
Other intangible assets	2-20

2.20 Impairment of tangible and intangible assets other than goodwill

At the end of each reporting period, the Group reviews the book amounts of its tangible and intangible assets other than goodwill to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the CGU to which the asset belongs.

Memberships with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value, less costs to sell and value in use. If the recoverable amount of an asset (or a CGU) is estimated to be less than its book amount, the book amount of the asset (or the CGU) is reduced to its recoverable amount and the reduced amount is recognized in profit or loss.

When an impairment loss subsequently reverses, the book amount of the asset (or a CGU) is increased to the revised estimate of its recoverable amount, but so that the increased book amount does not exceed the book amount that would have been determined had no impairment loss been recognized for the asset (or the CGU) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

2.21 Inventories

Inventories are stated at the lower of cost and net realizable value. Cost of inventories is measured under the total average cost method and consist of the purchase price, cost of conversion and other costs incurred in bringing the inventories to their present location and condition. Net realizable value represents the estimated selling price for inventories, less all estimated costs of completion and costs necessary to make the sale.

When inventories are sold, the book amount of those inventories is recognized as an expense (cost of sales) in the period in which the related revenue is recognized. The amount of any write-down of inventories to net realizable value and all losses of inventories is recognized as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realizable value, is recognized as a reduction in the amount of inventories recognized as an expense in the period in which the reversal occurs.

2.22 Provisions

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its book amount is the present value of those cash flows (where the effect of the time value of money is material). The discount rate used is a pretax rate that reflects current market assessments of the time value of money and the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized in profit or loss as finance cost.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

At the end of each reporting period, the remaining provision balance is reviewed and assessed to determine if the current best estimate is being recognized. If the existence of an obligation to transfer economic benefit is no longer probable, the related provision is reversed during the period.

2.23 Financial instruments

Financial assets and financial liabilities are recognized when an entity becomes a party to the contractual provisions of the instruments. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities are added to, or deducted from, the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss ("FVTPL") are recognized immediately in profit or loss.

Financial assets are classified into the following specified categories: 'financial assets at FVTPL', 'held-to-maturity investments', 'available-for-sale ("AFS") financial assets' and 'loans and receivables'. The classification depends on the nature and purpose of the financial assets, and is determined at the time of initial recognition.

2.23.1 Effective interest method

The effective interest method is a method of calculating the amortized cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net book amount on initial recognition.

Interest income is recognized on an effective interest basis for debt instruments other than those financial assets classified as at FVTPL.

2.23.2 Financial assets at FVTPL

FVTPL includes financial assets classified as held for trading and financial assets designated at FVTPL upon initial recognition. A financial asset is classified as FVTPL if it has been acquired principally for the purpose of selling or repurchasing it in the near term. All derivative assets, except for derivatives that are designated and effective hedging instruments, are classified as held-for-trading financial assets. Financial assets at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognized in profit or loss.

2.23.3 Held-to-maturity investments

Non-derivative financial assets with fixed or determinable payments and fixed maturity dates that the Group has the positive intent and ability to hold to maturity are classified as held-to-maturity investments. Held-to-maturity investments are measured at amortized cost using the effective interest method, less any impairment, with revenue recognized on an effective-yield basis.

2.23.4 AFS financial assets

AFS financial assets are non-derivatives that are either designated as AFS or are not classified as (a) loans and receivables, (b) held-to-maturity investments or (c) financial assets at FVTPL.

They are subsequently measured at fair value at the end of each reporting period. Changes in the book amount of AFS monetary financial assets are recognized in profit or loss. Other changes in the book amount of AFS financial assets are recognized in other comprehensive income (as investments revaluation reserve). When the investment is disposed of, or is determined to be impaired, the cumulative gain or loss previously accumulated in other comprehensive income is reclassified to profit or loss.

Dividends on AFS equity instruments are recognized in profit or loss when the Group's right to receive the dividends is established.

AFS equity investments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured and derivatives that are linked to and must be settled by delivery of such unquoted equity investments are measured at cost, less any identified impairment losses at the end of each reporting period.

2.23.5 Loans and receivables

No-derivative financial assets that have fixed or determinable payments that are not quoted in an active market are classified as 'loans and receivables.' Loans and receivables are measured at amortized cost using the effective interest method, less any impairment. Interest income is recognized by applying the effective interest rate, except for short-term receivables when the effect of discounting is immaterial.

2.23.6 Impairment of financial assets

Financial assets, other than those at FVTPL, are assessed for indicators of impairment at the end of each reporting period. Financial assets are considered to be impaired when there is objective evidence that more events occurred after the initial recognition of the financial asset and the estimated future cash flows of the investment have been affected.

For AFS equity investments, a significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment.

For certain categories of financial asset, such as trade receivables, assets that are assessed not to be impaired individually are, in addition, assessed for impairment on a collective basis. Objective evidence of impairment for a portfolio of receivables could include the Group's past experience of collecting payments, an increase in the number of delayed payments in the portfolio past the average credit period, as well as observable changes in national or local economic conditions that correlate with default on receivables.

For financial assets carried at amortized cost, the amount of the impairment loss recognized is the difference between the asset's book amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

For financial assets that are carried at cost, the amount of the impairment loss recognized is the difference between the asset's book amount and the present value of estimated future cash flows, discounted at the current market rate of return for a similar financial asset. Such impairment loss will not be reversed in subsequent periods.

2.23.6 Impairment of financial assets (cont'd)

When an AFS financial asset is considered to be impaired, cumulative gains or losses previously recognized in other comprehensive income are reclassified to profit or loss for the period.

For financial assets measured at amortized cost, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through profit or loss to the extent that the book amount of the investment at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment not been recognized.

In respect to AFS equity securities, impairment losses previously recognized in profit or loss are not reversed through profit or loss. Any increase in fair value subsequent to an impairment loss is recognized in other comprehensive income. In respect to AFS debt securities, impairment losses are subsequently reversed through profit or loss if an increase in the fair value of the investment can be objectively related to an event occurring after the recognition of the impairment loss.

2.23.7 Derecognition of financial assets

The Group derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's book amount and the sum of the consideration received and receivable, and the cumulated gain or loss that had been recognized in other comprehensive income and accumulated in equity is recognized in profit or loss.

On derecognition of a financial assets other than in its entirety (e.g., when the Group retains an option to repurchase part of a transferred asset, or it retains a residual interest, and such an retained interest indicates that the transferor has neither transferred nor retained substantially all the risks and rewards of ownership and has retained control of the transferred asset), the Group allocates the previous book amount of the financial asset between the part it continues to recognize under continuing involvement and the part it no longer recognizes on the basis of the relative fair value of those parts on the date of the transfer.

2.24 Financial liabilities and equity instruments

2.24.1 Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or equity in accordance with the substance of the contractual arrangement and the definitions of financial liability and an equity instrument.

2.24.2 Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Group are recognized at the proceeds received, net of direct issue costs.

Repurchase of the Group's own equity instruments is recognized and deducted directly in equity. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Group's own equity instruments.

2.24.3 Compound instruments

The component parts of compound instruments (convertible bonds) issued by the Group are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and equity instrument. Conversion option that will be settled by the exchange of a fixed amount of cash or another financial asset for a fixed number of the Group's own equity instruments is an equity instrument.

At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for a similar non-convertible instrument. This amount is recorded as a liability on an amortized cost basis using the effective interest method until extinguished upon conversion or at the instrument's maturity date.

The conversion option classified as equity is determined by deducting the amount of the liability component from the fair value of the compound instrument as a whole. This is recognized and included in equity, net of income tax effects, and is not subsequently remeasured. In addition, the conversion option classified as equity will remain in equity until the conversion option is exercised, in which case, the balance recognized in equity will be transferred to share premium. No gain or loss is recognized in profit or loss upon conversion or expiration of the conversion option.

2.24.4 Financial liabilities

Financial liabilities are recognized when the Group becomes a party to the contractual provisions of the instruments. Financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the issue of financial liabilities are deducted from the fair value of the financial liabilities on initial recognition. Transaction costs directly attributable to acquisition of financial liabilities at FVTPL are recognized immediately in profit or loss.

Financial liabilities are classified as either financial liabilities at FVTPL or other financial liabilities.

2.24.5 Financial liabilities at FVTPL

Financial liabilities are classified as financial liabilities at FVTPL when the financial liability is either held for trading or it is designated as financial liabilities at FVTPL.

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss incorporates any interest paid on the financial liability and is included in the 'Other non-operating income and expenses' line item in the consolidated statement of profit or loss.

2.24.6 Other financial liabilities

Other financial liabilities are subsequently measured at amortized cost using the effective interest method, with interest expense recognized on an effective yield basis.

2.24.7 Financial guarantee contracts

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the terms of a debt instrument.

Financial guarantee contract liabilities are initially measured at their fair values and, if not designated as financial liabilities at FVTPL, are subsequently measured at the higher of:

- the amount of the obligation under the contract, as determined in accordance with KIFRS 1037 *Provisions, Contingent Liabilities and Contingent Assets* and
- the amount initially recognized, less cumulative amortization recognized in accordance with the KIFRS 1018 *Revenue*

2.24.8 Derecognition of financial liabilities

The Group derecognizes financial liabilities when the Group's obligations are discharged, canceled or expired. The difference between the book amount of the financial liability derecognized and the consideration paid and payable is recognized in profit or loss.

2.25 Derivative financial instruments

The Group enters into a variety of derivative financial instruments to manage its exposure to interest rate and foreign exchange rate risk, including foreign exchange forward contracts, interest rate swaps and cross currency swaps.

Derivatives are initially recognized at fair value at the date the derivative contract is entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognized in profit or loss immediately, unless the derivative is designated and effective as a hedging instrument, in such case, the timing of the recognition in profit or loss depends on the nature of the hedge relationship.

A derivative with a positive fair value is recognized as a financial asset; a derivative with a negative fair value is recognized as a financial liability. A derivative is presented as a non-current asset or a non-current liability, if the remaining maturity of the instrument is more than 12 months and it is not expected to be realized or settled within 12 months. Other derivatives are presented as current assets or current liabilities.

2.25.1 Embedded derivatives

Derivatives embedded in non-derivative host contracts are treated as separate derivatives when they meet the definition of a derivative, their risks and characteristics are closely related to those of the host contracts and the contracts are not measured at FVTPL.

2.25.2 Hedge accounting

The Group designates certain hedging instruments, which include derivatives, embedded derivatives and non-derivatives in respect to foreign currency risk, as either fair value hedges, cash flow hedges or hedges of net investments in foreign operations.

At the inception of the hedge relationship, the Group documents the relationship between the hedging instrument and the hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Group documents whether the hedging instrument is highly effective in offsetting changes in fair values or cash flows of the hedged item.

2.25.3 Fair value hedges

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recognized in profit or loss immediately, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. The change in the fair value of the hedging instrument and the change in the hedged item attributable to the hedged risk are recognized in the line of consolidated statement of profit or loss as 'financial income and expenses'.

Hedge accounting is discontinued when the Group revokes the hedging relationship, when the hedging instrument expires or is sold, terminated or exercised, or when it no longer qualifies for hedge accounting. The fair value adjustment to the book amount of the hedged item arising from the hedged risk is amortized to profit or loss from that date.

2.25.4 Cash flow hedges

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognized in other comprehensive income. The gain or loss relating to the ineffective portion is recognized immediately in profit or loss, and is included in the 'finance income and expenses' line item.

Amounts previously recognized in other comprehensive income and accumulated in equity are reclassified to profit or loss in the periods when the hedged item is recognized in profit or loss, in the same line of the consolidated statements of comprehensive income as the recognized hedged item. Reclassified amounts are recognized in the consolidated statement of profit or loss as related to the hedged items.

Hedge accounting is discontinued when the Group revokes the hedging relationship, when the hedging instrument expires or is sold, terminated or exercised, or it no longer qualifies for hedge accounting. Any gain or loss accumulated in equity at that time remains in equity, and is recognized when the forecast transaction is ultimately recognized in profit or loss. When a forecast transaction is no longer expected to occur, the gain or loss accumulated in equity is recognized immediately in profit or loss.

2.26 Fair value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these consolidated financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of KIFRS 1102, *Share-based Payment*, leasing transactions that are within the scope of KIFRS 1017, *Leases*, and measurements that have some similarities to fair value but are not fair value, such as net realizable value in KIFRS 1002, *Inventories*, or value in use in KIFRS 1036, *Impairment of Assets*.

In addition, for financial reporting purposes, fair value measurements are categorized into Levels 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in their entirety, which are described in Note 10.

2.27 Approval of consolidated financial statements

The consolidated financial statements of the Group were approved by the Board of Directors on March 5, 2018 and will be finalized at the annual general meeting of shareholders on March 30, 2018.

3. Significant accounting judgements and key sources of estimation uncertainties

In the application of the Group's accounting policies, which are described in Note 2, management is required to make judgments, estimates and assumptions about the book amounts of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

3.1 Revenue recognition

Revenue from a construction contracts and service is recognized by reference to the stage of completion of the contract. The stage of completion of the contract is determined as reasonable estimation and is subject to change as related factors change.

3.2 Impairment of goodwill

Determining whether goodwill is impaired requires an estimation of the recoverable amount of the CGUs to which goodwill has been allocated. The recoverable amount calculation requires the directors to estimate the future cash flows expected to arise from the CGU and a suitable discount rate in order to calculate the present value.

3.3 Defined benefit obligation

The Group's defined benefit obligation is determined based on the actuarial valuation carried out at the end of each annual reporting period. Actuarial assumptions are the Group's best estimates of the variables, such as discount rates, rates of expected future salary increases and mortality rates.

3.4 Provisions

Provisions for the expected cost of warranty obligations are recognized at the best estimate of the expenditure required to settle the Group's current and future obligations. Provisions are determined by the estimate based on past experience.

3.5 Revaluation model on land and fair value model on investment properties

As stated in Note 12 and Note 14, the Group uses evaluation technique, including inputs that are not based on observable market data to assess revalued amount of land classified as property, plant and equipment and fair value of investment property. The Group's management believes that the evaluation technique and assumptions that are used for valuation on land and investment in real properties are fair.

3.6 Deferred tax

Recognition and measurement of deferred tax assets and liabilities require the management's judgment, in particular, whether to recognize if the scope of deferred tax assets is affected by management's judgment and assumption in the future.

3.7 Estimated useful lives of property, plant, equipment and intangible assets

Useful lives for depreciation and amortization are determined by the management's judgment.

3. Significant accounting judgements and key sources of estimation uncertainties (cont'd)

3.8 Determination of consolidation scope

As at December 31, 2017, the Parent Company holds 37.8% of the voting rights of Doosan Heavy Industries & Construction and Doosan Heavy Industries & Construction holds 36.3% and 42.7% of the voting rights of Doosan Infracore and Doosan Engine respectively. Most of the remaining stakes are held by small shareholders of less than 1%. Management of the Group has assessed whether the Group controls the above entities in accordance with the principles of control and presentation as set out in first adoption date of IAS 1110 (January 1, 2013) and at the end of each subsequent reporting period. The executives of Group concluded that they have control over the absolute size of the voting rights of the Group and the relative size of other shareholding voting rights and the degree of shareholding of other voting rights holders.

4. Financial risk management

The Group is exposed to various financial risks, such as market (foreign currency risk and interest rate risk), credit and liquidity related to the operations of the Group. The purpose of risk management policy is to minimize potential risks, which could have an adverse effect on financial performance.

Financial risk management activities are performed by Treasury and International Finance department, in accordance with the aforementioned documented risk management policies. In addition, the Group enters into derivative contracts to hedge against certain risks.

4.1 Market risk

4.1.1 Foreign currency risk

The Group's exposure to the risk of changes in foreign exchange rates relates primary to the Group's international operating activities. The Group's objectives of foreign currency risk management is to minimize uncertainty and volatility arising from fluctuations in foreign currency. Foreign currency risk is managed in accordance with to the Group's policy on foreign currency, and currency trading for speculative purpose is prohibited.

The Groups reduces exposure to foreign currency risk by matching the inflow and the outflow of foreign currencies (natural hedge) and manages foreign currency risk by using currency derivatives, such as currency forwards, for the remaining exposure.

The book amount of the Group's monetary assets and liabilities denominated in foreign currencies, which represents the maximum exposure to foreign currency risk as at December 31, 2017 and 2016, is as follows (Korean won in millions):

	December 31, 2017					
	USD	EUR	JPY	GBP	Others (*1)	Total
Assets	₩ 2,162,023	₩ 395,406	₩ 14,819	₩ 218,794	₩ 441,445	₩ 3,232,487
Liabilities	2,528,463	614,422	78,340	184,674	34,488	3,440,387
	₩ (366,440)	₩ (219,016)	₩ (63,521)	₩ 34,120	₩ 406,957	₩ (207,900)
	December 31, 2016					
	USD	EUR	JPY	GBP	Others (*1)	Total
Assets	₩ 2,195,408	₩ 281,560	₩ 8,413	₩ 85,847	₩ 587,833	₩ 3,159,061
Liabilities	3,417,238	565,568	66,640	47,198	161,700	4,258,344
	₩ (1,221,830)	₩ (284,008)	₩ (58,227)	₩ 38,649	₩ 426,133	₩ (1,099,283)

(*1) Others are assets and liabilities denominated in foreign currencies other than USD, EUR, JPY and GBP.

Net gain (loss) on foreign currency translation in profit or loss for the years ended December 31, 2017 and 2016, is ₩ 148,611 million and ₩ (55,732) million, respectively.

4. Financial risk management (cont'd)

The table below summarizes the impact of increases/decreases of currency exchange rates on profit before income tax expense for the period. The analysis is based on the assumption that the currency exchange rates has increased/decreased by 10% with all other variables held constant (Korean won in millions).

	Impact on profit (loss) before income tax expense	
	2017	2016
10% Increase	₩ (20,790)	₩ (109,928)
10% Decrease	20,790	109,928

The above sensitivity analysis is based on monetary assets and liabilities denominated in foreign currencies other than the Group's functional currency as at December 31, 2017 and 2016.

4.1.2 Interest rate risk

The Group's interest rate risk is related to borrowings and bank deposits with floating interest rates, and related interest income and expense are exposed to interest rate risk. The Group is exposed to interest rate risk mainly due to its borrowing with floating interest rates. The purpose of interest rate risk management is to minimize uncertainty and financial expense arising from interest rate fluctuation.

To manage its interest rate risk, the Group minimizes external borrowings using internal funds and reduces borrowings with high interest rates and maintains an appropriate balance between borrowings with floating interest rate and fixed-interest rate and short-term and long-term borrowings. The Group manages its interest rate risk preemptively through regular monitoring and adjustments to the changing domestic and overseas markets conditions and nature of its interest rates.

The book amount of the Group's financial assets and liabilities with floating interest rates exposed to interest rate risk as at December 31, 2017 and 2016, is as follows (Korean won in millions):

	December 31, 2017	December 31, 2016
Financial assets	₩ 546,293	₩ 714,887
Financial liabilities	(3,562,407)	(5,194,486)
	₩ (3,016,114)	₩ (4,479,599)

The table below summarizes the impact of increases/decreases of interest rates on profit before income tax expense. The analysis is based on the assumption that the interest rates has increased/decreased by 100 basis point with all other variables held constant (Korean won in millions):

	Impact on profit(loss) before income tax expense	
	2017	2016
Increase	₩ (30,161)	₩ (44,796)
Decrease	30,161	44,796

4. Financial risk management (cont'd)

4.1.3 Price risk

The Group is exposed to equity price risks arising from its listed equity investments among AFS equity investments. The Group periodically measures the risk as the fair value or future cash flows of equity investments may fluctuate due to the changes in market prices. Important investments in the Group's portfolio are individually managed, and acquisition and disposal are approved by the Board of Directors.

4.2 Credit risk

The credit risk refers to risk of financial losses to the Group when the counterparty defaults on the obligations of the contract. The credit risk arises from AFS financial assets, which are not equity securities, deposits in financial institution, financial derivatives and guarantee limit as well as from the Group's normal transaction and investing activity. To manage credit risk, the Group evaluates the creditworthiness of each customer or counterparty considering the financial status, past experience and other factors. The Group establishes credit limit for each customer and counterparty.

The Group evaluates the creditworthiness using open financial information and information provided by credit rating institution when the Group contracts with new customers. The Group decides credit transaction limit and is provided with collateral and guarantee based on evaluation.

Also, the Group reevaluates customers' creditworthiness periodically, reassesses credit transaction limit and readjusts level of collateral. The Group reports the present condition of delayed collection and collection measures periodically to financial assets, which has delayed collection and takes measures by causes of delay.

The book amount of the Group's financial assets and liabilities, which represents the maximum exposure to credit risk as at December 31, 2017 and 2016, is as follows (Korean won in millions):

	December 31, 2017	December 31, 2016
Loans and receivables:		
Cash and cash equivalents	₩ 2,344,600	₩ 2,019,319
Financial instruments	314,926	248,931
Trade and other receivables	3,884,358	3,973,014
Guarantee deposits provided	371,865	330,565
Held-to-maturity financial assets	24,388	6,215
AFS financial assets (excluding equity securities)	81,232	225,664
Derivative assets	132,035	105,855
	<u>₩ 7,153,404</u>	<u>₩ 6,909,563</u>

Apart from the above financial assets, the maximum exposure to credit risk of financial guarantee contract is the maximum amount to be paid if the guarantee will be charged (see Note 33).

4. Financial risk management (cont'd)

The aging analysis of trade and other receivables as at December 31, 2017 and 2016, is as follows (Korean won in millions):

		December 31, 2017						
		Individually assessed receivables	Receivables assessed for impairment on a collective basis				Total	
		Within due	Less than 3 months	3-6 months	6-12 months	More than 12 months		
Trade receivables	₩ 2,316,715	₩ 1,234,182	₩ 90,599	₩ 19,237	₩ 12,170	₩ 58,707	₩ 3,731,610	
Other receivables and loans	2,351,459	91,134	23,626	3,961	3,451	39,447	2,513,078	
Accrued income	134,264	4,449	-	-	-	-	138,713	
	<u>₩ 4,802,438</u>	<u>₩ 1,329,765</u>	<u>₩ 114,225</u>	<u>₩ 23,198</u>	<u>₩ 15,621</u>	<u>₩ 98,154</u>	<u>₩ 6,383,401</u>	

		December 31, 2016						
		Individually assessed receivables	Receivables assessed for impairment on a collective basis				Total	
		Within due	Less than 3 months	3-6 months	6-12 months	More than 12 months		
Trade receivables	₩ 2,530,577	₩ 1,010,905	₩ 153,118	₩ 22,406	₩ 41,216	₩ 219,643	₩ 3,977,865	
Other receivables and loans	2,200,029	64,932	27,490	15,813	2,070	66,462	2,376,796	
Accrued income	120,407	28,602	-	-	-	-	149,009	
	<u>₩ 4,851,013</u>	<u>₩ 1,104,439</u>	<u>₩ 180,608</u>	<u>₩ 38,219</u>	<u>₩ 43,286</u>	<u>₩ 286,105</u>	<u>₩ 6,503,670</u>	

The Group has recognized the provision for impairment of ₩2,485,085 million for the above trade and other receivables as at December 31, 2017 (2016: ₩ 2,515,818 million).

Provision for impaired trade receivables is recognized by applying appropriate allowance rate for receivables that are assessed to be impaired individually due to insolvency, bankruptcy and others.

A group of financial assets that is not individually significant but have similar credit risk characteristics is assessed for impairment on a collective basis. Provision for impaired trade receivables is recognized based on aging analysis and the Group's past experience of receivables collection.

AFS financial assets, held-to-maturity financial assets, deposits in financial institutions and derivative instruments are individually assessed to be impaired.

4. Financial risk management (cont'd)

4.3 Liquidity risk

Liquidity risk is the risk that the Group is unable to meet its payment obligations arising from financial liabilities as they fall due.

The Group regularly establishes funding plan in order to manage liquidity risk. Ongoing analysis and review on the budget and actual cash outflow to correspond maturity structure of financial assets and financial liabilities have been made.

Maturity analysis of financial liabilities except for derivatives as at December 31, 2017 and 2016, is as follows (Korean won in millions):

		December 31, 2017				
		Nominal cash flows according to contract				
		Less than				More than
	Book amount	Total	1 year	1–2 years	2–5 years	5 years
Financial liabilities	₩ 17,412,301	₩ 17,569,447	₩ 11,684,559	₩ 2,176,853	₩ 2,399,047	₩ 1,308,988
Interest on financial liabilities	-	805,089	336,544	152,187	239,833	76,525
	<u>₩ 17,412,301</u>	<u>₩ 18,374,536</u>	<u>₩ 12,021,103</u>	<u>₩ 2,329,040</u>	<u>₩ 2,638,880</u>	<u>₩ 1,385,513</u>
		December 31, 2016				
		Nominal cash flows according to contract				
		Less than				More than
	Book amount	Total	1 year	1–2 years	2–5 years	5 years
Financial liabilities	₩ 16,759,000	₩ 16,827,121	₩ 11,257,242	₩ 2,620,500	₩ 2,905,120	₩ 44,259
Interest on financial liabilities	-	664,113	310,421	174,731	177,990	971
	<u>₩ 16,759,000</u>	<u>₩ 17,491,234</u>	<u>₩ 11,567,663</u>	<u>₩ 2,795,231</u>	<u>₩ 3,083,110</u>	<u>₩ 45,230</u>

The above-mentioned maturity analysis is based on undiscounted cash flow according to the contract, which is different from non-derivative liabilities in the consolidated statements of financial position. Apart from the above non-derivative liabilities, as at December 31, 2017, financial guarantee contract liabilities of the Group are explained in Note 33.

4.4 Capital risk

The Group performs capital risk management to maintain its ability to continuously provide profits to shareholders and parties in interest, and to maintain optimum capital structure to reduce capital expenses.

Consistent with others in the industry, the Group monitors capital on the basis of debt-to-equity ratio. Debt-to-equity ratio calculated as total liabilities divided by equity is used as an index to manage the Group's capital similar to overall industry practice.

Debt-to-equity ratios as at December 31, 2017 and 2016, are as follows (Korean won in millions):

	December 31, 2017	December 31, 2016
Total liabilities	₩ 21,165,604	₩ 20,763,947
Total equity	7,603,418	7,900,858
Debt-to-equity ratio	<u>278.37%</u>	<u>262.81%</u>

5 Restricted financial assets

Details of restricted financial assets as at December 31, 2017 and 2016, are as follows (Korean won in millions):

	December 31, 2017	December 31, 2016	Description
Cash and cash equivalent	₩ 14,132	₩ 10,335	Collateral for advance payments and others
Short-term financial instruments	130,876	166,121	Government R&D(*1), establish the right of pledge and advances from construction contracts(*2), shared growth fund, collaterals for borrowings and others
Long-term financial instruments	594	2,310	Bank transaction deposits, establish the right of pledge and others
Guarantee deposits provided	69,754	22,020	Reserves for repayments related to asset backed loans
	<u>₩ 215,356</u>	<u>₩ 200,786</u>	

(*1) It can be used only for the purpose for implementing the national policy research and development specific issues.

(*2) It can be used only for performance of construction.

6 Short-term and long-term investment securities

Details of short and long-term investment securities as at December 31, 2017 and 2016, are as follows (Korean won in millions):

		December 31, 2017	December 31, 2016
Short-term investment securities	Financial assets at fair value through profit or loss	₩ 34,182	₩ -
	Available-for-sale financial assets	80,000	235,217
	Held-to-maturity financial assets	19,793	6,142
		<u>133,975</u>	<u>241,359</u>
Long-term investment securities	Available-for-sale financial assets	201,380	290,181
	Held-to-maturity financial assets	4,595	73
		<u>205,975</u>	<u>290,254</u>
		<u>₩ 339,950</u>	<u>₩ 531,613</u>

Investment securities are measured at cost or fair value depending on the presence or absence of market prices in an active market.

6. Short-term and long-term investment securities (cont'd)

Details of financial assets at fair value through profit or loss, available-for-sale financial assets and held-to-maturity financial assets as at December 31, 2017 and 2016, are as follows (Korean won in millions):

			December 31, 2017	December 31, 2016
Financial assets at fair value through profit or loss	Marketable equity securities	Woori Bank	₩ 34,182	₩ -
Available-for-sale financial assets	Marketable equity securities	Infinitt Healthcare Co., Ltd. and others	414	939
	Non-marketable equity securities	Korea Defense Industry Association and others	199,734	298,795
	Beneficiary certificate	Gold Spoon JY 2nd Co., Ltd and others.	81,193	225,598
	Debt securities	Government bonds and Public bonds	39	66
			<u>281,380</u>	<u>525,398</u>
Held-to-maturity financial assets	Debt securities	Government bonds and Public bonds	94	72
	Other debt securities	Others	24,294	6,143
			<u>24,388</u>	<u>6,215</u>
			<u>₩ 339,950</u>	<u>₩ 531,613</u>

Changes in the fair value of available-for-sale financial assets for the periods ended December 31, 2017 and 2016, are as follows (Korean won in millions):

	2017			
	Beginning balance	Valuation	Disposals and others	Ending balance
Marketable equity securities	₩ 2,975	₩ 7,942	₩ (9,517)	₩ 1,400
Non-marketable equity securities	(14,923)	3,783	1,692	(9,448)
Tax effect	(3,179)	(2,320)	1,994	(3,505)
Consolidation adjustments	1,023	(6,278)	3,603	(1,652)
	<u>₩ (14,104)</u>	<u>₩ 3,127</u>	<u>₩ (2,228)</u>	<u>₩ (13,205)</u>
	2016			
	Beginning balance	Valuation	Disposals and others	Ending balance
Marketable equity securities	₩ 301,511	₩ 5,907	₩ (304,443)	₩ 2,975
Non-marketable equity securities	7,727	(27,019)	4,369	(14,923)
Tax effect	(75,898)	3	72,716	(3,179)
Consolidation adjustments	(22,343)	25,489	(2,123)	1,023
	<u>₩ 210,997</u>	<u>₩ 4,380</u>	<u>₩ (229,481)</u>	<u>₩ (14,104)</u>

7. Trade and other receivables

Trade and other receivables as at December 31, 2017 and 2016, consist of the following (Korean won in millions):

		December 31, 2017			
		Gross	Present value discount	Provision for impairment	Book amount
Current:					
Trade receivables	₩	3,712,786	₩ (13,001)	(1,371,448)	₩ 2,328,337
Other receivables		498,212	-	(165,829)	332,383
Accrued income		138,713	-	(34,131)	104,582
Short-term loans		199,601	-	(136,450)	63,151
	₩	<u>4,549,312</u>	<u>₩ (13,001)</u>	<u>₩ (1,707,858)</u>	<u>₩ 2,828,453</u>
Non-current:					
Trade receivables		18,824	-	(246)	18,579
Other receivables		20,000	(890)	(8,751)	10,359
Long-term loans		1,795,265	(69)	(768,230)	1,026,966
	₩	<u>1,834,089</u>	<u>₩ (959)</u>	<u>₩ (777,227)</u>	<u>₩ 1,055,903</u>
		December 31, 2016			
		Gross	Present value discount	Provision for impairment	Book amount
Current:					
Trade receivables	₩	3,968,715	₩ (12,993)	(1,522,646)	₩ 2,433,076
Other receivables		538,811	-	(170,337)	368,474
Accrued income		149,009	-	(31,449)	117,560
Short-term loans		256,138	-	(137,386)	118,752
	₩	<u>4,912,673</u>	<u>₩ (12,993)</u>	<u>₩ (1,861,818)</u>	<u>₩ 3,037,862</u>
Non-current:					
Trade receivables		9,150	-	(257)	8,893
Other receivables		9,945	(1,732)	(6,039)	2,174
Long-term loans		1,571,902	(113)	(647,704)	924,085
	₩	<u>1,590,997</u>	<u>₩ (1,845)</u>	<u>₩ (654,000)</u>	<u>₩ 935,152</u>

7. Trade and other receivables (cont'd)

Movements in the provision for impairment of trade and other receivables for the year ended December 31, 2017, are as follows (Korean won in millions):

	Beginning balance	Provision for impaired receivables during the year	Write off	Others(*1)	Ending balance
Current:					
Trade receivables	₩ 1,522,646	₩ (9,930)	₩ (161,286)	₩ 20,017	₩ 1,371,448
Non-trade receivables	170,337	28,111	(1,780)	(30,839)	165,829
Accrued revenues	31,449	2,682	-	-	34,131
Short-term loans	137,385	(58)	-	(877)	136,450
Non-current:					
Trade receivables	258	(12)	-	-	246
Non-trade receivables	6,039	(4,994)	-	7,706	8,751
Long-term loans	647,704	120,586	(60)	-	768,230
	<u>₩ 2,515,818</u>	<u>₩ 136,385</u>	<u>₩ (163,126)</u>	<u>₩ (3,993)</u>	<u>₩ 2,485,085</u>

(*1) Changes from reclassification between current and non-current asset, business combination, exchange differences and others.

The creation(reversal) of provision for impaired trade receivables has been included in 'selling and administrative expense' in the consolidated statement of profit or loss. And that of other receivables have been included in 'other operating expense'.

8. Inventories

Inventories as at December 31, 2017 and 2016, are summarized as follows (Korean won in millions):

	December 31, 2017			December 31, 2016		
	Acquisition cost	Valuation allowance	Book amount	Acquisition cost	Valuation allowance	Book amount
Merchandise	₩ 375,494	₩ (29,436)	₩ 346,058	₩ 377,802	₩ (35,264)	₩ 342,538
Finished goods	599,154	(34,644)	564,510	491,542	(40,548)	450,994
Work in progress	482,951	(33,778)	449,173	463,506	(38,814)	424,692
Raw materials	748,316	(55,613)	692,703	692,418	(50,954)	641,464
Materials in transit	258,317	-	258,317	220,824	-	220,824
Supplies	36,878	(334)	36,544	31,595	(247)	31,348
Land	-	-	-	41,099	-	41,099
Others	4,321	-	4,321	1,188	-	1,188
	<u>₩ 2,505,431</u>	<u>₩ (153,805)</u>	<u>₩ 2,351,626</u>	<u>₩ 2,319,974</u>	<u>₩ (165,827)</u>	<u>₩ 2,154,147</u>

Loss (reversal of loss) on inventory valuation (charged to the cost of sales) amounted to ₩ (12,022) million and ₩ (18,550) million for the years ended December 31, 2017 and 2016, respectively.

9. Derivatives

Details of gain and loss on valuation of derivatives as at December 31, 2017 and 2016, are as follows (Korean won in millions, foreign currency in thousands):

Buy		Sell		December 31, 2017			
Currency	Amount	Currency	Amount	Derivatives valuation assets (liabilities)	Gain (loss) on valuation of derivatives	Accumulated other comprehensive income(*1)	Firm commitment assets (liabilities)

				₩ (207,627)	₩ (124,688)	₩ 37,464	₩ 159,410		

(*1) Accumulated other comprehensive income before tax effect.

(*2) The Group designated in foreign currency long-term borrowings as hedging instruments to hedge the changes in the fair value of firm commitment.

(*3) DEC, a subsidiary, participated in SOC projects and other infrastructure projects, including Shinbundang Line, Shinbundang extension Line, Daegu 4th beltway, Masan Sewer Pipeline BTL, Suwon-Gwangmyeong Road, Gwanggyo Power Center, etc. as a construction investor. To invite financial investors, DEC entered into a put option contract (KRW 19 billion). DEC classified the contract as financial derivatives and recognized the fluctuation of option value as loss on valuation of derivatives and derivatives liabilities.

10. Financial instruments by category

Categories of financial instruments as at December 31, 2017 and 2016, are as follows (Korean won in millions):

	December 31, 2017

Derivatives for hedging	-	40,833	-	40,833
	<u>90,822</u>	<u>106,196</u>	<u>137,373</u>	<u>334,391</u>
Financial liabilities:				
Financial liabilities at fair value through profit or loss	-	(44,243)	-	(44,243)
Derivatives for hedging	-	(269,238)	-	(269,238)
	<u>-</u>	<u>(313,481)</u>	<u>-</u>	<u>(313,481)</u>
	<u>₩ 90,822</u>	<u>₩ (207,285)</u>	<u>₩ 137,373</u>	<u>₩ 20,910</u>

The above table does not include information on financial assets and liabilities, which are not measured at fair value because there are no material differences between the fair values and the book amounts.

Definition for each fair value hierarchy levels of the above financial instruments, are as follows:

- Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities
- Level 2: Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly
- Level 3: Inputs that are not based on observable market data (unobservable inputs)

The fair value of financial instruments traded in active markets is based on quoted market prices at the dates of the consolidated statements of financial position. These instruments are included in Level 1. Instruments included in Level 1 comprise primarily listed equity investments classified as trading securities or available-for-sale securities.

10. Financial instruments by category (cont'd)

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. These valuation techniques maximize the use of observable market data where it is available and rely as little as possible on entity-specific estimates. If all significant inputs required for fair value of an instrument are observable, the instrument is included in Level 2.

If one or more of the significant inputs is not based on observable market data, the instrument is included in Level 3.

Valuation techniques and the inputs used in fair value measurements of derivative (level 2), are as follows:

Valuation technique	Observable inputs	Explanation of input parameters
Discounted cash flow method	Forward exchange rate	It is based on forward exchange rate, disclosed on the market that remaining period is the same until maturity of forward contracts. If the forward exchange rate is not disclosed on the market, it is calculated by using interpolation method.
	Discount rate	It is determined by using yield curve that is disclosed at the end of the reporting period.

Valuation techniques and the inputs used in fair value measurements of available-for-sale financial assets (level 3), are as follows:

AFS assets	Valuation technique	Discount rate	Changes of inputs and others
Incheon-Kimpo expressway Co, Ltd. and others	Past transaction model and others	-	Amount of recent capital increase
Daegu South Circulation Road Corporation and others	Dividend discount model and others	11%–14%	Expected dividend cash flows
Metropolitan Western Expressway Co., Ltd.	Discounted cash flow model	1.61%	Available-for-sale estimates
Others	Net asset value assessment and others	-	Fair value of net assets and others

Changes in book amount of available-for-sale financial assets that are measured at fair value (level 3) for the periods ended December 31, 2017 and 2016, are as follows (Korean won in millions):

Year	Beginning balance	Acquisition	Disposal	Total comprehensive income (loss)		Others(*1)	Ending balance
				Loss for the period	Other comprehensive income

(*1) Merger, acquisition and transfer of business

(*2) Changes due to exchange rate difference and others

The Group recognized the land subsequently measured at revaluation amount, and if the land were stated at cost, the land would amount to ₩3,124,810 million and ₩3,140,766 million as at December 31, 2017 and 2016, respectively.

As at December 31, 2017, a certain portion of the Company's land and buildings are pledged as collaterals for loans from KDB and others (see Note 34).

Details of revaluation model, which the Company applies to measurement of the land are as follows:

For the year ended December 31, 2017, the Group initially measured all land assets using fair value at the date of the revaluation. As at December 31, 2017, the fair value of land assets was determined from the appraisal that was undertaken by independently qualified valuers, the First Appraisal & Consulting Co., Ltd ("FACC") and Mirae & Saehan Appraisal Co., Ltd., on October 30, 2017.

FACC and Mirae & Saehan Appraisal Co., Ltd. are members of Korea Association of Property Appraisers and comprise of certified professionals that have a significant amount of industry experience.

Fair value hierarchy classifications of the land as at December 31, 2017 and 2016, are as follows (Korean won in millions):

	December 31, 2017			December 31, 2016		
	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
Land	₩ -	₩ -	₩ 5,071,608	₩ -	₩ -	₩ 4,688,725

12. Property, plant and equipment (cont'd)

Valuation techniques and inputs used for fair value measurement of land assets (Level 3) are as follows:

Valuation technique	Significant and unobservable inputs	Correlation between unobservable inputs and fair value arguments
Official Assessed Reference Land Price ("OARLP"):	Fluctuation rate of land price and others	Fair value increases (decreases), if rate of land price increases (decreases).
OARLP of similar parcels nearby the subject land and reflating corrections necessary for differences between the subject and the comparable	Parcel conditions and others	Fair value increases (decreases), if correction of parcel conditions and others increases (decreases).
	Land conditions affecting the sales price and others	Fair value increases (decreases), if correction of land conditions affecting the sales price increases (decreases).

Changes related to the application of the revaluation model for land for the year ended of December 31, 2017 are as follows (Korean won in millions):

Beginning balance	Acquisition	Reclassification	Disposal	Revaluation			Ending balance
				Other comprehensive income	Profit for the period	Others	
₩ 4,688,725	₩ 6,923	₩ 39,149	₩ (71,409)	₩ 412,958	₩ 1,465	₩ (6,203)	₩ 5,071,608

Capitalized borrowing costs for the years ended December 31, 2017 and 2016, are as follows (Korean won in millions):

	2017	2016
Capitalized borrowing cost	₩ 4,380	₩ 7,440
Capitalization interest rate	3.44%~4.10%	3.60%~4.47%

Classification of depreciation expenses for the years ended December 31, 2017 and 2016, is as follows (Korean won in millions):

	2017	2016
Cost of sales	₩ 337,128	₩ 343,517
Selling and administrative expenses	45,943	43,949
Research and development cost and others	21,869	20,823
Profit for the period from discontinued operations	2	10,990
	₩ 404,942	₩ 419,279

13. Intangible assets

Changes in intangible assets for the years ended December 31, 2017 and 2016, are as follows (Korean won in millions):

	2017				Total
	Goodwill	Industrial rights	Development costs	Other intangible assets	
Beginning balance	₩ 4,574,667	₩ 1,160,915	₩ 945,808	₩ 272,942	₩ 6,954,332

(*2) Changes due to exchange rate difference and others

13. Intangible assets (cont'd)

The book amount of membership with indefinite useful lives in other intangible assets item is ₩49,084 million and ₩53,539 million as at December 31, 2017 and 2016, respectively.

Meanwhile, expenditure on research and development, which was recognized as expenses, amounted to ₩267,646 million and ₩270,716 million for the years ended December 31, 2017 and 2016, respectively.

Details of impairment test of goodwill, are as follows:

Goodwill allocated to the CGU as at December 31, 2017 and 2016, are as follows:

Company	CGUs	December 31, 2017	December 31, 2016	Description
Doosan	Mottrol BG	₩ 84,562	₩ 84,562	Manufacturing and sale of hydraulic components
	Industrial vehicles BG	76,861	79,175	Manufacturing and sale of forklifts
	Fuel Cell BG	41,133	42,521	Manufacturing and sale of fuel cell
DHC	Power plant	635,912	619,233	Manufacturing and sale of power plant
	WATER	15,455	6,786	Manufacturing and sale of freshwater and water treatment facilities
DI	Construction machine	3,519,566	3,671,278	Manufacturing and sale of construction equipment
DEC	Construction industry	60,049	60,049	Housing construction and infrastructure construction
Oricom	Magazine	1,373	1,373	Advertising services
	Advertisement	9,690	9,690	
		<u>₩ 4,444,600</u>	<u>₩ 4,574,667</u>	

The recoverable amount of CGU is determined based on a value-in-use calculation, and a discount rate used as follows:

Company	CGUs	Discount rate	Long-term sustainable growth rate
Doosan	Mottrol BG	10.60%	1.00%
	Industrial vehicles BG	8.30%	1.00%
	Fuel Cell BG	11.30%	1.00%
DHC	Power plant	10.10%	1.00%
	WATER	10.10%	1.00%
DI	Construction machinery	8.50~9.50%	1.50~2.00%
DEC	Construction industry	10.10%	1.00%
Oricom	Magazine	9.80%	-
	Advertisement		1.00%

13. Intangible assets (cont'd)

The Group uses cash flow projections based on financial budgets approved by the directors covering five-year periods for a value-in-use calculation. The financial budgets are determined based on historical result and expectation of market growth. Cash flows beyond that five-year periods have been estimated using expected growth rate, and the growth rate does not exceed long-term average growth rate of market. the discount rates used reflect relevant risks specific to the CGUs.

The recoverable amount may change according to changes in key assumptions. Accordingly, the Group's management regularly observes relevant turnovers and industrial trends.

Capitalized borrowing costs for the years ended December 31, 2017 and 2016, are as follows (Korean won in millions):

	2017	2016
Capitalized borrowing cost	₩ 14,387	₩ 12,268
Capitalization interest rate	3.44%~4.10%	3.60%~4.47%

Classification of amortization expenses for the years ended December 31, 2017 and 2016, is as follows (Korean won in millions):

	2017	2016
Cost of sales	₩ 143,623	₩ 134,306
Selling and administrative expenses	81,618	84,955
Research and development cost and others	646	882
Profit for the period from discontinued operations	-	1,436
	<u>₩ 225,887</u>	<u>₩ 221,579</u>

Development costs as at December 31, 2017, are as follows (Korean won in millions):

Company	Individual asset	December 31, 2017	Residual amortization period(*1)
	Large Gas Turbine	₩ 221,619	-
	IGCC gasification plant	48,543	-
DHC	Standard thermal power 500MW	36,493	-
	Wind Power 3MW Class III Model	24,485	-
	USC CFB Boiler RPM	14,360	4.25 years
	1500 horsepower engine for next tram	14,453	3.16 years
DI	Loader generation 6	11,334	-
	G2 D34 Tier4-finalexhaust emission control engine	10,614	1.92 years

(*1) In case the amortization begins, the remaining amortization period is included. Otherwise, it is marked with '-'.
'-'.

13. Intangible assets (cont'd)

Intangible assets for which an impairment loss has been recognized as at December 31, 2017, are as follows (Korean won in millions):

Company	Classification	Individual asset	Amount of impairment loss		December 31, 2017	Recoverable amount assessment methods
			2017	Accumulated		
			₩ 652	₩ 652	₩ -	Value in use
DHC	Development costs	Development of submerged UF membrane process technology (*1)				
	Development costs	Development of onshore / offshore wind power(*2)	17,312	17,312		- Value in use
	Development costs	Trimble Burners and others	6,796	6,796		- Value in use
Doosan	Development costs	Functional film and others	1,244	1,244		- Value in use
Doosan Robotics	Development costs	Industrial Robot Development	725	725	8,161	Fair value
	Other intangible assets	Golf membership (*3)	26,729	26,729	8,161	Fair value
DI	Other intangible assets		82	8,430	10,184	Fair value
	Other intangible assets		3	156	620	Fair value
DEC	Other intangible assets	Condo membership (*3)				
			85	8,586	10,804	
			26,814	35,316	18,965	

(*1) With regard to development of submerged UF membrane process technology, it is anticipated to be difficult to advance into the North American market and decided to stop the development project. Accordingly, the related book amount has been reduced in full.

(*2) As the market competitiveness deteriorated in relation to the development of onshore / offshore wind power, the related book amount was fully reduced as part of securing new technology.

(*3) The recoverable amount is estimated by reflecting the fair value of the individual asset.

13. Intangible assets (cont'd)

Intangible assets recognized for the reversal of impairment losses as at December 31, 2017, are as follows (Korean won in millions):

Company	Classification	Individual asset	Reversal of impairment loss	Recoverable amount assessment methods
DHC	Other intangible assets	Golf membership (*1)	₩ 756	Fair value
DE	Other intangible assets	Golf membership (*1)	66	Fair value
DI	Other intangible assets	Software (*2)	1,868	Value in use
			₩ 2,690	

(*1) The recoverable amount is estimated by reflecting the fair value of the individual asset.

(*2) The recoverable amount is estimated based on the value in use of individual assets and the company's medium and long-term strategy.

The accounts on the statement of comprehensive income for which the Group recognizes an impairment loss (reversal) for the years ended December 31, 2017 and 2016 are as follows (Korean won in millions):

	2017		2016	
Other non-operating expenses	₩	26,814	₩	61,732
Other non-operating income		2,690		18

14. Investment properties

Changes in investment properties for the years ended December 31, 2017 and 2016, are as follows (Korean won in millions):

	2017			2016		
	Land	Building	Total	Land	Building	Total
Beginning balance	₩ 367,770	₩ 96,519	₩ 464,289	₩ 387,242	₩ 120,283	₩ 507,525
Acquisition/capital expenditure	-	451	451	505	7,791	8,296
Disposal	(15,358)	(1,814)	(17,172)	(24,778)	(11,513)	(36,291)
Revaluation	32,495	(6,728)	25,767	4,095	(4,564)	(469)
Reclassification	(2,224)	(2,781)	(5,005)	(97)	(15,478)	(15,575)
Others(*1)	(227)	(252)	(479)	803	-	803
Ending balance	₩ 382,456	₩ 85,395	₩ 467,851	₩ 367,770	₩ 96,519	₩ 464,289

(*1) Changes due to exchange rate difference and others

Certain of the Company's land and buildings included in the above investment properties are pledged as collaterals for borrowings from Woori Bank and others (see Note 34).

During the year ended December 31, rental income from investment properties is ₩33,270 million (2015: ₩42,150 million).

14. Investment properties(cont'd)

Details of fair value model that the Group applies to measurement of investment properties are as follows:

For the year ended December 31, 2017, the Group initially measured all investment properties using revaluation model. As at December 31, 2017, the fair value of investment properties was determined from the appraisal that was undertaken by independently qualified valuers, the First Appraisal & Consulting Co., Ltd ("FACC") and Mirae & Saehan Appraisal Co., Ltd., on November 30, 2017.

FACC and Mirae & Saehan Appraisal Co., Ltd. are members of Korea Association of Property Appraisers, and comprise of certified professionals who have a significant amount of industry experience.

Fair value measurements of land assets by fair value hierarchy level as at December 31, 2017 and 2016, are as follows (Korean won in millions):

	December 31, 2017			December 31, 2016		
	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
Land	₩ -	₩ -	₩ 382,456	₩ -	₩ -	₩ 367,770
Building	-	-	85,395	-	-	96,519
	₩ -	₩ -	₩ 467,851	₩ -	₩ -	₩ 464,289

Valuation techniques and inputs used for fair value measurement of land (Level 3) are as follows:

Valuation technique	Significant and unobservable inputs	Correlation between unobservable inputs and fair value arguments
Official Assessed Reference Land Price ("OARLP"): OARLP of similar parcels nearby the subject land and reflating corrections are necessary for differences between the subject and the comparable	Fluctuation rate of land price and others Parcel conditions and others Land conditions affecting the sales price and others	Fair value increases (decreases), if rate of land price increases (decreases). Fair value increases (decreases), if correction of parcel conditions and others increases (decreases). Fair value increases (decreases), if correction of land conditions affecting the sales price increases (decreases).
Sales comparison approach : Fair value is based on sales comparison of a similar object based on marketability with target object, while measuring fair value as compared with circumstance correction, time correction and individual factors	Circumstance correction Regional factors Comparative value of individual factors	Fair value increase (decrease) if circumstance correction increases (decreases). Fair value increase (decrease) if regional factors increases (decreases). The comparative value of individual factors increases (decreases) if the fair value increases (decreases).
Estimated cost price approach: Fair value is based on depreciation and replacement costs considered with structure, building materials, construction condition, building equipment, end use, present condition and management condition	Replacement cost	Fair value decreases (increases), if replacement cost increases (decreases).

15. Bonds and borrowings

Details of bonds and borrowings as at December 31, 2017 and 2016, are as follows (Korean won in millions):

	Annual interest rate (%)	December 31, 2017	December 31, 2016
Public subscription bond	2.38~5.27	₩ 1,877,724	₩ 2,077,434
Private subscription bond(*1)	1.68~5.73	625,000	535,000
Convertible bond	3.20	6,265	152,630
Bonds with stock warrants	1.00~3.00	1,194,175	143,423
Bonds denominated in foreign currencies(*2)	2.13~4.13	640,590	737,185
		4,343,754	3,645,672
Less: Exchange rights adjustment		-	(17,524)
Less: Conversion rights adjustment		(133)	(9,998)
Less: Warrants adjustment		(219,142)	-

Less: present value discounts			(521)	(4,337)
Less: current portion of long-term borrowings			<u>(599,350)</u>	<u>(432,988)</u>
			<u>₩ 197,479</u>	<u>₩ 246,975</u>

(*1) Property, plant and equipment and others are pledged as collaterals for borrowings (see Note 34).

16. Net defined benefit liabilities

The Group partially operates a defined benefit plan for employees, and the actuarial valuation of plan assets and the defined benefit obligations are performed by a reputable actuary using the projected unit credit method.

Details of net defined benefit liabilities as at December 31, 2017 and 2016, are as follows (Korean won in millions):

	December 31, 2017	December 31, 2016
Present value of defined benefit obligation	₩ 2,489,741	₩ 2,577,100
Fair value of plan assets	(1,760,859)	(1,655,553)
Net defined benefit liabilities	₩ 728,882	₩ 921,547

Post-employment benefits recognized in the consolidated statements of profit or loss for the years ended December 31, 2017 and 2016, are as follows (Korean won in millions):

	2017	2016
Current service cost	₩ 114,142	₩ 118,779
Net interest cost	33,265	36,560
Effect of reduction / liquidation	(2,027)	(3,834)
	₩ 145,380	₩ 151,505

Classification of the expenses related to the net defined benefit liabilities recognized in the consolidated statements of income for the years ended December 31, 2017 and 2016, is as follows (Korean won in millions):

	2017	2016
Cost of sales	₩ 91,000	₩ 86,287
Selling and administrative expenses	49,450	51,259
Research and development cost and others	4,719	10,475
Profit for the period from discontinued operations	211	3,484
	₩ 145,380	₩ 151,505

16. Net defined benefit liabilities (cont'd)

Changes in net defined benefit liabilities for the years ended December 31, 2017 and 2016, are as follows (Korean won in millions):

	2017		
	Defined benefit obligations	Plan assets	Net defined benefit liabilities

Ending balance	₩ 2,577,100	₩ (1,655,553)	₩ 921,547

16. Net defined benefit liabilities (cont'd)

Assumptions used for actuarial valuation as at December 31, 2017 and 2016, are as follows (In percentage, %):

	2017	2016
Discount rate	1.03 ~ 7.76	1.20 ~ 7.72
Salary growth rate	2.00 ~ 8.00	2.00 ~ 8.00

Details of plan assets as at December 31, 2017 and 2016, are as follows (Korean won in millions):

	December 31, 2017	December 31, 2016
Equity securities	₩ 334,651	₩ 441,389
Debt securities	607,006	542,487
Deposits and others	819,202	671,677
	<u>₩ 1,760,859</u>	<u>₩ 1,655,553</u>

Plan assets are mostly invested in assets that have a quoted market price in an active market.

The sensitivity analysis of the defined benefit liabilities as at December 31, 2017 and 2016, is as follows (Korean won in millions):

			Amount	Ratio
December 31, 2017	Discount rate	1% increase	₩ (285,591)	(-)11.47%
		1% decrease	356,729	14.33%
	Salary growth rate	1% increase	67,062	2.69%
		1% decrease	(62,159)	(-)2.50%
December 31, 2016	Discount rate	1% increase	(273,796)	(-)10.62%
		1% decrease	342,157	13.28%
	Salary growth rate	1% increase	63,257	2.45%
		1% decrease	(57,111)	(-)2.22%

The weighted average maturity of defined benefit liabilities at the end of the current year is 13 years.

The Group expects to contribute ₩103,500 million for the defined benefit plans in the following period. The expense recognized in the current period in relation to defined contribution plan was ₩20,196 million (2016: ₩19,949 million), respectively.

17. Provisions

Changes in provisions for other liabilities and charges for the years ended December 31, 2017, is as follows (Korean won in millions):

	2017						
	Beginning balance	Addition (Reversal)	Used	Others	Ending balance	Current	Non-current
Provision for product warranties	₩ 352,889	₩ 324,595	₩ (264,130)	₩ (13,371)	₩ 399,983	₩ 167,852	₩ 232,131
Provision for sales return	2,519	1,702	(1,315)	2,608	5,514	5,514	-
Provision for restoration	6,041	133	-	204	6,378	-	6,378
Provision for loss compensation	9,060	4	-	(9,027)	37	-	37
	<u>₩ 370,509</u>	<u>₩ 326,434</u>	<u>₩ (265,445)</u>	<u>₩ (19,586)</u>	<u>₩ 411,912</u>	<u>₩ 173,366</u>	<u>₩ 238,546</u>

The Group estimates expenditure required to settle the Group's obligations from product warranty, refund, related after service and others based on warranty period, historical claim rate and recognized provision. Meanwhile, the Group recognized provisions amounting to ₩117,744 million related to pending litigations as other liabilities.

18. Share capital and share premium

Changes in share capital and share premium for the years ended December 31, 2017 and 2016, are as follows (Korean won in millions, except for share data):

	Number of shares		Share capital			Share premium
	Ordinary shares	Preferred shares	Ordinary shares	Preferred shares	Total	
Balance at January 1, 2016	21,270,888	5,396,759	₩ 107,854	₩ 26,984	₩ 134,838	₩ 355,736
Retirement of treasury shares	(1,064,000)	-	-	-	-	-
Balance at December 31, 2016	<u>20,206,888</u>	<u>5,396,759</u>	<u>₩ 107,854</u>	<u>₩ 26,984</u>	<u>₩ 134,838</u>	<u>₩ 355,736</u>
Balance at January 1, 2017	20,206,888	5,396,759	₩ 107,854	₩ 26,984	₩ 134,838	₩ 355,736
Exercise of stock options	800	-	4	-	-	65
Retirement of treasury shares	(1,010,385)	-	-	-	-	-
Exercise of stock options	700	-	4	-	-	115
Balance at December 31, 2017	<u>19,198,003</u>	<u>5,396,759</u>	<u>₩ 107,862</u>	<u>₩ 26,984</u>	<u>₩ 134,846</u>	<u>₩ 355,916</u>

The Group's number of shares authorized amounted to 400,000,000 shares, with a par value of ₩5,000 per share. There is a difference arising from retirement of shares through retained earnings, and capital stock is not the same as total par value of shares issued.

The number of shares that are having limitation on voting right under commercial law amounted to 4,226,070 and 5,276,455 as at December 31, 2017 and 2016, respectively. Preferred share has no voting rights.

19. Capital surplus

Details of capital surplus as at December 31, 2017 and 2016, are summarized as follows (Korean won in millions):

	December 31, 2017	December 31, 2016
Share premium	₩ 355,916	₩ 355,736
Gain from merger	1,390	1,390
Revaluation reserve	277,542	277,542
Other reserve	209,403	193,114
	<u>₩ 844,251</u>	<u>₩ 827,782</u>

20. Other components of equity

Other components of equity as at December 31, 2017 and 2016, are summarized as follows (Korean won in millions):

	December 31, 2017	December 31, 2016
Treasury shares	₩ (261,975)	₩ (323,456)
Loss on sale of treasury shares	(16,738)	(16,738)
Stock option	10,431	12,296
Loss on capital reduction	(127,318)	(127,319)
Others	(48,872)	(38,463)
	<u>₩ (444,472)</u>	<u>₩ (493,680)</u>

Treasury shares

The Group held treasury shares for the purpose of stabilizing the share price and changes in treasury shares for the year ended December 31, 2017, are as follows (Korean won in millions, except for share data):

	Number of treasury shares			Book amount of treasury shares		
	Ordinary shares	Preferred shares	Total	Ordinary shares	Preferred shares	Total
Beginning balance	5,276,455	673,054	5,949,509	₩ 308,404	₩ 15,052	₩ 323,456
Acquisition	-	-	-	-	-	-
Disposal (retirement of treasury shares)	(1,010,385)	-	(1,010,385)	(61,481)	-	(61,481)
Ending balance	<u>4,266,070</u>	<u>673,054</u>	<u>4,939,124</u>	<u>₩ 246,923</u>	<u>₩ 15,052</u>	<u>₩ 261,975</u>

Share-based payment

The Group has granted stock options to its directors several times. Stock options are settled based on the Board of Directors' decision by issuance of new share, treasury share or cash settlement. Vesting condition offers two-year service after the resolution at the shareholders' meeting.

Number of granted options as at December 31, 2017, is as follows (Korean won, except for share data):

	Date of grant	Number of granted options	Exercisable period	Exercisable price	Expected fair value at the date of grant
8th	2007.3.16	-	2010.3.16 - 2017.3.15	₩ 59,600	₩ 28,930
9th	2008.3.21	11,900	2011.3.21 - 2018.3.20	165,100	68,846
10th	2009.3.27	1,850	2012.3.27 - 2019.3.26	106,500	53,382
12th	2010.3.26	39,310	2013.3.26 - 2020.3.26	116,500	56,460
13th	2011.3.25	15,500	2014.3.25 - 2021.3.25	137,500	68,045
14th	2012.3.30	23,300	2015.3.30 - 2022.3.30	156,200	63,647
15th	2013.3.29	50,400	2016.3.29 - 2023.3.28	128,100	43,353

16th	2014.3.28	65,000	2017.3.28 - 2024.3.27	134,300	39,558
------	-----------	--------	-----------------------	---------	--------

20. Other components of equity (cont'd)

The Group calculated expenses by applying the fair value approach. Assumptions used in determining fair value of stock options are as follows:

	Risk-free interest rate	Expected exercisable period	Expected volatility	Expected dividend yield ratio
8th	4.79%	3.00	46.73%	-
9th	5.18%	3.00	58.89%	-

	<u>₩ 559,370</u>	<u>₩ 414,106</u>	<u>₩ 12,907</u>	<u>₩ 132,357</u>	<u>₩ 12,907</u>	<u>₩ 10,216</u>

The impact on profit or loss for the period and the succeeding year is determined based on total contract costs which are estimated based on the circumstances present from the start of the contract to the end of current year, and the estimated contract revenue as at December 31, 2017. The total contract costs and contract revenue may change in the future.

26. Construction contracts (cont'd)

As at December 31, 2017, details of contracts that the revenue was recognized based on the percentage of completion measured by contract cost incurred, which is more than 5% of sales of year ended December 31, 2016 are as follows (Korean won in millions):

	Contract	Contractual completion date	Percentage-of-completion (%)	Due from customers		Trade receivables (receivables from construction contracts)

Others	1,249,154	(375,759)	(28,748)	844,647
Consolidation adjustments	(42,738)	1,070	-	(41,668)
	<u>₩ 514,431</u>	<u>₩ (120,893)</u>	<u>₩ 22,836</u>	<u>₩ 416,374</u>

The Group offsets deferred tax assets and deferred tax liabilities, if the Group has a legally enforceable right to set off current tax assets against current tax liabilities and the deferred tax assets against deferred tax liabilities relating to income taxes levied by the same taxation authority.

Temporary differences, net loss and tax credit carryforwards, which have not been recognized as deferred income tax assets and expired or unused as at December 31, 2017 and 2016, are as follows (Korean won in millions):

	December 31, 2017	December 31, 2016
Deductible temporary differences	₩ 3,744,239	₩ 3,790,474

The probability of realizing deferred tax assets depends on the Group's ability to generate taxable income in future years, economic situation and industry forecast. The Group periodically reviews these matters.

31. Tax expenses and deferred tax (cont'd)

Details of unrecognized deductible (taxable) temporary differences as deferred tax assets (liabilities) related to investments in subsidiaries, joint ventures and associates, are as follows (Korean won in millions):

	December 31, 2017	December 31, 2016	Remarks
Investments in subsidiaries	₩ (493,908)	₩ (218,906)	Able to control the reversal of the temporary difference
Investments in associates and joint ventures	76,233	55,494	Probable that the temporary difference will not reverse in the foreseeable future
	<u>₩ (417,675)</u>	<u>₩ (163,412)</u>	

A reconciliation of income tax expense and accounting income before income tax expense for the years ended December 31, 2017 and 2016, are as follows (Korean won in millions):

	2017	2016
Profit before income tax expense	₩ 341,266	₩ 1,652
Tax at domestic tax rates applicable to profits	82,586	400
Adjustments:		
Non-temporary difference	151,833	154,014
Temporary difference not recognized as deferred income tax	96,265	60,584
Tax credits	(18,072)	(21,270)
Effect of tax rate fluctuation	1,194	(22)
Additional income tax paid(refunded) for prior periods	3,990	(570)
Others	(44,896)	(104)
Income tax expense	<u>₩ 272,901</u>	<u>₩ 193,034</u>
Average effective tax rate (Income tax expense/Profit before income tax expense)	80%	11688%

32. Earnings per share

Basic earnings per share

Basic earnings per share for the years ended December 31, 2017 and 2016, are as follows (Korean won):

	2017		
	Continuing	Discontinued	Total
Basic earnings (losses) per ordinary share	₩ 2,120	₩ (211)	₩ 1,909
Basic earnings (losses) per old-type preferred share (*1)	2,141	(213)	1,928
	2016		
	Continuing	Discontinued	Total
Basic earnings per ordinary share	₩ 4,755	₩ 5,217	₩ 9,972
Basic earnings per old-type preferred share (*1)	4,778	5,244	10,022

(*1) The Group calculated earnings per share for old-type preferred share due to the nature of the share, which does not have preferred right on dividends and liquidation; therefore, the share is considered as ordinary share, based on KIFRS 1033 'Earnings per share.'

32. Earnings per share (cont'd)

Basic earnings per share

Profit attributable to ordinary shares is as follows (Korean won):

	2017		
	Continuing	Discontinued	Total
Profit attributable to the ordinary equity holders of the Parent Company	₩ 45,063,458,611	₩ (4,495,474,202)	₩ 40,567,984,409
(-)Expected dividends on new-type preferred shares	5,288,092,818	(527,533,518)	4,760,559,300
(-)Expected dividends on old-type preferred shares	8,115,635,520	(809,605,637)	7,306,029,883
Profit attributable to ordinary share	<u>₩ 31,659,730,273</u>	<u>₩ (3,158,335,047)</u>	<u>₩ 28,501,395,226</u>

	2016		
	Continuing	Discontinued	Total
Profit attributable to the ordinary equity holders of the Parent Company	₩ 93,725,507,417	₩ 102,842,773,970	₩ 196,568,281,387
(-)Expected dividends on new-type preferred shares	2,269,877,077	2,490,682,223	4,760,559,300
(-)Expected residual income attributable to new-type preferred shares	2,168,187,990	2,379,101,203	4,547,289,193
(-)Expected dividends on old-type preferred shares	9,307,238,011	10,212,611,289	19,519,849,300
(-)Expected residual income attributable to old-type preferred shares	8,803,966,123	9,660,382,994	18,464,349,117
Profit attributable to ordinary share	<u>₩ 71,176,238,216</u>	<u>₩ 78,099,996,261</u>	<u>₩ 149,276,234,477</u>

The weighted-average number of ordinary shares and old-type preferred shares outstanding used in basic earnings per share calculation is as follows (in Shares):

	2017		2016	
	Ordinary shares	Old-type preferred shares	Ordinary shares	Old-type preferred shares
Beginning outstanding shares	14,930,433	3,790,262	15,280,760	3,790,262
Exercise of stock option	638	-	-	-
Change in treasury shares	-	-	(310,506)	-
Weighted-average number of ordinary shares outstanding	14,931,071	3,790,262	14,970,254	3,790,262

Diluted earnings per share

Diluted earnings per share for the years ended December 31, 2017 and 2016, are as follows (Korean won):

	2017		
	Continuing	Discontinued	Total
Diluted earnings (losses) per ordinary share	₩ 2,120	₩ (211)	₩ 1,909
Diluted earnings (losses) per old-type preferred share	2,141	(213)	1,928

	2016		
	Continuing	Discontinued	Total
Diluted earnings per ordinary share	₩ 4,754	₩ 5,217	₩ 9,971

Diluted earnings per old-type preferred share	4,778	5,244	10,022
---	-------	-------	--------

32. Earnings per share (cont'd)

Diluted profit attributable to ordinary shares is as follows (Korean won):

	2017		
	Continuing	Discontinued	Total
Profit attributable to ordinary shares	₩ 31,659,730,273	₩ (3,158,335,047)	₩ 28,501,395,226
Share-based expense (after tax)	-	-	-
Diluted profit attributable to ordinary shares	₩ 31,659,730,273	₩ (3,158,335,047)	₩ 28,501,395,226

	2016		
	Continuing	Discontinued	Total
Profit attributable to ordinary shares	₩ 71,176,238,216	₩ 78,099,996,261	₩ 149,276,234,477
Share-based expense (after tax)	-	-	-
Diluted profit attributable to ordinary shares	₩ 71,176,238,216	₩ 78,099,996,261	₩ 149,276,234,477

The weighted-average number of ordinary shares outstanding used in the diluted earnings per share calculation is as follows (in Shares):

	2017	2016
Weighted-average number of ordinary shares outstanding	14,931,071	14,970,254
Effect of stock option exercise	371	314
Adjusted weighted-average number of ordinary shares outstanding	14,931,442	14,970,568

As there are no potential ordinary shares for old-type preferred share, diluted earnings per share for old-type preferred share are equal to basic earnings per share for old-type preferred share.

Conditions for preferred shares dividends (Korean won, except for share data):

	Face value	Number of shares issued
Old-type preferred share (*1)	₩ 5,000	4,411,074
New-type preferred share (*2)	5,000	985,685

(*1) The Company should distribute cash dividend available to ordinary shares +1%.

(*2) The Company should distribute 2% of face value of preferred share annually. In case the dividend rate of ordinary share exceeds that of preferred share, preferred share is participated in dividend for the exceeded dividend.

33. Contingencies and commitments

33.1 Notes, bills and checks offered in security

As at December 31, 2017, the Group pledged 20 face value notes (face value: ₩11,602 million), 2 face value checks (face value: ₩600 million), 11 blank face notes and 41 blank face checks as collateral against financial institutions for the borrowings and payment guarantees of the Group.

33.2 Financial covenant

33.2.1 DI

During 2016 and 2017, DI issued 28th foreign currency-denominated bonds for USD 300,000 thousand and 32nd foreign currency-denominated bonds for USD 300,000 thousand. In addition, the issued 28th and 32nd foreign currency-denominated bond has an early redemption clause for when and if DI's guarantor, KDB, becomes privatized, and the funds required for such redemption will be provided by KDB to DI. In addition, 11,178,538 shares and 10,882,765 shares of Doosan Bobcat Co., Ltd. held by Doosan Infracore Co., Ltd. are provided as collateral for the above bonds. If they do not meet the base price, additional shares or deposits equivalent to the difference should be provided as collateral.

DI has provided 25,433,532 shares of Doosan Bobcat Co., Ltd. as collateral for borrowings of ₩550,000 million from 11 companies including KDB Bank. The share or deposit should be provided as collateral when the contracted mortgage ceiling ratio is not met in relation to the above borrowings

In addition, if the long-term credit rating given by one or more of the three domestic credit rating agencies (Nice Credit Rating Co., Ltd., Korea Credit Rating Co., Ltd. and Korea Ratings & Co.) of DI is below BB0, it includes arrangements that constitute reasons for the loss of interest on the due date.

33.2.2 DEC

DEC entered into construction contracts with INTDC Co., Ltd. and Daewon Plus Constructions Co., Ltd. to develop Ilsan Zenith project and Haeundae Zenith project, respectively. DEC has provided guarantees to customers, who purchase the Ilsan Zenith and Haeundae Zenith apartments for the consideration paid to purchase the apartments during the repurchase guarantee periods (two to three years after the date of sale), should customers apply for such guarantees (see Note 33.8). As at December 31, 2017, the Group's consolidated financial statements do not reflect the effect from such guarantees, as the Group cannot reasonably predict the number of purchasers applying for the guarantee and the related guaranteed amount.

33.2.3 DHC

As at December 31, 2017, DHC has entered into an agreement with Doosan We've in Gwanggyo and Namyangju Baebong District Apartment Housing Project to take over debt (conditional limit: ₩ 488,100 million) on condition that the liability is completed or not yet completed.

33.3 Transferred trade receivables

Outstanding trade receivables sold with recourse by the Group are in the amount of ₩54,394 million and ₩106,225 million as at December 31, 2017 and 2016, respectively. Because the Group retains some level of risks and rewards relating to trade receivables, the Group has recognized its book amount and cash receipt from transfer as short-term borrowings, in consolidated statements of financial position (see Note 15).

33. Contingencies and commitments(cont'd)

33.4 Litigation in progress

Details of major lawsuits are as follows (Korean won in millions):

	Claim	Claimed amount
Doosan	Claims for damages and others	₩ 25,902
DHC	LNG tank collusion claims for damages and others	479,000
DI	Claims for damages and others	86,568
DEC	Claims for damages and others	77,867
DE	Claims for damages and others	33,898
		<u>₩ 703,235</u>

The outcome of such pending lawsuits cannot presently be determined.

In 2015, Hyundai Engineering & Construction Co., Ltd. requested International Chamber of Commerce to arbitrate disputes on manufacture of HRSG and warranties for general repairs with DEC. As at December 31, 2017, arbitration is in process, and the outcome of the arbitration cannot be reasonably estimated.

Besides, in 2011, outside investors invested 20% shares of Doosan Infracore China Co., Ltd., subsidiary of Doosan Infracore Co., Ltd. at ₩380 billion, and they have the right to request to jointly sell the shares held by the other party to a third party according to shareholder's agreement with Doosan Infracore Co., Ltd. In principle, Doosan Infracore Co., Ltd. should jointly sell its shares upon request by the outside investors, but it also has the right to purchase shares of outside investors at the price they are willing to sell.

In 2014, outside investors requested a due diligence report as a preliminary step to proceed with the sale process, but Doosan Infracore Co., Ltd. has not been able to provide due diligence materials including confidential information since the sale has not been confirmed. As a result, outside investors filed a lawsuit for the provision of due diligence to the Seoul Central District Court. Seoul Central District Court (March 2, 2015) dismissed an application for disposition of outside investors because Doosan Infracore Co., Ltd. did not have any obligation to provide due diligence data to outside investors.

Outside investors filed a lawsuit in November 2015 seeking the payment of the proceeds from the sale of stocks (foreign investors' proceeds of sale: ₩709.3 billion, lawsuit value of ₩10 billion). Seoul Central District Court (January 12, 2017) dismissed outside investor's claims for DI's non-fulfillment of the sale process. Then, Seoul High Court (February 21, 2018) recognized the obligation for the sale process and ruled that DI pay a portion of ₩709.3 billion of the proceeds from the sale which is ₩10 billion.

DI objected to the second judgment and appealed to the Supreme Court on February 26, 2018. Seoul High Court (February 28, 2018) suspended enforcement by the second judgment.

Even if the Supreme Court rules that DI is required to pay the plaintiffs' claims and obtain the shares to be acquired, the Group is unable to reliably measure future profits and losses that may arise from such transactions.

33.5 Technical contract

The Group has technical license agreements for the purpose of manufacturing specific products with MHI and others for the years ended December 31, 2017, and the Group paid ₩60,481 million as license fee.

33. Contingencies and commitments(cont'd)

33.6 Operating leases

Details of non-cancelable operating leases contract for the year ended December 31, 2017, are as follows (Korean won in millions):

	2017
Within one year	₩ 49,134
Later than one year but not later than five years	145,109
Later than five years	99,624
	<u>₩ 293,867</u>

33.7 Credit lines for borrowings

As at December 31, 2017, the Group has entered into bank overdraft agreements amounting to ₩ 9,918,028 million with various financial institutions.

33.8 Guarantee of payment

As at December 31, 2017, guarantees provided by the Group for third parties are as follows (Korean won in millions):

Provider	Provided to	2017
Doosan	KDFA and others	₩ 740
Circuit Foil Luxembourg Sarl	Alsarec and others	2,482
DHC and subsidiaries	Rentees of Yongin Doosan we've Apt. and others	168,208

33.10 Joint liability for contract execution

As at December 31, 2017, the Group provides joint and several guarantees amounting to ₩328,445 million for the performance of construction contracts to other construction companies. In addition, the Group provides joint and several guarantees for construction performance to Korea Housing & Finance Corporation related to the guarantee for housing sales, which was provided by Korea Housing Finance Corporation to the developers. And, investors associated with SOC business have an agreement of providing for an insufficient fund when the agreement is terminated or insufficient to repay the loan principal and interest by buy price or payment arising from purchase requirement from authorities.

34. Pledged assets

The Group pledged certain assets as collateral for its long-term and short-term borrowings as at December 31, 2017, as follows:

DI, Doosan Bobcat Inc. and DE

Clark Equipment Co. ("CECO"), a subsidiaries of the Doosan Infracore Co., Ltd. ("DI", subsidiaries of the Group), in cooperation with Doosan Holdings Europe Ltd. fully repaid the borrowings borrowed on May 28, 2014 and entered into a new loan agreement amounting to USD 1,345,000 thousand and entered into a new loan agreement for a limit of USD 150,000 thousand on May 18, 2017. DI has provided 1,980 shares (Book amount ₩446,483,250 thousand) in Clark Equipment Co., 38,447 shares (Book amount ₩ 2,520,951,505 thousand) in Doosan Holdings Europe Ltd., 110,071,219 shares (Book amount ₩104,402,525 thousand) in Doosan Bobcat Singapore Pte.Ltd.as collateral for borrowings and the limited loan agreements.

34. Pledged assets (cont'd)

As at December 31, 2017, the outstanding balance of borrowings is USD 1,234,913 thousand.

DI, a subsidiaries of the Group, provides collateral for all of shares of Doosan Infracore North America LLC and Doosan Infracore Norway AS., which are subsidiaries of the parent company, in the amount of USD 147,000 thousand borrowed from The Export-Import Bank.

The Group pledged certain assets as collateral for its financial liabilities as at December 31, 2017, which are as follows (Korean won in millions):

Provided by	Secured assets	Secured party	Financial liabilities	Secured amount
Doosan Corporation	Property, plant and equipment, Investment properties	KDB and others	₩ 183,375	₩ 422,035
DLI Co., Ltd. (*2)	Investment properties	KDB Capital, IBK Capital, Happy Tomorrow Apollon 3rd	25,500	13,978
