1. Summary Information (notes)

(1) Change in significant consolidated subsidiaries during the six months ended September 30, 2019, that resulted in changes in the scope of consolidation

In order to clarify the global management structure of NTT's global operating companies and to develop business under the NTT-branded global operating company "NTT Ltd.", NTT Group consolidated the overseas businesses of NTT Communications Corporation ("NTT Communications"), Dimension Data Holdings ("Dimension Data") and NTT Security Corporation ("NTT Security") and established NTT Ltd. in July 2019. In addition, NTT Ltd. received, by contributions-in-kind, (1) from NTT, Inc. (a subsidiary of NTT), all shares of Dimension Data and all shares of NTT Security, and certain other items, and (2) from NTT Communications, shares of overseas business-related subsidiaries and certain other items.

As a result of the above, NTT Ltd. became a specified subsidiary company. In addition, NTT Ltd. has been included in the scope of consolidation of financial results for the six months ended September 30, 2019.

(2) Changes in Accounting Methods and Estimates

① Application of IFRS 16, "Lease"

NTT Group has applied IFRS 16 "Leases" ("IFRS 16") from the beginning of the current fiscal year.

(i) Accounting treatment as a lessee

Lease transactions as a lessee were classified as finance leases when the lessor transfers substantially all of the risks and rewards incidental to ownership of the asset to the lessee, while other lease transactions were classified as operating leases under IAS 17 "Leases" for the year ended March 2019.

As a result of the application of IFRS 16, when NTT Group assesses whether a contract is, or contains, a lease, at the inception of the contract, NTT Group initially recognizes a Right-of-use assets and Lease liabilities in the Condensed Interim Consolidated Statements of Financial Position at the commencement date of the contract without classifying finance leases or operating leases except for leases with a lease term of 12 months or less or when the underlying assets are of low value. NTT Group does not apply IFRS 16 to leases of intangible assets.

(a) Lease liabilities

Lease liabilities are initially measured at the present value of unpaid lease payments at the commencement date of the contract, discounted using NTT Group's incremental borrowing rate*. Lease payments are accounted as payments for interest calculated applying the effective interest method and payments for principal. Payments for interest are presented as finance cost in the condensed consolidated statement of profit or loss.

* As interest rate implicit in the lease can not be readily determined, NTT Group uses incremental borrowing rate as discount rate.

(b) Right-of-use assets

Right-of-use assets are initially measured at cost, which comprises the amount of the initial measurement of the lease liabilities, adjusted for any initial direct costs incurred and prepaid lease payments, etc. After the initial measurements, Right-of-use assets are depreciated over the useful life or the lease term of the underlying asset, whichever is shorter, from the commencement date of the contract. The estimated useful life of Right-of-use assets is determined as same as owned property, plant and equipment. Right-of-use assets are deducted by impairment if identified and adjusted at remeasurement of the specific lease liabilities.

A part of Right-of-use assets which satisfies the definition of investment property is presented as Investment property in the Condensed Interim Consolidated Statements of Financial Position.

(ii) Accounting treatment as a lessor

For leases in which the NTT Group is the lessor, excluding subleases, NTT Group is not required to make any adjustments at the time of the application of IFRS 16.

Regarding subleases in which NTT Group is intermediate lessor, NTT Group reassessed subleases by referencing the Right-of-use assets recognized from head leases in which NTT Group is the lessee rather than the underlying asset that is the subject of a lease then some sublease contracts classified as operating leases in or prior to the previous fiscal year are classified as

finance leases. As a result, NTT Group derecognizes Right-of-use assets and recognizes Trade and Other Receivables (Lease receivables) in the Condensed Interim Consolidated Statements of Financial Position.

(iii) Transitional Measures

NTT Group applies IFRS 16 using the modified retrospective approach, under which recognizing the cumulative effect of applying the standard as an adjustment to the beginning balance of retained earnings at the date of initial application with no restatement of the comparative period. For the assessment of whether a contract that was concluded in or prior to the previous fiscal year is, or contains a lease, the NTT Group has applied the practical expedient of maintaining its previous assessment.

(iv) The impact of the change

The impact of the application of IFRS 16 is described below.
