Organisation

NLR has been a leading applied research institution for over 100 years, driven by a clear mission: to make air and space travel more sustainable, safer, efficient, and effective. With a team of over 800 professionals, we work tirelessly to develop innovative solutions and technologies that keep pace with the latest developments and effectively address global challenges. NLR operates in an objective and independent manner, working for and with international businesses and government.

At NLR, our employees are at the heart of everything we do. We are committed to creating a positive work environment where our employees feel at home, can work safely and healthily, and can develop their skills and talents. Together, we are working towards a better future for air and space travel.
