Group

At Hutchinson, we create **multi-material solutions based on science and technology** for clients operating in the most demanding environments – on land, in the air, and at sea. We are innovative, quick-thinking problem solvers, able to combine expertise to create **customized products and solutions for multiple industries**. Our solutions deliver **safety** and **comfort** for end users, make mobility and industry more **sustainable**, and help to foster a circular economy, while enabling our clients to pivot to a low-carbon future.

5

€ billion in annual revenue

100

sites across 26 nations around the world

40,000

employees swiftly adapting to industry demands and
embracing change for continued success

Global experts in multi- material solutions

Drawing on our rich entrepreneurial background and world-leading expertise in multiple fields (Acoustics & Vibration, Sealing, Fluid & Thermal management, Sensing & Actuation, Protection & Structure, Power transmission) at Hutchinson we create innovative products and solutions to support clients operating in a broad range of industries. We are unique in our ability to design solutions based on a diverse range of scientific expertise and apply these across industries. This allows us to address our clients' evolving needs while playing a pivotal role in facilitating their transition to a low-carbon future.

**Our brands and labels for
high-performance and low
environmental impact**

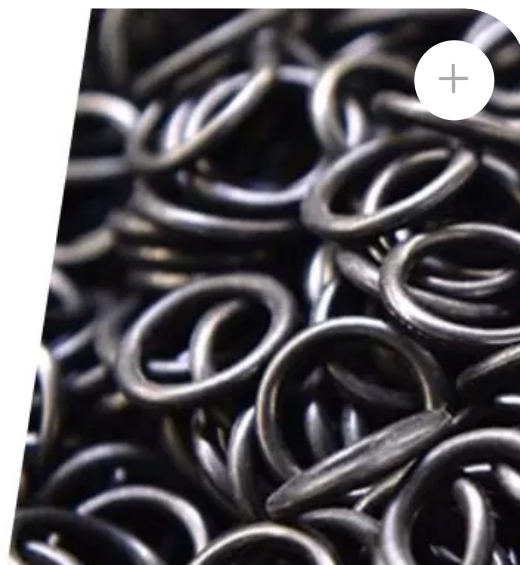

Sustainability is no longer an option – it's a necessity for every major industrial player. At Hutchinson, we have developed the **reSOLUTIONS**® label* to highlight the products we create that fulfill the strictest environmental and sustainable criteria around CO2 reduction, weight savings, and the use of recycled or bio-based materials. We have also developed the **revea**® range of rubber, thermoplastic, and thermoplastic elastomeric materials made from recycled or bio-sourced raw materials.

**This label is an environmental self-declaration (type II labeling), which meets the ISO14021 standard.*

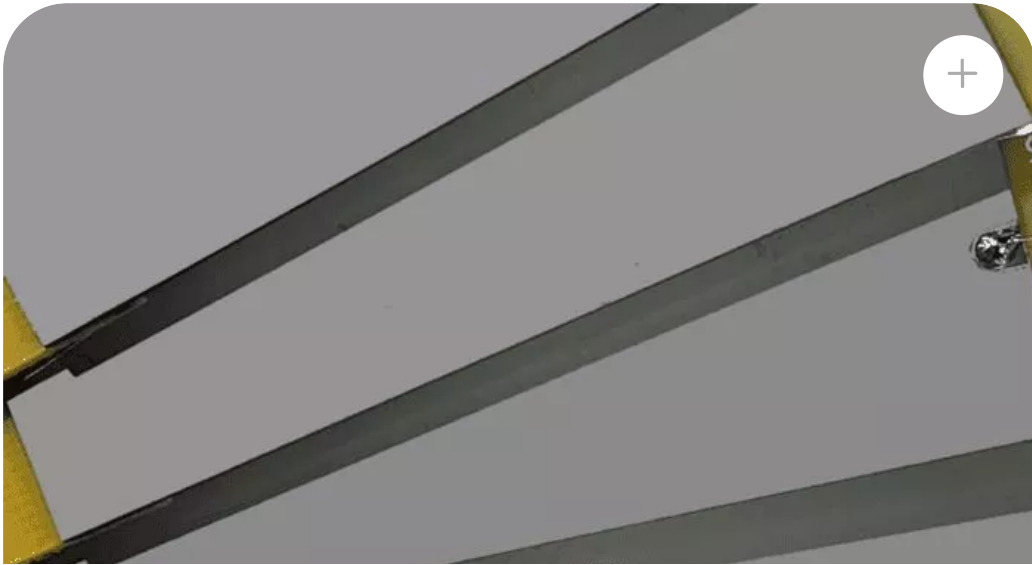

Expertise in multiple fields

Our expertise encompasses multiple fields of cutting-edge science and technology, enabling us to design innovative solutions that deliver comfort, safety and sustainability for a broad range of demanding industries.
