Hitachi Energy

[Home](#) > [Company](#) > Company Profile

Hitachi Energy is a global technology leader in electrification, powering a sustainable energy future with innovative power grid technologies with digital at the core. Over three billion people depend on our technologies to power their daily lives.

With over a century in pioneering mission-critical technologies like high-voltage, transformers, automation, and power electronics, we are addressing the most urgent energy challenge of our time – balancing soaring electricity demand, while decarbonizing the power system.

With an unparalleled installed base in over 140 countries,

HITACHI

Hitachi Energy

employ over 50,000 people in 60 countries and generate revenues of around \$16 billion USD.

Our Business Units

Our business provides pathways to accelerate the energy transition and deliver customer success. We are a global leader in power technologies and energy systems. Customers across the utilities, transportation, IT such as data centers, industry and Smart Life sectors trust us to deliver pioneering and digital solutions across the value chain. Our solutions help meet the growing demand for electricity – affordably, reliably, sustainably, and in a modern way.

To deliver maximum value, we have organized our operations around five global Business Units and have local offices and research centers spanning 60 countries. This highly networked design enables our experts to stay close to customers,

fostering a strong awareness and knowledge of local market operating conditions.

HITACHI

Hitachi Energy

Grid Automation

Our Grid Automation business unit has a comprehensive portfolio of solutions. These range from substation automation, communication networks, grid automation services, grid edge solutions to enterprise software solutions. These solutions address all key segments connected to the energy system including generation, transmission distribution, industries, transportation, and infrastructure sectors.

Grid Integration

Our Grid Integration business has completed more than 4,000 projects of Grid Integration portfolio spanning transmission and substation to facilitate reliable and efficient the future digital electric network and reduce environmental impact.
